

# A simple summary of where we are now in the Covid crisis

April 2021

## Introduction

I wanted to make this as brief, concise and simple as possible, but have not succeeded due to much new information emerging. I am not going to refer to multiple source documents on subjects already covered; you can find these in my previous papers. This is a summary of where we are today: possibly in the time of Britain's most dire peril.

## The government has done nothing but lie, lie, lie

I have said many times that this pandemic is a satanic enterprise to enable world domination by a Luciferian elite. Satan is both the father of lies (Jn 8:44) and the author of confusion (1 Cor 14:33). He uses deception to control nations and is the arch-perpetrator of deceitful strategies (Rev 20:8). When governments enact deceitful and lying policies they are following a satanic purpose.

Ministers cannot seem to open their mouth without lying. There have been so many lies that it is very hard to keep up with them. Their lies are so blatant as to be ridiculous, but the supine mainstream media never draws attention to them because it is reliant upon government advertising finance to keep afloat.<sup>1</sup> I will draw attention to key lies used to drive this fear of a pandemic.

### **LIE: We are in a pandemic**

No we are not. We are not in one now and were not in one a year ago.

The WHO had to change their definition of what a pandemic is so that Covid-19 could be described as one. In reality, a pandemic is a disease that spreads across the world and has very severe effects with a high fatality rate. Under the current WHO definition many normal diseases should be called a pandemic, including: sepsis, pneumonia, influenza, hepatitis, malaria, TB and many more.

If Covid is so serious, why do you need a PCR test to see if you have got it? If it is so serious, why does it hardly affect people under 70 years old? How can we be in a pandemic (which by definition affects everyone) if children are virtually immune to it? Even if people

---

<sup>1</sup> Note the April 24 anti-lockdown march through London. This was a seminal event in history involving hundreds of thousands of people marching peacefully over many miles. Only the anti-Iraq War may have been larger. It contained a wide mix of ages, ethnic races, rich and poor, working class and middle class, and also some celebrities, such as two contenders for London mayor and media people. The BBC did not report on this at all as if it never happened. Some papers ran a negative story after the march had finished. This involved peaceful people joyfully celebrating by dancing and singing in Hyde Park. The police formed into two battle lines and charged them with batons. A few planted activists attacked the police and this became the story about 'far-right anti-lockdown thugs'. This is the disgraceful state of the mainstream media.

under 25 catch it they may not even know that they have it because they have no symptoms and are not sick.

In the Spanish Flu 200 million people died. Parents would leave home to buy food and come back to find two of their children dead. Everybody had friends and relatives that died. Most people today do not have any close friends that have died from Covid.

There have been several more serious epidemics in my lifetime, including: Asian Flu and Hong Kong Flu. In terms of monthly deaths per million between 1851 and July 2020, the following epidemics were far worse than Covid-19: 1857 (Dysentery), 1869 (famine), 1889-1895 (Russian flu), 1899 (Cholera), 1918 (Spanish flu), 1931 (flu), 1941 (flu), 1956 (flu), 1968 (flu), 1976 (flu), 1988 (flu), 1993 (Beijing flu). No one locked-down society.

A review of a county in Sweden in August 2020 found that 85% of the 122 Covid deaths investigated were due to a different underlying cause. This over-counting occurred globally to make the virus sound more deadly.

### *Real pandemics*

- PLAGUE OF ATHENS: [430-426 BC] killed a quarter of the population.
- THE ANTONINE PLAGUE: [165-180] killed 25% of the Roman Empire and a quarter of those infected, probably 5 million..
- PLAGUE OF JUSTINIAN: [541-549]; a bubonic plague.<sup>2</sup> The number of deaths is not known but it killed between 20%-40% of the imperial capital in Constantinople and anything up to half of the known world.
- THE BLACK DEATH: (bubonic plague) that raged between 1331 and 1350 and sporadically locally afterwards. Up to 25,000,000 probably died in Europe; perhaps one-third of the population in England. The number of deaths throughout Europe was between 33% and 50% of the population. Whole towns were wiped out. Up to 200 million were killed worldwide.
- THE GREAT PLAGUE OF LONDON: [1665-66] (bubonic plague) killed 20% of London's population.
- THIRD PLAGUE PANDEMIC: [1855] bubonic plague that started in China and spread to India and the western USA. It killed about 10 million people.
- THE 1917-18 SPANISH FLU PANDEMIC: 500 million people were infected globally (27% of global population of less than 2 billion people) with 17-50 million dead or possibly even more. [This wasn't really a viral (flu) pandemic at all. The terrible effects were due to the appalling repercussions of WWI: food deprivation, trench conditions, poor sanitation, contaminated drinking water, poor housing, no health service and experimental vaccinations on soldiers causing a bacterial disease. Healthy people in close proximity to sick people (such as nurses and family) did not catch any disease.]

In Britain, fewer people have died in 2020 than any year before 2009 [see later]. Far from being in a pandemic, 2020 has not been a bad year for excess deaths. Several countries had less than normal excess deaths. The pandemic story is a hoax to terrify a nation into authoritarian state compliance.

### **LIE: We are in an emergency**

An emergency does not last over a year. The word shows that it applies to something emerging and short-lived, or very serious, requiring immediate action once the nature of it is understood. An earthquake is an emergency.

---

<sup>2</sup> The commonest form of plague in humans, characterised by fever, delirium, and the formation of buboes (inflammation of the lymph nodes). The plague bacterium, *Yersinia pestis*, is transmitted by rat fleas.

In the Spanish Flu, a real emergency by nature of its extreme death rate, society continued to function as normal.

**LIE: Covid-19 is just like the Spanish Flu pandemic**

Complete poppycock.

The median age of a victim of the Spanish Flu was 28; with Covid is it 82.

Spanish Flu killed over 3% of the world's population; Covid has killed 0.04% and 94% of those had an average of 2.6 co-morbidities.

Covid has an average survival rate of 99.75%; even higher for people aged under 65.

Claiming that Covid is just like the Spanish Flu is a gross error and does nothing but contribute to scaremongering.

**LIE: Covid-19 is a virulent disease based on the SARS-Cov-2 novel coronavirus**

Everything in this narrative is false.

Firstly, no one anywhere in the world has isolated and purified a novel coronavirus called SARS-Cov-2; no one. If there has been a pandemic with millions of people infected it should be easy to get plenty of samples of the virus; no one has been able to do this. All the agencies, such as the USA's CDC<sup>3</sup> or the UK's MHRA<sup>4</sup> or Ireland's HSE<sup>5</sup> have been forced to formally admit this. At least 53 national health services worldwide have admitted that they do not have the virus samples. This proves that the virus is a hoax.

Since no one has the virus by the way, then no one can produce a proper vaccine to combat it. This is another hoax.

Covid-19 is not a virulent disease. This was formally declared by Public Health four nations on 19 March 2020 when it was downgraded and was stated to not be a serious highly infectious disease. Note that this was before lockdown 1.

The mortality rate (IFR)<sup>6</sup> for Covid-19 has been variously (and erroneously) stated but the most respectable medical and statistician expert in this field in the world is John Ioannidis. With the latest data he puts the mortality rate at less than 0.2% (slightly higher in Europe). This is less deadly than many influenza strains. The most likely IFR is 0.12%.

The survival rate for Covid-19 is higher than 99%. Very few healthy people die from this disease. Almost all deaths attributed to Covid-19 were from co-morbidities and in people older than 83 (when the natural death date is 82-years old) or wrong treatment in hospital.

Everywhere in the world where sceptical doctors and scientists have sequenced the genome of people declared positive for Covid-19 they found that their illness was mostly influenza A and in some cases influenza B. No one has been found to have contracted a novel coronavirus. The world was closed down for a bad flu season.

<sup>3</sup> See CDC website.

<sup>4</sup> See Frances Leader's website regarding an FOI request to the MHRA.

<sup>5</sup> See Gemma O'Doherty's website and videos regarding an FOI request and lawsuit to the HSE in Dublin.

<sup>6</sup> Infection Fatality Rate.

## **LIE: Over 120,000 people died from Covid-19 in the worst year for deaths for a century**

Again, everything in this is false.

### *Faulty statistics*

Early on it was realised that the death stats were fake. Due to changes in writing death certificates anyone that died within 28 days of a PCR positive test was labelled as a Covid death. Furthermore, autopsies were cancelled so that real cause of death could not be determined.

Firstly, the PCR tests are useless (see later) so this did not prove anything. Then it was noted that patients that died from multiple issues (including car crashes, falling off motor bikes or heart attacks) were listed as a Covid death.

Due to embarrassment, the ONS changed the data in mid April 2021 when it affirmed that 23% of Covid deaths were not from Covid. However, this is not good enough as many experts have affirmed. Other data leads to the conclusion that probably more than half of Covid deaths were not due to Covid and the deaths due to claimed Covid were really Influenza. However, the government pays doctors and hospitals for recording a Covid death.

In fact all of the government's figures used to scare the population are questionable. In August of 2020 Matt Hancock was forced to change the infection statistics because they were being double counted. Hospitals were never overwhelmed but had empty wards and staff bored with nothing to do. The Nightingale tent hospitals were never used (bar for a very few patients in London); mainly because there were never the staff to be employed in them (no one in government thought of staffing before they wasted millions of pounds).

The Society of Actuaries stated that, when adjusted for population increases, 2020 was not a bad year for excess deaths. In fact there were more deaths in 2008 and almost every year before that going back to the 19<sup>th</sup> century. This statistical analysis was later confirmed by a peer-reviewed article in the BMJ affirming that 2020 was less deadly than every year before 2009.<sup>7</sup> There was no pandemic in 2020 and not even a serious epidemic. In some countries, even those that did not lockdown, excess deaths were below average; Sweden is but one example.

The government continually over-exaggerated death statistics. Daily death figures by 'date of death' reveal that Britain has had no more than 28 deaths a day since the beginning of April 2021. Yet the government announcements of death stats have been as high as 60.

### *Lockdown deaths*

Another factor is that government policy has actually killed people needlessly but these did not die from Covid. We could list this as follows:

<b>Needless deaths caused by government policy</b>
All the people that will die (have died) from missed vital treatment and scans, such as cancer patients not diagnosed.
Cancelling of usual clinics, treatments and scans which later led to a serious illness; such as closing iron i/v clinics or diabetes consultations.
Stopping GPs from seeing people; making appointments

<sup>7</sup> BMJ, 'UK deaths in 2020: how do they compare with previous years?', 13 April 2021, BMJ 2021;373;n896.

impossible to get.
Failure of GPs to properly diagnose serious conditions in zoom consultations, such as people that went on to have a heart attack or serious cancer.
Do not resuscitate orders on the elderly.
Pushing sick people out of hospitals into care homes.
Stopping care home residents from going into a hospital or even seeing a GP.
Creating the environment in lockdown to increase mental health disorders that often led to suicides or domestic abuse.
Crashing businesses and creating unemployment has led to deaths (it always does).

### *Covid-19 is really the flu*

In reality, all that has occurred in the Covid crisis is two seasons of bad flu.

Let us analyse the claimed death statistics.

The ONS tells us, and the media proclaims, that the mortality rate in 2020 was 1,016 per 100,000 of the population. But this is not unusual. In 2000 the mortality rate was 1,031.6. The NHS figures show that hospitals were never overrun and often had lower than average full beds.

The government and media claim that Covid deaths so far total 127,000 and claim that this is exceptional. It is not. It is twisting the figures.

Official government Covid death figures are being counted since 2019.<sup>8</sup> This means that the Covid death total covers two flu seasons (autumn/winter). This is abnormal recording of statistics. To get one flu season stats we divide that number in two, which is 63,500. However, as I show elsewhere the ONS has now reduced the Covid death figure by 23% (even though this is too low, this is what we will use). So the new figure per season is 48,895.

This is not an abnormally high figure for flu deaths in one season. The flu season for 2017-2018 flu death toll was 50,100. Note the proof of all this is that in the last year or so flu disappeared from view.

Influenza A and B were replaced by Covid-19 and called a pandemic. The Covid crisis is a barefaced lie.

### **LIE: Asymptomatic people spread Covid**

This is the basic lie that has driven all the restrictive policies (lockdowns, masks, social distancing).

It has been scientifically proven since January 2020 that asymptomatic people do not pass on the infection. This was further proved by study after study. Almost all said there was zero transmission. One or two papers thought that there was a little transmission, about 0.7%; so even these thought that transmission was negligible. In the round – there is no

---

<sup>8</sup> I acknowledge a debt to Dr Vernon Coleman here.

transmission by people without symptoms (such as fever, cough, sneezing, running nose etc.). Studies claiming asymptomatic transmission have been proved to be fraudulent.

### **LIE: You can catch it from surfaces**

Studies also proved this to be a lie.

Eventually, even the CDC was forced to confess that there was virtually zero chance of catching Covid from a contaminated surface (less than one in 10,000).

Thus all the plastic aprons, washing of chairs, hand sanitising, disinfecting shopping and so on was a waste of energy.

### **LIE: Facemasks protect people from Covid infection**

#### *Ineffective*

Scientific papers going back to 2015 had already proved that this was nonsense. More recent papers also confirmed that they are useless against a virus (see previous papers for a list of these papers<sup>9</sup>). Indeed, the original WGO, CDC, SAGE and government position was that masks are ineffective. Then in the summer of 2020 they started to be mandated on public transport and then everywhere.

The claimed SARS-Cov-2 virus is 20 nanometres long. The holes in the pores of facemasks are about 400-500 nanometres in diameter. Viruses just pass straight through.

You can find videos of people testing facemasks with a vape. The chemical gas particles from a vape are bigger than a virus, yet even this just passes through, around, up, down and from the sides of a facemask. If you can breath through a facemask, then you have no protection against a virus in the air.

#### *Hazardous*

However, wearing a sterile facemask for many hours a day is extremely dangerous. This restricts oxygen intake by at least 20% and leads to headaches, dizziness and raised blood pressure and suppresses the immune system.

The build up of bacteria on the mask, both outside and inside from breathing, can cause disease, such as: bacterial pneumonia and many other illnesses.

But many use masks that are not sterile, being kept in pockets and handbags etc. These get easily contaminated and then the bacteria get breathed into your lungs, causing infection.

#### *Asbestos-like contaminants*

More insidious is that facemasks have been examined under microscopes and found to be full of contaminants. Some masks contain small blue threads of substances similar to asbestos that can ruin the lungs. Health Canada has issued a warning about blue and grey facemasks (SNN200642) made in China because they contain an asbestos-like substance associated with 'early pulmonary toxicity'. New masks contain graphene,<sup>10</sup> which is supposed to shred viruses but when breathed in also shred the lung lining tissue. In December 2020 the Quebec government had distributed these masks to over 15,000 day-care centres. Children started complaining that they felt like they were breathing in cat hair. Then it turned out that these facemasks had never been risk tested. Another type of mask (MC9501) was also determined to be unsafe and recalled.

<sup>9</sup> Such as, 'Simple points exposing the lies that led to Covid-19 totalitarianism'.

<sup>10</sup> A form of crystalline carbon. Marketed as 'Graphene enhanced facemasks KN95/FFP2' and endorsed by the WHO. Claims to filter out viruses and bacteria as well as being a face covering.

*Nano-worms*

Horribly, others have been found to contain nano worms of some description that move about when in contact with moisture and warm air (as by breathing). This is too fantastic to believe but I have seen the evidence with my own eyes from more than one source, including a doctor. No one knows why these are present and what harm they cause.

Others claim that the objects are not living worms but fibres associated with morgellons (see PCR swabs next).

So facemasks do no good whatsoever but they can do immense harm.

*There is no point*

Why are children masked when they are not at any risk? No child has ever infected a teacher so far.

In America 10 of the 15 states with the least Covid activity in April 2021 do not have mask mandates. 14 of the 15 states with the most Covid activity have mask mandates. Masks do not help stop transmission.

*Facemasks and crime*

Studies are beginning to appear showing that the widespread use of facemasks has increased the crime rate. As hiding your face becomes normal behaviour, it is all the easier for criminals to commit crimes and hide their identity. Sometimes it is not simply crimes of theft or vandalism but social crimes. For example, the man who tripped up an old man in Morrisons, knocking him to the floor heavily, and then calmly did his shopping and left knowing that the cameras could not identify him with a mask on.

*Pollution*

Various groups around the world are now drawing attention to the appalling problem of facemask environmental pollution. Facemasks have been found covering coral reefs, inside animal's stomach and birds entangled in them by the loops.

It is also being pointed out that there are fears of chemical and nano-particle pollution in seawater. However, why is this contamination not being considered as dangerous for human beings wearing them for 9-12 hours a day (nurses frequently ratchet up this length of time)? If there is chemical and particulate contamination, no one should be wearing them.

**LIE: PCR tests are the gold standard of identifying Covid***Not a diagnostic tool*

The PCR test is a technique to multiply microscopic bits of a substance. The inventor, Kary Mullis, formally stated that it must not be used for medical diagnosis. The official blurb on the test kits themselves affirm that the test is not sufficient to determine a medical diagnosis without a doctor's analysis of symptoms backing it up.

Despite all this, the government used mass testing of asymptomatic people to generate official 'case' numbers of Covid patients.

*Wrong cycle rates*

The test uses a cycle rate to exponentially multiply viral fragments but anything over 17 cycles is dubious. Anything over 25 cycles is highly suspicious. Anything over 35 cycles is worthless. The rate used by the government laboratories was 45 cycles. Effectively, this means that any viral fragment in a person, such as a dead bit of an old cold, or even the body's own DNA, could register as a positive case. Thus the positive case failure rate could

be as high as 100%.<sup>11</sup> Analytical studies have shown that the false positive rate is routinely above 95%. Matt Hancock lied when he stated, on Talk Radio with Julia Hartley-Brewer, that the false positive rate was less than 1%. The test results are deliberately distorted to push lockdowns – not deaths and not hospital capacity.

It is extremely rare that asymptomatic people are infected. To check, simply take a person's temperature. Thus PCR tests are not necessary at all.

Few people spotted that the government reduced the cycle rate to 25 after the vaccination rollout to show that the vaccines were a success. The whole crisis has been manipulated by PCR test figures. [The CDC reduced the cycle rate to 28 for vaccinated people instead of 40.]

#### *Failures of practice and assay*

In addition, testing was performed by people not properly trained to administer it, causing errors and the laboratory used to process the test swabs was riddled with multiple failed procedures, causing cross-contamination.

The PCR test is utterly useless in this epidemic. It produced huge numbers of false positives. Even Anthony Fauci had to admit that the chances of getting accurate results from a PCR test are minuscule. Many people have famously got positive results from testing fruit, clean water, oil, dirty puddle water, cola and other items. One person got a positive result from just sending the swab back unused and 'sterile'.

So, thousands of people have been diagnosed as positive for Covid and forced to isolate for no reason. Statistics have been fraudulently inflated. Panic has been caused by false statistics.

#### *Mass testing is ineffective*

Mass testing, especially in schools amongst children that are hardly affected by the virus, has been utterly useless but has caused a great deal of damage.

Take the case of a child that tests positive but does not really have the virus. The entire class is sent home for two weeks of quarantine, but all the relatives and close contacts of those people are also quarantined forcing them to stop work for no reason. Society cannot function like this.

Multiple doctors, epidemiologists and scientific groups have condemned the mass testing programme as utterly useless and a waste of money.<sup>12</sup> What public health outcome does it hope to achieve?

An analysis in April 2021 showed that there were more false positives than true positives in the first two weeks of mass testing in schools. One SAGE lie in February was that the return of unvaccinated kids to schools would create a resurgence of Covid infections. Far from that being true, in the first week only 0.06% of rapid tests of students produced positive results. Yet scientists feared that even those would be false positives.

---

<sup>11</sup> See explanation by Paul Weston, 'This one Covid lie could bring down the British government', 26 September 2020. See also Carl Heneghan. The government's official error rate for false positives is between 0.8% to 4.3%, with an average of 2.3%. At September 2020, with 20 million tested, the 2.3% error rate was 460,000 false positives; but the unadjusted overall positives was 423,000; in other words, there were no true positives at all. 100% failure rate.

<sup>12</sup> See previous papers listing these.

Professor Jon Deeks of Birmingham University affirmed in March that there would be far more false positives than true positives in school kids. New data from the Dept of Health and Social Care has now confirmed this. Deeks then stated that this report was a damning indictment of mass testing of school kids, which resulted in many whole classrooms being forced into quarantine needlessly. At one stage over 200,000 children were forced to self-isolate. Deeks has demanded that false positive data must be released, affirming that this mess was predicted by scientists from the beginning.<sup>13</sup>

The British Medical Journal has been warning against PCR tests for case finding, mass testing and disease surveillance since September 2020. It said, '*PCR is not a test of infectiousness. Rather the test detects trace amounts of viral genome sequence, which may be either live transmissible virus or irrelevant RNA fragments from previous infection.*'<sup>14</sup>

The use of the PCR test has no scientific validity to determine infection whatsoever – so why is it being continued and even ramped up? Why are hospitals testing everybody before allowing people into green areas? Why are schoolkids being tested twice a week when they are immune to the virus.

#### *Dangers in the procedure*

Even more serious is the fact that many people have been harmed in various ways by the test procedure, especially when administered by non-professionals because the swab is pushed up to six inches into the nasopharynx up and not back. These dangers include:

#### DAMAGING THE VAGUS NERVE

The vagus nerve refers to each of the tenth pair of cranial nerves, supplying the heart, lungs, upper digestive tract, and other organs of the chest and abdomen. This is situated behind the nasal passage and is connected to the medulla oblongata. It is the tenth longest nerve. Note how important this nerve system is; it controls blood pressure, heart rate, lung activity and other organs. Damage to this nerve system causes critical illness. It can also cause inflammation, anxiety and depression.

The PCR test causes either stimulation of the vagus nerve or damage to it by inserting the swab too far. Stimulation causes fainting, nausea, fever, anxiety, pain, flu-like symptoms, depression and many other symptoms associated with Covid. Damage to the vagus nerve can result in death.

#### BLEEDS

Whistleblower nurses have reported that some people undergoing this '*brutal treatment*' had damage caused to the nasopharynx which led to prolific bleeding, especially amongst the elderly who have frail skin. In one case the bleed was so severe that the person had a heart attack and ended up in the ICU for some time.

#### BRIAN DAMAGE

One case brought by doctors to an Australian court claimed that the PCR test had killed more than one person through brain damage.

The cause of this is deep penetration into the nasal cavity through a thin bony plate which protects the brain. Infected swabs then contaminate the brain (spinal) fluid and cause serious inflammation that can lead to death.

---

<sup>13</sup> Jon Deeks, @deeksj, 29 April 2021.

<sup>14</sup> BMJ, 'Operation Moonshot proposals are scientifically unsound', BMJ 2020;370:m3699.

Brain fluid leak is very serious and many people have suffered this from faulty administration of the swab.

#### INFECTION CAUSED BY CONTAMINATED SWABS

These appear to have been contaminated with various items. Most commonly it is bacteria from poor handling, which causes infection. Some said that they were deliberately infected by the manufacturers in China. Others claim that there are nano-particles on the swabs that look like silver threads that move (magnetism?).

There have been many allegations of people catching Covid from a swab. One occasion was a whole family in America who all caught Covid after testing despite being isolated and there being no other vectors. The father died.

#### ETHYLENE OXIDE

Swabs are coated with this substance, used to sterilise the cotton. However, Ethylene oxide is a severe carcinogen that causes lymphoma and leukaemia amongst other things. Contaminating the nasal passage close to the brain with a cancer-causing agent is shocking and wicked.

#### *Why nasal?*

Everyone knows that DNA samples can be easily and painlessly obtained from swabs taking samples from the mouth. There is no special reason for PCR tests invading the nasal cavity. The claim that this area has a higher viral load is ridiculous as only tiny amounts of genetic material are required for a test. It makes no sense unless there is a deliberate ploy to deliver something close to the brain.

Furthermore, the world has been told that wearing a facemask is vital to stop infection spread because the mouth is full of viral particles. If this is true, why the need to push a swab right up to the brain barrier to get a decent sample? The PCR test is not about a medical diagnosis but something else.

#### STUDIES

People dismissing all this as fantasy should read the study conducted by Trinity College Dublin which was published in Nature<sup>15</sup> and confirmed that nano-particles caused brain damage and that this hydrogel delivery system was being used more and more by drug companies. See my previous papers on the hydrogel delivery system and various papers confirming the procedure.

A study emanating from Slovakia<sup>16</sup> claims that the swabs contain hydrogel and lithium that causes damage to blood cells and particles also gravitate towards the pineal gland by magnetism (the pineal gland has its own magnetic field). [Curiously, Ivermectin destroys this process. Is this why Ivermectin is being refused for Covid patients?] The study is not formally published (but that means little these days) and could be fake; but this contaminant possibility needs proper study. The microscopic slides in this study would be hard to fake.

Mike Adams of Natural News has also performed high level microscopic study of swabs and facemasks and found strange red and blue fibrous objects, some with hooks, that he cannot identify. He supplies numerous slides. What are these fibres doing there?

---

<sup>15</sup> Simon J Hawkins et. a;; 'Nanoparticles-induced neuronal toxicity across placental barriers is mediated by autophagy and dependent on astrocytes', Nature nanotechnology, 2 April 2018.

<sup>16</sup> Abbott and Nadal, Bratislavia, Slovakia.

Another person shows a swab tested by rubbing against some meat.<sup>17</sup> First he does this with a cotton swab and there is no change. Then he uses the PCR swab and tiny particles are attached to the meat and hooked on, then they stand upright like bristles. No one can say what these are for. This is filmed in real time under a microscope. These spike fibres would be attached to the nasopharynx in a patient.

Another researcher did a microscopic examination and found disturbing results.

Firstly, black spots on the swab turned out to be lithium, which assists the growth of hydrogel. Secondly, a ‘morgellons’ microbe was observed. This is a weaponised GMO form of *Dictyostelium discoideum*. This withstands antibiotics and only thymol will kill it. It has a hook like structure that can penetrate cell walls. It can also bond together to form structures. The researcher shows microscopic slides illustrating his comments.

I cannot verify these claims and could not get to the original paper. Neither do I know what damage these microbes can do. ‘Morgellons’ is a name given to a skin disease involving fibres under the skin which Wikipedia says is a delusion but many researchers claim is a real disease caused by pollution. You can find photos and videos of people pulling these fibres out of skin lesions. They appear to be a real problem, not a fanciful whimsy.

There is something very seriously wrong with these PCR tests. There should be no contaminants on sterile swabs.

#### *The antigen test*

This is even less accurate, producing false negatives.

#### *The antibody test*

This is a blood test used to detect evidence of prior infection. It does not identify active illness.

#### *Lateral flow test*

Similar to the home pregnancy testing kit. Very quick results but very inaccurate. Sample pads contain reagents which sample fluid reacts with to identify a connection or not. They tend towards false negatives. Positive results need to be confirmed by a PCR test. Multiple household items, such as Cola and milk, have tested positive.

#### *What’s the point*

Since SARS-Cov-2 has not been proved to exist at all, what are these test kits searching for? Viral fragments of a past or present coronavirus such as the flu or a cold will test positive. Every positive PCR case that has been subsequently genetically sequenced has found Influenza A or B. The tests merely show that you have, or recently had, a flu or a cold. The world shut down for this. Dead viral fragments from a cold you had six months ago will test positive on a PCR test.

#### **LIE: Social distancing is effective against virus infection**

Whether spread in aerosols or saliva droplets (no one is sure about Covid) a virus can spread quite some distance. Aerosols can spread more than 30 feet from an infected person. The idea that standing six feet apart will offer protection from a virus is insane. A

---

<sup>17</sup> YouTube, Harald van de Hoorn, ‘Spikes from the test swabs remain inside meat’, 14 April 2021.

new MIT study shows that there is no difference in standing 60 feet or 6 feet away from others as protection against viruses.<sup>18</sup> Therefore, there is no point in social distancing.

Multiple medical experts have condemned this restriction as being pointless.

Closeness is actually not the key factor in protection. Many people were infected with Covid but their spouses never got infected despite sleeping in the same bed.

The evils caused by this are multiple and various. Today I heard of an elderly lady that fell over and cut herself in multiple places and was bleeding. She was close to a famous chocolate factory and was helped by a passer by to the first aid station of this factory. The security guard refused to let the injured lady in, or allow her to be treated outside, citing the Coronavirus laws. What has the world come to?

Note also that many of the heavy-handed police overreach actions have been illegal since social distancing is a government request or advice but not a legal requirement.

### **LIE: Lockdowns help stop the Covid infection**

From the start, esteemed epidemiologists affirmed that lockdowns do no good to stop a viral epidemic but actually do harm. Lockdowns delay the eventual viral spread and can enhance severity. We need not discuss the science of this but shutting healthy people up is obviously detrimental.

- It has never been done in history.
- It goes against logic.
- It suppresses the immune system (lack of vitamin D from sunshine) and makes you more susceptible to illness.
- It hinders physical exercise, which weakens the immune system. There have been no credible instances of outdoor transmission.
- It causes psychological damage.
- It stops people working, which affects mental and physical health.
- It aids viral infection by locking people together in small spaces.
- Why lock up healthy people under 70 who are not at serious risk of dying?

And so the data proved. Most of the infections occurred in confined spaces, most especially hospitals and care homes but also domestic dwellings.

### *We need to flatten the curve*

What curve? Boris said that the curve of infections needed flattening in March but the virus had already been active since September 2019. Italian scientists proved that it had been active in Italy by then. Many people in Britain succumbed to what was called Covid-19 in November-December 2019. There had been several curves before lockdown in March 2020 and sufficient was known by then to show that it was not a serious highly infectious disease. Furthermore, data has shown that the infection rate was falling before each of the three lockdowns began.

### *Lockdowns don't work*

As more and more data came in, study after study proved that lockdowns are ineffective against hindering an epidemic. The virus will do what it does, whatever measures are enacted. Empirical data also shows no huge difference between areas that locked down and those that didn't; in fact, those that had no lockdown generally fared better (Japan,

<sup>18</sup> PNAS, Martin Z Bazant & John WM Bush, 'A guideline to limit indoor airborne transmission of Covid-19', PNAS 27 April, 2021 118 (17) e2018995118.

Sweden, South Dakota, Belarus). The Oxford Stringency Index found an inverse relationship between hard lockdown and health benefits. There are now over 40 studies proving that lockdowns are useless and seven in particular which I will summarise.

- Christian Bjornskov; '*Did lockdown work? An economists cross-country comparison*', CESifo Economic Studies, 29 March 2021. Severe lockdown countries were not associated with lower mortality.
- Quentin de Larochelambert et. al.; '*Covid-19 mortality: a matter of vulnerability among nations facing limited margins of adaptation*', *Frontiers in Public Health*, 19 November 2020. Restrictions, including lockdown, are not linked to the death rate.
- John Gibson; '*Government mandated lockdowns do not reduce Covid-19 deaths; implications for evaluating the stringent New Zealand response*', *New Zealand Economic Papers*, 25 August 2020.
- Eran Bendavid et. al; '*Assessing mandatory stay-at-home and business closure effects on the spread of Covid-19*', *European Journal of Clinical Investigation*, 5 January 2021. No significant benefits on case growth of more restrictive NPIs.
- Christopher R Berry, et. al; '*Evaluating the effects of shelter-in-place policies during the Covid-19 pandemic*', *Proceedings of the National Academy of Science of the USA*, 13 April 2021. Also Harris School of Public Policy, University of Chicago, 24 February 2021. Studies claiming that lockdowns save thousands of lives are not credible. Lockdowns had no detectable health benefits and made no difference to Covid deaths in America.
- RF Savaris et. al; '*Stay-at-home policy is a case of exception fallacy; an internet-based ecological study*', *Scientific Reports (Nature)*, 5 March 2021.
- Rabail Choudhry et. al; '*A country level analysis measuring the impact of government actions, country preparedness and socio-economic factors on Covid-19 mortality and related health outcomes*', *EClinical Medicine (The Lancet)* 25 (2020), 100464 21 July 2021. Full-lockdowns and widespread Covid-19 testing were not associated with reductions in the number of critical cases or overall mortality.

The clear empirical evidence is observed in the states and countries that did not lockdown or halted it before Britain. Sweden is the clearest example of imposing no restrictions but requesting voluntary common sense. It fared no worse than Britain following similar curves, but actually had proportionally fewer deaths. States in America, such as South Dakota, that had no lockdown fared as well, or better, than the states that had a severe lockdown, such as Michigan. States that stopped lockdowns after the first one, such as Florida also did better than comparable lockdown states, such as California.

Stopping people from gathering outside was always stupid since the evidence for infection in the open air is 1 in 1,000.

### *Lockdowns ruined many lives and caused many unnecessary deaths*

I have outlined this in detail in several past papers and won't repeat all that here. There are excellent websites listing all the harms caused by lockdowns.<sup>19</sup>

One point I will make is that one UK child abuse helpline was contacted 85,000 times during lockdowns. The NSPCC helpline was called 23% more times than the previous year. 47% led to referrals, such as the police. The calls involved domestic abuse, neglect, physical abuse, emotional abuse and dealing with parents who were themselves suffering from alcohol or substance abuse.

---

<sup>19</sup> E.g. AIER, 'The catastrophic impact of Covid forced societal lockdowns'. *Collateral Global* (Dr Carl Heneghan et. al.).

It is wicked that government policies have led to severe damage to the youngest section of society, the very people that need nurturing most. Closing down schools, universities, learning by zoom, cancelling societal groups, preventing relationships from being formed and continued etc. etc. is as crime against the young.

### **LIE: The NHS needed protecting**

The NHS is there to protect people, not the other way round.

Even in the Spanish flu hospitals managed to cope with the establishment of field hospitals and hospices set up in stately homes. Far from pushing sick people out (as the NHS did this last year) retired nurses volunteered and all sick people were treated wherever possible.

The focus on the NHS was a foil to push the nation into lockdown. There was never any emergency in hospitals; remember this was just a bad flu year. Multiple nurses and doctors have blown the whistle and stated that hospitals were empty most of the time during lockdowns. Even A and E wards were less busy than normal. Statistics show the same, even though hospitals reduced their bed numbers in 2020 by 10,000 compared to 2019 (why?).<sup>20</sup>

Nurses were so bored that they spent their time arranging and filming dance routines in hospital corridors and wards and posting them on Tik Tok.

Experienced older nurses have been resigning out of disgust, unable to cope with all the lies. You can find videos of multiple nurses explaining this.<sup>21</sup> Some of the stories are heartbreaking.

More amazingly, a freedom of information request to NHS Sussex (covering hospitals from Chichester to Eastbourne) asking how many people died of Covid (positive PCR test, no pre-conditions) between 1 January 2020 and 20 March 2021 – the answer was one! Regarding how many patients currently had Covid, the answer was zero!!! Stop and take this in.

In addition, hospital management became as draconian as the government and threatened doctors and nurses from commenting on the situation or going to the media. It appears that most decent staff members are disgusted by what occurred in the last year but are terrified of losing their job if they speak out. What kind of place is the NHS when professional staff are forbidden to criticise policy that harms patients?

Over time more and more stories emerged of shocking malpractice due to the focus on Covid. Heartbreaking stories came out showing how seriously ill patients were neglected. Stories also emerged of younger staff treating patients with shocking disrespect and neglect. Managers demanded Do Not Resuscitate orders on everyone over 65.

This was the year that the NHS essentially collapsed due to government policy and will probably never recover. Already there are 4.7 million people on waiting lists for urgent treatment. Even though Covid basically does not exist in Britain today (statistics are so low as to be effectively zero) hospitals are refusing treatment to patients who need certain treatments. They are also refusing to treat anyone that does not submit to a PCR test (myself included).

---

<sup>20</sup> See my paper, 'The true cause of NHS pressure'.

<sup>21</sup> One good interview is on UK Column news.

We did not protect the NHS, we destroyed its heart.

**LIE: The government cared about care homes and wanted to protect the elderly**

The opposite is true. Government policies have resulted in a near genocide of the old. In many ways the government acted against helping the elderly.

The most glaring example of this was the policy to send sick infected people from hospitals (that were largely empty) into care homes where they infected everybody and killed off the most frail. This is more than stupidity, it is culpable manslaughter. Globally, about 45% of the Covid fatalities occurred in care homes.

At the beginning of the first lockdown, many care home managers were unable to get food deliveries, as did many old people in general.

Old people were also denied GP visits in care homes and were not sent to hospitals for serious conditions. They were also forced into having Do Not Resuscitate orders. Essentially, old people were left for dead.

Tens of thousands of old people died unnecessarily.

**LIE: There is no safety in natural herd immunity (community immunity)**

Government advisors denied herd/community immunity and said that only vaccines would set people free. The modellers that drove lockdown policies also ignored various aspects of immunology (e.g. prior immunity, seasonality etc.). Virologists, immunologists and other scientists were aghast at this denial of basic immunology.

Empirical data is now in and it proves what we already knew that

- There was already prior immunity in many parts of the population. The immune system recognised Covid as similar to a previously encountered virus and killed it off.
- T-cell immunity was very important in defeating Covid and had memory.
- Herd immunity always arises at some point in the infection whereby the virus becomes endemic in the population but is not a serious threat. Different epidemiologists stated that herd immunity was attained at different times, but the latest date was Mid-April 2021. Therefore no need for panic, restrictions or vaccines. Lockdowns hindered getting to community immunity.

**LIE: We are all in this together**

Whenever a politician says this you know that he is lying through his teeth.

The government has set up an apartheid system within Britain. The well-off are having a great time. They can collect furlough money for their staff and live in luxury in their big gardens and swimming pools. The globalist corporations, such as Amazon, have made billions out of the lockdown. Rich people like Piers Morgan, managed to get a holiday in Antigua around Christmas time, despite everybody being told not to travel. I have heard that even in lockdown rich people are travelling privately all over the world. Prince Harry seems to be able to fly whenever he wants without quarantine.

The employed middle class have done well also. I know executives that have thrived in this period. Such folk do not have to commute to the office any longer. They also have no expenses paying for coffees and lunches, so overall they are making more money than before. They can plan their zoom conferences to suit them and can go for walks in the countryside between meetings.

Those on furlough payments, such as telephone operators, are also doing well working from home and what they save from no commuting and other expenses more than makes up for the loss of 20% of their wages.

But poor people are being devastated. Poor people living in cramped conditions, such as a family in a flat in Tower Hamlets, are in a living hell they cannot escape from. Losing 20% of your money when on a very low wage is critical. Many have had to face either paying for heat in winter or food.

But there are people that cannot get furlough payments at all. These are in dire straits.

Many entertainers of all sorts have simply lost all their earnings. This includes: comedians, actors, ballet dancers, stage performers, musicians and bands of all sorts, opera singers and so on.

Worst of all are the small businesses that have been decimated. Already 11,000 high street shops have closed and a further 18,000 shop bankruptcies are expected in due course. People that have worked for many years to establish a decent thriving small business have seen it smashed by government policies. Over 800,000 people have lost their jobs; more will follow once furlough payments cease.

Make no mistake, the rich are doing well in these lockdowns, but the poor are suffering greatly. This is why poor people are ending up as statistics for: suicides, self-harm, food disorders, or suffering from anxiety, depression, bi-polar, and drug overdoses. Domestic abuse has also gone through the roof.

#### *The government factionalised society*

Far from uniting the country the government sharply emphasised the divide between certain types of people.

<b>Those with a positive experience</b>	<b>Those with a negative experience</b>
The rich.	The poor.
The affluent middle class.	The less well off.
Those possessing computers.	Those without computers.
Those living in big homes with gardens.	Those living in cramped or overcrowded conditions.
Those living in affluent rural areas with local green spaces.	Those living in inner cities and urban sprawls.
Those whose jobs were secure and well paid (e.g. politicians, civil servants, town councillors).	Those whose jobs were terminated.
Large business owners, especially with globalist connections.	Small and medium sized businesses.
Essential workers.	The entertainment industry, the hospitality industry, the arts.

The shock effects of this divide on society will be profound and will last for many years. No one is really studying the depth of this chasm between those who suffered and those who prospered during lockdowns.

## **LIE: We are following the science**

Absolute rubbish.

Firstly, as CS Lewis observed, governments should never be dominated by experts in any field. By their very nature, scientists are narrow-minded, being focused upon their speciality; but governments have to consider all aspects of public health and the economy.

Winston Churchill had the correct attitude towards scientists: have them '*on tap but not on top*'.

Secondly, why was the previous pandemic plan ditched? Experts spent years putting together a plan to deal with a real pandemic and this did not involve locking down society. In fact, it was similar in form to the Great Barrington Declaration (which the media smeared). So, Britain had a long-standing reasonable plan; yet in March 2020 this was thrown away and the nation began to be ruled by Whitty and Vallance.

There is no consensus on the science behind all the restrictive public policy reactions to Covid; though there is greater weight of scientists opposing government policies. Science is never driven by consensus anyway but by observable, repeated data – and historically that has often followed the trail of maverick pioneers who went against the grain. Often the establishment science of the day was utterly wrong.

To follow the science there must be comprehensive debate. The government ruined this by shutting down all the opposition to government advisors and smearing them. This is anti-science.

In almost every decision Boris made, the real science was the opposite of what he chose to do.

<b>Government policy</b>	<b>Actual science</b>
Facemasks mandated for public health.	Facemasks do nothing to stop viral transmission but do immense harm to wearers.
Social distancing protects you from infection.	Viruses travel many metres once breathed out as aerosols.
Lockdowns are necessary to hinder viral infections.	Lockdowns have no effect whatsoever on stopping a viral epidemic.
Vaccinations are the means of protecting society.	Most people need no protection from a virus that barely affects them. However, the Covid vaccines are experimental, untested, unauthorised and are killing people.
In the first lockdown there was no border control and no quarantine of people from infected areas.	This should have been properly controlled.
Schools were closed.	There was no point in this. Kids are not affected by Covid and do not transmit it to teachers.
Sick patients were dumped from hospitals into care homes.	This guaranteed a genocide of the frail elderly (the most at-risk group).
PCR tests work and mass testing is necessary.	None of the tests work and mass testing achieves nothing but driving up false case figures.
Quarantine of travellers must be done in dedicated, policed detention hotels at personal cost.	This achieves nothing that could not be done by quarantining at home but does put travellers into closer association with strangers and increases the possibility of infection.

This proves that Boris did not follow the science but followed draconian policies set by his lords and masters.

### **LIE: The Covid vaccines are 100% safe and are authorised**

This is a barefaced lie.

The vaccines are officially not safe and have not received a licence. They are temporarily allowed as an emergency measure; they have not been properly authorised at all. The FDA in America has refused to authorise the vaccines as they have not completed their trials and are experimental.

The vaccines are not safe for a number of reasons.

- No vaccine is ever 100% safe. In America, if the death rate from it is under 50% it is accounted as safe for medical use.
- The Covid vaccines have not been fully tested in the normal safety programme. The testing programme continues for some years (earliest end date is 2023) and so not one of them has been through all the normal safety trials.
- The testing programme thus far has been far from satisfactory with little evidence of the vaccine even being any use. Many vaccine subjects in the testing died.
- Vaccines take many years, even decades, to develop. These vaccines have been manufactured in a few months. This should raise all sorts of alarms.
- Some of the vaccines (e.g. Pfizer and Moderna) are experimental, being mRNA vaccines. These change the body's DNA so that the body makes its own vaccines and stimulates an immune response to a virus. No one knows what the full effects of changing human DNA will be – and this cannot be undone. Vaccinated people are human guinea pigs but are uninformed. The Astra-Zeneca vaccine also changes the immune system but in a different manner.

*Why do we need a vaccine at all?*

- Covid has a 99%+ survival rate.
- Healthy people shake it off easily.
- Young people are at no perceivable risk.
- Even people under 70 are not at serious risk of death.
- There are already several treatments that are successful: the HCQ cocktail, Ivermectin, Vitamins D and C, budesonide and others.
- The risk from Covid is not as great as the risks from the vaccines.

The only reason is that only vaccines make lots of money for Big Pharma.

### **LIE: The government did not know that there would be severe side effects from the vaccines**

Yes they did.

The MHRA tendered a contract for a new AI system to process the expected flood of vaccine injuries,<sup>22</sup> which it described as a '*direct threat to patient life*'. It says, '*The MHRA<sup>23</sup> urgently seek an Artificial Intelligence (AI) software tool to process the expected high volume of Covid 19 vaccine Adverse Drug Reaction (ADRs) and ensure that no details from the ADRs' reaction text are missed.*' The agency expects that the flood of victims will overwhelm its

<sup>22</sup> Titled: 'Supplies – 506291-2020' on Tenders Electronic Daily, posted 19 October.

<sup>23</sup> Medicines & Healthcare Products Regulatory Agency.

current ‘*legacy systems*’ and pose a ‘*threat to patient life and public health*’. A £1.5 million contract was issued to Genpac UK to augment the MHRA Yellow Card monitoring system in November 2020.

This proves that behind the broadcast lies by the government, even its own officers are admitting that the vaccine will injure and kill so many people that its systems will not be able to cope.

There are now scores of thousands of adverse reactions that include: death, heart attack, blindness, paralysis, blood disorders, seizures, deafness, anaphylactic shock, lung damage, sepsis and many more. This is despite the reporting system being labyrinthine and rarely used. Many doctors don’t know anything about it. Some hospital trusts are warning medics not to report adverse events. Scientific studies in the past have declared that only 1% of vaccine adverse reactions are ever reported. This would mean that the current real adverse events are in the hundreds of thousands and the deaths in the thousands. In America there are already over 3,000 reported vaccine related deaths filed in the VAERS system (equivalent of the UK Yellow Card).

### **LIE: There are no moving goalposts**

Even supine MPs in Parliament have complained that the government keeps changing the goalposts on lockdown conditions and ending.<sup>24</sup>

<b>Stated goal</b>	<b>What actually happened</b>
You don’t need to wear a facemask. (Advice in Spring 2020.)	Masks were mandated soon afterwards.
Social distancing is voluntary.	Social distancing became mandatory and strictly controlled. Covid marshals patrolled this.
Lockdown is unnecessary, you just need to wash your hands.	Lockdowns imposed.
Lockdown was necessary for three weeks to ‘flatten the curve’. (Boris Johnson)	Lockdowns are still in place to some degree over one year later and are being threatened for the autumn.
‘The vaccine is our route back to normal.’ (Matt Hancock)	After a more successful vaccine roll out than anticipated, the vaccine has not opened society up back to normal. Boris Johnson even stated that the falling infections were not due to the vaccine but to the lockdowns.
Vaccination of the over-70s will allow us to return to normal.	It didn’t.
Vaccination of the over-60s will allow us to return to normal.	It didn’t.
All nine vulnerable groups must be vaccinated.	No normal yet.
‘Regular testing is our route back to normal.’ (Matt Hancock)	Testing achieves nothing at all because the results are useless. Kids testing false positive ensures more quarantine not freedom.
Vaccine passports will not be brought in.	They were brought in for certain events and the government is planning to extend this.
Freedom begins with the opening of pub gardens with masks and social distancing.	Only 20% of pubs opened and these faced making a loss (probably 20% of normal takings). Spontaneous gatherings of people in pub grounds were then broken up by the police. Most people couldn’t get into

<sup>24</sup> Report by the cross-party Commons public administration and constitutional affairs committee.

	a pub garden as they were heavily pre-booked.

Why the moving goalposts? The real reason for government policies is not medical or public health, it is to introduce diktatorial totalitarian control over the whole population as part of a larger plan for world domination by elite people, which includes constant surveillance. Excuses are being repeatedly found to continue restrictive policies of social control.

Under this heading we can also consider the sheer contradictions of government policy. The list is long but it includes:

- Churches were closed in lockdown but brothels were open.
- People were restricted to groups of six, but supermarkets were not. Is the virus inactive in a supermarket by some miracle?
- Facemasks were required universally but MPs did not wear them in the Commons.
- People cannot sing (thus churches and music venues were closed) but MPs could shout at each other in the Commons.
- Social distancing was enforced by the police who were not social distancing. Dissenters were arrested and placed in police cars in close confinement with two police officers in a car and more in a police station.
- The sack race was forbidden in schools but the egg and spoon race was allowed.
- Facemasks were not required in the height of the epidemic in March / April 2020 but were mandated when the epidemic had passed its peak in the summer.
- The vaccine rollout would open up society. The rollout was successful but society was not opened up.

#### **LIE: society will be opened up in June 2021**

We knew that the government would find some way to continue some sort of restrictions and renew lockdowns in the autumn, and already hundreds of planned events for the summer are being cancelled. The reason is that insurance companies will not insure any event when the government will not confirm support.

Thus music festivals, celebrations (like Brighton Pride march), music tours and theatre productions are already being cancelled. In addition the government is blacklisting certain countries that you can travel to.

This is all to ensure that the old normal is not allowed to return.

#### **LIE: The new Covid strains are a terrible threat**

All viruses follow a similar path. They start as a more serious disease but gradually mutate into weaker and weaker strains. This is because viruses are essentially parasites. If they kill their host then they also die. So, viruses adapt and become weaker to remain in the host body.

There may well be mutated dangerous strains as a direct result of the vaccines in the next flu season (see later) but wild viruses always mutate to become less harmful to the host in order to survive. They may become more infectious (as the Kent strain) but almost always with weaker symptoms. Viruses that kill their host will also die out.

By the time that Covid reached Britain it had already mutated several times. By mid 2020 it had mutated into over a thousand strains. One doctor stated that it mutates every ten hours. This was to be expected. Thus the various strains that were identified (Kent variant,

Brazilian variant, South African variant) may have been more infectious (most are not) but were not more lethal. These never posed any serious threat to the country. Variants such as the South African and Brazilian strains were hyped up but data showed that they were nothing to be afraid of.

Texas ceased all lockdowns and restrictions in spring 2021 and had a high proliferation of the Kent variant, yet infections and casualties figures collapsed. Other states that continued enforced lockdown (such as Michigan) saw infections increase.

Recent studies have shown, for example, that B.1.1.7 is 35% more transmissible but did not cause more severe symptoms.

**Lie: You are in great danger from the Indian variant.**

The current scaremongering features the Indian variant, which is said to be deadly.

Remember that variants generally mutate to become less serious. In fact, variants are 99.7% identical to the original, which means that the immune system recognises them easily and kills them off.

Again data shows that this is all hyped up and of no significance. 25-27,000 people die every day ordinarily in India and their Covid figures are not extreme per million of the population (126 deaths per day, far less than Britain at its peak). On this measure, Britain did far worse so why the extreme fear? By the end of April 2021 India featured 119th in the scale of global Covid deaths. But Indian Covid deaths are being conflated with other causes of death just as in Britain. More people die every day in India from diarrhoea. The current focus on Covid is actually taking resources away from things like sanitation projects that could bring the death toll down.

A piece of interesting data is that graphs show that Covid deaths began to plummet as soon as Ivermectin was introduced to treat it. However, as soon as the vaccine rollout was ramped up, Covid deaths shot through the roof.

There is also a political agenda going on here.

Indian, and particularly Sikh, whistleblowers are explaining that there is a power grab underway regarding the staple food supply (chiefly wheat and rice). The premier seeks to create a Hindu state instead of the current federal system of various groups.<sup>25</sup> He has teamed up with Bill Gates (who is capturing farmland in America) to privatise the food supply, store it in food banks and create a famine. This was previously done in India in the two world wars so Indian governments have form. He wants to starve the sections of the population he doesn't like. The evil ancient caste system is being politicised.

Already millions of poor people and migrant workers have died in India due to the lockdowns.<sup>26</sup> People are being refused medical treatment or entry to hospitals. Essential services are being denied to the poor. Millions are dying of starvation due to lockdowns. This is what is creating a medical emergency, not Covid. The deaths are mostly among the lower caste people. The hospital crisis has been created by the government. There are empty beds but poor people are being turned away. It also created the oxygen shortage.

---

<sup>25</sup> Hindus, Muslims, Sikhs, Jains, Tamils, Christians, Buddhists, Parsees, etc.

<sup>26</sup> Though there was no national lockdown, many states and most cities either enforced total lockdown or imposed strict restrictions. In some places, food shops are only open for one hour a day. Inter-state and inter-district travel is banned. There are fines for not wearing masks.

More shockingly, videos have emerged showing doctors and hospital workers actually killing patients by force, such as by strangling or crushing under a knee. Relatives are posting pleas for help claiming that victims are being murdered in hospitals. Cruelty to lower castes is endemic in India.

In addition there is a terrible air pollution problem, especially in the big cities like Delhi and this always enables respiratory disease to flourish. Delhi has often been forced to close down because of pollution. Respiratory infections are always among the top ten killers in India. The wealthier people even go to 'oxygen bars' to get a 15 minute shot of oxygen in bad times of pollution. Rural poor people travel to big cities like Delhi in times of pollution in order to get hospital treatment and this is what puts pressure on the health services at this time of year.

On top of all this, the media has utterly lied about what is going on, to the extent of broadcasting images of overwhelmed hospitals and people dying on the streets that originate in the gas emergency of several years ago. Even the media's images are fake.

All of this is being merged together to create a supposed Covid emergency due to a particular strain that we should be scared of and which may give the excuse for another lockdown (they will find one or another excuse).

**LIE: There won't be vaccine passports**

An utter lie, now made obvious as they are being rolled out. The preparation for these was underway when this was first spoken and was planned for decades ago.

Vaccine passports are pointless for any public health reason. Here's why.

- If you are young you are virtually immune to Covid and don't need a vaccine or a vaccine passport.
- If you are vaccinated the government says that you are safe from Covid (you are not). So you have nothing to fear from other people and do not need to know their medical status.
- Vaccinated people can still pass Covid on to others. So knowing who has been vaccinated offers no protection to anyone.
- A vaccine passport offers no protection to anyone.

So why the need for a vaccine passport?

They enable total control over everybody on Earth that has one.

The passport will be a digital ID card with an editable health status marker. Whoever controls the database and the algorithm has the power to permit or forbid any individual from operating in society. This starts with who can travel abroad, then who can go to a night club, and later who can buy food – even from a computer.

Already Israel requires a vaccine passport to enter a sporting event or a museum.

Vaccine passports allow for all dissidents to be crushed by starving them.

**LIE: We can be trusted with the public purse**

Pull the other one!

This government has wasted more public finances than any other government in living memory. Its handling of the exchequer has been catastrophic.

It is difficult to identify the full costs of policies because they are ongoing and there are not complete studies available. However, we can mention the following costs up to 22 September 2020:<sup>27</sup>

- The UK economy had the biggest shock for 300 years.
- The cost of borrowing for 2020/21 alone is about £317.4 billion above the government's plans.
- 64.5% (£139.5 bn) of the £192.3 billion cost of government policy decisions is support to private businesses. More would be forthcoming (at least £38.3 billion in autumn 2020).
- Current day-to-day running costs of government departments is £600 million more than normal.
- Government department's budgets have risen by £76 billion.
- By September 2020 the government spent more than £181 billion more than it forecast in March.
- Additional spending on public services (PPE, ventilators, testing) was £52.8 billion. None of these were necessary.
- £37 billion was wasted on PCR testing. [A complete waste of money.]
- Millions were spent on the Nightingale tent hospitals that were not used.
- Cost of transfers to domestic households (employment support etc.) is £83.7 billion.
- More than a million people applied for Universal Credit in the first three weeks of lockdown. On one day the DWP received 2.2 million calls. By July 2020 the claimant count reached 2.7 million, an increase of 116.8%. Welfare spending in 2020 was expected to be £24.5 billion higher than projected in March.
- In June and July 2020 alone the cabinet spent £66 million on advertising campaigns.
- In March 2020 alone HMRC spent £18.9 million on internet schemes and web hosting. Monthly spending on web hosting services averages £12.4 million.
- Between March and September 2020 the cabinet spent £109 million on consultancy contracts.
- Tax levels have fallen to their lowest levels since 2012 and are set to fall even further. [In short, massive more spending with lower income.]
- During the first lockdown the Dept of Transport took the opportunity to remove one lane of traffic and create another cycle lane in most towns, This caused absolute chaos (who knew) and led to ambulances being stuck in traffic jams. In recent months, after less than a year, these lanes were all removed. At what cost? Whose stupid head should roll?

Since the Covid pandemic is a manufactured fake crisis, this spending has all been thrown down the toilet. This is the worst government in history for wasting public funds.

In short this government:

- Is diktatorial.
- Has created a totalitarian state.
- Has killed many people needlessly through its policies.
- Created a virtual genocide of old people in care homes.
- Has set up the NHS to completely collapse in the coming years through a tidal wave of demand for postponed services (current waiting lists stand at 4.7 million).
- Has created the conditions to multiply serious medical problems, such as depression, anxiety, self-harm, suicide, etc. The worst of these conditions affect young people.
- Has ruined the education of a generation of children.

---

<sup>27</sup> See Institute for Government, 'The cost of Covid-19'.

- Has created a new divide in society between the rich and the poor (those who prosper in lockdowns and those who can't).
- Has wasted scores of billions of public money.
- Has lied throughout the crisis over and over again.
- Has used military behavioural science to programme the public.
- Continually spent public money on advertising campaigns.
- Fed a stream of lying propaganda through the mainstream media.
- Has shut down and censored all opposing commentary, even from the most qualified global scientists.

### **Lie: There is no government corruption**

Enquiries are being called for over a large number of contracts issued by ministers, such as Matt Hancock allegedly, to friends, colleagues and relatives; often without a tendering process. Many millions has changed hands and been given to pals.

Billions were wasted on things that good scientists said were useless, such as PCR tests, facemasks and mass testing, even in schools. Enquiries need to discover who benefited.

Public health policy has been directed towards the vaccine rollout; this is now clear. Those involved (including Whitty, Hancock, Vallance) have direct contacts or vested interests in vaccine manufacturers and Bill Gates.

Ministers were frequently seen to be ignoring their own rules, such as drinking in a bar after curfew, ignoring social distancing, or not wearing a facemask.

Summary of government lies	
Lie	Truth
We are in a pandemic.	It has been two bad flu seasons combined.
We are in an emergency.	2020 excess deaths are fewer than most years before 2009.
Covid-19 is just like the Spanish Flu pandemic.	No comparison.
Covid-19 is a virulent disease based on the SARS-Cov-2 novel coronavirus.	No one has proved this to exist. Covid is not virulent; over 99% of people survive. Many diseases are far worse killers.
Over 120,000 people died from Covid-19 in the worst year for deaths for a century.	NO! Many in this number died from something else.
Asymptomatic people spread Covid.	No they don't.
You can catch it from surfaces.	No you can't.
Facemasks protect people from Covid infection.	Viruses go straight through them.
PCR tests are the gold standard of identifying Covid.	PCR tests prove nothing at all, except that you may have some viral fragments of a live or dead virus, such as a cold.
Social distancing is effective against virus infection.	No it isn't. Airborne viruses can travel 30 metres.
Lockdowns help stop the Covid infection.	No they make public health worse.
The NHS needed protecting.	Hospitals were empty most of the time or less busy than normal.
The government cared about care homes and wanted to protect the elderly.	It killed of the elderly needlessly.
There is no safety in natural herd immunity (community immunity).	Of course there is. This is basic virology.
We are all in this together.	The rich did well, the poor were devastated, the

	middle class lost their businesses.
We are following the science.	The best scientists are opposed to government policy.
The Covid vaccines are 100% safe and are authorised.	They are not safe, not tested and not formally authorised or licensed.
The government did not know that there would be severe side effects from the vaccine.	The MHRA knew and prepared for it.
There are no moving goalposts.	There has been nothing but moving goalposts.
Society will be opened up in June.	Most venues will be closed and most celebrations (e.g. festivals) are being cancelled.
The new Covid strains are a terrible threat.	Viruses mutate into less dangerous strains.
You are in great danger from the Indian variant.	The effects of this have been exaggerated and conflated with other issues for political reasons.
There won't be vaccine passports.	They were already being planned and prepared for when this lie was uttered.
We can be trusted with the public purse.	The government has wasted many billions. The economy is in its worst state for 300 years.
There is no government corruption.	There is already evidence of significant corruption but more enquiries are necessary.

## Methods used by the government to enforce totalitarianism

We have seen a Conservative government turn into a fascist state working more like Soviet Communism than a Parliamentary democracy.

### **Rule by diktat**

Many of the regulations brutally enforced by the now fully corrupt police services were not originally ratified as statutes by parliamentary debate and vote. [See previous papers.]

Some of these are recommendation but not laws. Yet the police enforce them harshly.

Some rules were demanded before parliament debated them formally.

Many of the rules enacted are illegal. They contravene the British Constitution, and particularly the freedoms gained by the Magna Carta and the 1689 Bill of Rights. The liberties of Common law go back to before Magna Carta and supersede Parliament itself. They have prior standing over whatever Parliament may decide. Thus if a parliamentary law contradicts Common Law, it is Common Law that prevails.

Common Law affirms essential freedoms: freedom of speech; freedom of movement; free assembly; freedom of worship; habeas corpus and so on. This means that all lockdowns and social restrictions are illegal.

### **Use of psychologically loaded words**

#### *Furlough*

Not commonly used before the Covid nonsense. The word in modern usage derives from prisons and the allowance of a prisoner to have time away from prison before returning to imprisonment. [It originally meant a leave of absence, especially that granted to a member of the services or a missionary.]

Clearly, the message is that the population is in prison and the government is allowing some sort of relief here and there.

#### *Coronavirus*

The government used the mantra of 'coronavirus' constantly in this crisis. This was to make the population scared of something they didn't know they came into contact with all the time. Colds are a coronavirus and no one is scared of them. By using this term they changed something normally accepted as run of the mill into something frightening.

#### *Build back better*

This is Boris Johnson's way of affirming the 'Great Reset' of the World Economic Forum, one of the planners of this crisis. In saying this he shows his committal to the global elite's programme for world domination. Johnson is merely a pawn being told what to do by bankers and globalists. [In Britain's case this is domination by the bankers in the City of London dominated by the Rothschilds.]

The global elite plans to change the world forever in multiple ways through Covid. This has been planned for decades and is now being pushed through. The Great Reset in but one aspect of this, being Klaus Schwab's dystopian dream. But the UN's sustainability programme revealed in Agenda 2021 and 2030 is part of the same game changing scenario as is Rockefeller's 'Lock-Step' programme or Bill Gates' 'Event 201'. [See previous papers for details.]

### *Deployment*

A term usually associated with the movement of military forces, this has been a favourite word used by the government to describe people in care homes, hospitals and such like. It enforces the idea that we are in some military command structure under authoritarian control.

### **Deliberate fearmongering**

To better gain control over society, the government deliberately and maliciously adopted military behavioural psychology teams to generate fear in the population to produce compliance. This particularly utilised the mainstream media to push home terror to individuals; shame on the journalists who took part. [See later.]

### **Compliance testing**

This includes: demands for social distancing, self-quarantine, household isolation, the rule of six and use of facemasks (none of which have any medical value).

These were not introduced to stop a virus but to effect social compliance with stupid government diktats. It shows who are the supine conformists and who are the dissenters.

Through the use of fear, the government turned normal citizens into raving abusers of dissenters. It was common to see people abuse non-mask wearers or for the police to arrest them. People turned into oppressors so quickly. Stories emerged of old ladies thrown out of supermarkets or disabled people unable to wear a mask stopped from buying food and threatened. Children without a mask for medical reasons were thrown out of schools.

### **Rewards and prohibitions**

More insane decisions are explained by this psychological control over subjects. This includes giving subjects a small reward of something that is already theirs (to make people grateful to an oppressor) and yet still restricting the subject from other natural freedoms.

For example, Boris allowed people to go to a pub and drink under social distancing conditions in a beer garden but not drink inside. On 12 April the country went nuts in celebrations that they could get a pint in a freezing cold, even snowy, garden as if it were Christmas. Instead of demanding that they could go inside a pub like normal, they accepted the crumbs they were given.

But this made no sense. Non essential shops were opened where people mingle in very close circumstances; thousands poured into shopping malls. However, pub interiors and restaurants were still closed. Yet these interior settings have much better spacing control than a small shop. Why are they not fully open? Because its part of the social control; give a bit of freedom but not much and keep the restraint operating. Make the public compliant and grateful for small mercies.

### **Brutal police tactics**

In the Covid crisis the police completely lost their minds and became the Gestapo almost overnight.

Countless front doors have been smashed to pieces to illegally arrest someone for a minor infraction or even under false pretences.

I have listed examples of the stupidity and brutality of the police in previous papers. The British police forces no longer operate on the basis of consent but upon principles of fascism.

### **Covid marshals**

Covid marshals reared their ugly pretentious head in the 2020 lockdowns and have been re-commissioned by the government in the last few weeks.

These people, with no statutory or constitutional power, seek to find and threaten individuals considered to be flouting social distancing rules. These are equivalent to the Stasi in East Germany.

Victims of all this tend to be the weak, elderly, frail and disabled. Such as the 70-year old lady refused access to buy food from a supermarket; disabled people refused entry to a supermarket because they cannot wear a facemask; couples picnicking, an old lady sitting on a park bench, or old ladies peacefully demonstrating in an anti-lockdown demonstration and thrown into a police van.

It is shocking that the totalitarianism adopted by a Conservative government has targeted the poor, frail, elderly, weak, and the young – many of them core Tory voters.

### **Track and trace**

Testing, tracking and tracing policies are completely useless in stopping a virus; they do no good whatsoever. However, they are a perfect tool for achieving continual surveillance of the compliant population. Worse still these add more expense and work to businesses already collapsing due to government policies. Study after study has confirmed that government tracking systems are pointless (see previous papers) despite this costing £35 million at least.

New information just out shows that the system does not technically work anyway. Nearly half of people that should be contacted to isolate were not contacted. Other aspects of the data capture were shown to be illegal while Google and Apple affirmed that they breached formal guidelines.

What is the point of taking personal details of customers in a garden centre restaurant sharing the same air as everyone else, but not taking the details of customers just buying plants? Why does someone have to give details to buy a coffee in a café but not in close quarters buying items in a busy shop?

None of this makes any medical sense – but it does stack up if you are gathering a database to spy on people.

### **A warning**

Although this story applies to the Republic of Ireland, the components have all been applied in Britain.

The Irish Garda (police force) interrupted a Catholic church service and thrust the congregation out in an unconstitutional manner. A man filmed the whole scene and uploaded it to social media whereupon it received over a million views.

Shortly afterwards, at 3am, the man was awakened in his bed with three guards standing over him. They arrested him, according to them legally, based on an alleged complaint involving his own mother, who was actually deceased. He then asked about his children and was told that they had been taken away from him and placed into care.

If this does not shock you then nothing will.

## The fear agenda and its consequences<sup>28</sup>

Early on SAGE, SPI-B and the Behavioural Insights Team (Cabinet Office) decided that fear was a necessary component in controlling the masses.<sup>29</sup> They deliberately chose to use tactics straight from the Soviet Union, including research by Pavlov.<sup>30</sup> I have shown in earlier papers how this was an international set-pattern agenda, proved by leaked government documents from Germany. Fear, as Goebbels understood, is the prime way to so intimidate a nation that it willingly complies with draconian policies that would not otherwise be tolerated. How could a Conservative government adopt the psychological policies of fascist Nazis and Soviet commissars?

That Soviet-style psychological conditioning would one day be applied in the west to coerce populations was warned by many Russian dissidents decades ago, including: Alexander Solzhenitsyn, Yuri Bezmenov, Anatoliy Golitsyn and Vladimir Bukovsky. No one paid attention. The brainwashing mostly involves the use of fear.

What this fear does is to temporarily change the mental state of the afflicted person so that the character is changed. Various aspects of the persona are altered and this leads to irrational behaviour, a by-product of which is compliance with criminalised authority.

Evidence of this irrational behaviour is seen everyday; such as: people wearing a facemask when alone in a car; people eating through a facemask; people abusing other citizens for non-compliance (even if they have good reason); police smashing down doors illegally to enforce supposed non-compliance, etc. This is evidence of insanity, or at least irrationality.

When this is continued by governments there is great danger of inflicting mass permanent mental health damage.

### **Applied behavioural psychology (Psy-ops)**

The British government has been using military applied psychology to brainwash the British people in the same way that the Soviet Union brainwashed dissenters. Is it a coincidence that a chief member of SPI-B, Professor Susan Mitchie, is a member of the Communist Party?

Brainwashing involves psychological subversion to create standardised human behaviour by training thought processes. This can create population compliance to totalitarian government control. The specific tool used by the government has been irrational fear of Covid-19. This is done by elevating the supposed risk and showing constant distressing images of what happens if you don't comply. A side issue is that it also makes people fearful of each other and aggressive to dissidents. Through fear, people become willing slaves of the propaganda messages. The fear also has to involve a sense of hope and reward (like Pavlov's dogs). Thus the vaccine will set you free and enable you to go on holiday or you can have a beer in a pub garden when the government says so.

The conditioning messages use slogans to hammer home ideas, such as 'Protect the NHS, save lives', 'Stay at home, save lives', 'flatten the curve', 'don't kill granny', 'Control the

---

<sup>28</sup> I acknowledge a partial debt here to articles by Dr Bruce Scott.

<sup>29</sup> See the government document SAGE, SPI-B, 'Options for increasing adherence to social distancing measures', SAGE #18, 22 March 2020.

<sup>30</sup> Ivan (Petrovich) Pavlov [1849–1936] was a Russian physiologist. He was awarded a Nobel Prize in 1904 for his work on digestion, but is best known for his studies on the conditioned reflex, psychological manipulation and control. Best known for his experiments with dogs (Pavlov's dogs).

virus', 'hands, face, space', 'act like you have the virus', 'build back better'. Logic goes out of the window and people believe lies that are constantly repeated. How can anyone believe that a sub-microscopic virus is hindered by a bit of cloth or by six feet distance?

The propaganda messaging destroys critical judgment and limits thinking. Logic is replaced with a specific message developing unreal thoughts and stereotypes. This is what turns people mentally sick; the conditioning damages the personality.

This is why censorship has been so important and widespread in the last year. Opposing voices to the government's message, no matter how qualified and truthful, have to be squashed. So one of the most esteemed epidemiologists in the world, Oxford Professor Sunetra Gupta, gets vilified and smeared constantly for telling the truth, but the liars in SAGE are believed by everyone.

This is because the media has been completely controlled by the government to adhere to one uniform message with no dissent allowed. The masses hear nothing else. The government prepares the propaganda message, the media then spouts nothing but the message. Anyone with a different message is viciously spurned as: deluded, a Covid-denier, an anti-vaxxer, a conspiracy theorist, a Covidiot, a far right nutjob, etc. The media cannot argue the case with a dissenter but simply uses pejorative language. (Note how Keir Starmer did this with the pub landlord Rod Humphris). The reason the mainstream media is doing this is because their profit-base is collapsing and millions from the government is keeping them afloat.

### **Propaganda spend**

In the last year the UK government has officially spent £184 million on media advertising which can properly be called propaganda. It has continually spread terror through every avenue available so that the public is swamped with fearmongering everywhere they go. It even paid for messaging in social media platforms, which masquerade as ordinary social media individual posts.

I have previously shown some of the government departments in this propaganda onslaught, such as the Dept. for Digital Culture, Media and Sport, 77 Brigade, and 13th Signals.

In addition to this there has been unofficial spend and now we see £320 million being allocated for the next year (see later). When Covid has become endemic and cases are evaporating, why is nearly twice as much necessary on government fearmongering than last year?

### **Examples of behavioural psychology tactics**

- Fearmongering.
- Creating illusions.
- Alienation.
- Creating dependency.
- Fear, punishment, reward.
- Confusion.
- Coercion.
- Social disapproval.
- Censorship.
- Shame.
- Rage against dissent.

- Creating a sense of superiority.
- Victim-enemy-scapegoat cycle.
- Self-justification.
- Projection of hostile motives coming from external sources.

The tactics used by the government contradict the ethical standards of the British Psychological Society. One serious problem noted by psychologists is that once you have turned on excess amounts of fear, you cannot easily turn them off within people. The government has been committing psychological abuse on a mass scale.

### **The mental health time-bomb**

Many mental health charities, and particularly a new one called 'Recovery', are warning the government of what is being called '*a mental health pandemic*'.

The massive scale of government scaremongering has been a daily drip-feed of negativity, coupled with isolation repression (lockdowns) and other social restrictions. The net sum of all this is severe damage to the mental health of people that cannot cope with it, or whose circumstances allow no alternative escape from government tactics.

Very many people are saying that they have come close to a nervous breakdown, were it not for this or that. Podcasts and web-blogs of like-minded people have been a boon to help stop some folk going mad. Others get their support from family, a spacious environment, horse-riding or local parks but those in cramped urban conditions are trapped.

I have previously explained the huge rise in all sorts of mental health crises: suicide rates (stats have not yet caught up with this), self-harm, drug abuse, food disorders, various forms of abuse, alcoholism (which has gone through the roof), Tourette syndrome in kids, and so on. Recovery is seriously concerned that there is a massive scale of mental health damage that is yet to be collated and understood which is going to cause severe social problems.

But we also know that mental stress and anxiety is the cause of a myriad of other physiological health problems. The greater the pressure on mental health, the more the person develops illness, and particularly heart issues, hypertension and cancer. The stress imposed on carers also causes immense damage.

The government is directly to blame for this impending health crisis.

## The vaccine rollout

### Reasons for the vaccine

Remember that the vaccine is unnecessary since most people survive Covid-19 well, children are hardly affected and there are multiple existing, cheap medications that prevent serious symptoms.

It is more and more clear that the whole purpose of the Covid scare was to get the population to take up an experimental, untested vaccine. You can discuss why and what is in it for weeks, but we will store a detailed analysis of that for now.<sup>31</sup> Possible reasons for it are:

- The people in control (Hancock, Whitty, Vallance and others) stand to make millions through their commercial connections to Big Pharma. This is a certainty.
- The real purpose is totalitarian state control. Vaccine passports ensure complete fascistic control of a subjected population. Biomarkers in vaccines ensure total state surveillance. This is an undeniable stated purpose of the elite.
- A means of eugenic population reduction. This is implied in the nature of the vaccine contents and is also an elite goal.

I have fully discussed these issues in previous papers.

### The vaccines don't even protect you

The vaccine companies have stated that, while the most severe symptoms should be reduced, the vaccine does not stop you catching Covid and neither does it stop you infecting others. So what's the point. Most people are already guaranteed of mild or no symptoms and 99.9% of people survive it. The purpose has to be something else.

The trials, and subsequent experience, also showed that the immune system is so suppressed by the vaccine that for two to three weeks, your chances of catching Covid are increased significantly.

In recent data analysis in America 60% of people recently infected with Covid were vaccinated. More and more studies are emerging showing that the temporary disruption to leucocytes in the days and weeks after vaccination causes a spike in Covid infections. I warned about this before the vaccine rollout. One study cited, '*an abundance of patients admitted to hospital within seven days of vaccination*'.<sup>32</sup>

### How mRNA vaccines work

Most people (including doctors) think that the vaccine implants a weak form of the virus so that the body overcomes it and primes the immune system to fight a higher viral load, thus stopping you succumb to illness when you encounter the wild virus. **THIS IS NOT TRUE; THIS IS NOT WHAT HAPPENS AT ALL.**

These vaccines actually convert DNA into working proteins, a process called 'decoding of instructions' for making proteins which involves mRNA transcriptions.

---

<sup>31</sup> See my paper, 'Do not take the Covid vaccine'.

<sup>32</sup> ISARIC4C (Coronavirus clinical characterisation consortium), Conor Egan, et. al., 'Hospital vaccinate patients during the second wave, update 21 April '21'. Clare Craig, in the BMJ explains this drop in white blood cells after vaccination as the cause. BMJ 2021; 372:n783.

Each cell has encoded protein molecules that help the body to metabolise nutrients; they are life enhancing chemical reactions converting food into energy and eliminating metabolic waste; mRNA vaccines manipulate this process and take it over.

The vaccines change the information in the DNA in a process called transcription. The genetic code is changed, creating a new template for the chain of amino acids that form proteins. The vaccine mRNA changes cellular function.

The mRNA changes the cell function to create the spike protein of the virus, the thing that causes damage, to make immune cells fight it. In a sense, vaccinated people become vaccine factories. They create mutated proteins (prions)<sup>33</sup> that replicate like cancer uncontrollably. This can be passed on to the next generation. The genetic code in mRNA is a blueprint to create protein and prion synthesis.

Dr Richard Fleming (a cardiologist) has already warned that the vaccines can cause mad cow disease by instructing cells to produce the spike protein without control of how many or how fast they are created. In animal models tested subjects developed spongiform cells (mad cow disease) two weeks after injection. These spongiforms cause neurological disease and dementia.

### **The vaccines are useless and/or dangerous**

German microbiologist Sucharit Bhakdi explained how the vaccines affect the body at the cellular level and that they will cause a global catastrophe.<sup>34</sup> To summarise his points:

- The vaccines cannot do what the manufacturers say they can.
- It is impossible to prevent infection even after vaccination. Any antibodies the body may produce following vaccination would be too minuscule to do anything significant.
- SARS-Cov-2 is not a killer virus. Up to five people only will die of Covid for every 10,000 people infected. For a vaccine to be efficient, it has to guarantee that it will bring down that number – something impossible to do. No clinical trial could ever show this because it would take millions of tested people.
- It is impossible for people under 70 without pre-existing conditions to die of Covid. Why risk an untested vaccine that could kill (and has killed) such people? The manufacturers do not have sufficient data on the efficacy of the vaccines on older people with pre-existing conditions. Testing such folk would lead to many deaths. The claim that the vaccines are efficacious is a lie.
- Younger adults have stronger immune systems. The vaccine trains immune systems to attack the virus. This excites immune cells making them more aggressive once the wild virus enters the body. This can cause a cytokine storm with much worse symptoms than they would have normally had.

In summary, the vaccines are useless for younger adults because the antibodies produced are insignificant and useless for older adults due to lack of testing.

In addition the side effect of blood clots is very serious and potentially fatal. Bhakdi stated that this could lead to the decimation of the entire population.

Why are governments not listening to many scientists affirming this decimation?

---

<sup>33</sup> Prions are what caused CJD (mad cow disease).

<sup>34</sup> Interview in The New American.

### **The vaccines are an assault on people**

This is the biggest assault on human beings in world history. It will take years to see exactly how bad this will be but the best immunologists and some government departments are even now affirming a coming catastrophe.

#### *Government experts expect high death rate amongst the vaccinated*

The SPI-M<sup>35</sup> experts are already advising the government that there will be a third wave of Covid infections in the autumn and it will result in mass deaths and new lockdowns, but the deaths are amongst the vaccinated:

*The resurgence in both hospitalisations and deaths is dominated by those that have received two doses of the vaccine, comprising around 60% and 70% of the wave respectively.*<sup>36</sup>

*Most deaths and admissions in a post-Roadmap resurgence are in people who have received two vaccine doses.*<sup>37</sup>

This is being driven by computer modelling from Warwick University and Imperial College.

So the government agrees with me that the vaccines are going to cause mass death; at least 300 a day (vaccinated people account for 250). Fully vaccinated people will account for 60-70% of hospital admissions.

The blame for this new wave of crisis is going to be placed upon the unvaccinated and the young: *'The resurgence is a result of some people (mostly children) being ineligible for vaccination; others choosing not to receive the vaccine; and others being vaccinated but not perfectly protected.'*<sup>38</sup>

For these vaccinated deaths to occur, instead of amongst the unvaccinated, proves that the SPI-M group do not believe that the vaccines are of any use whatsoever.

#### *Virus shedding*

Many virologists and immunologists are warning that the vaccinated will become viral shedders in the next flu season, germinating harsher strains of the virus and passing it on to anyone around them. Viral shedding is a well-documented phenomenon, particularly noticeable with flu vaccines. The vaccinated become 'super-spreaders' to infect the unvaccinated, and nothing can stop this.

Pfizer's own report on its vaccine admits that both inhalation and skin contact with vaccinated people will transmit the toxic vaccine contents to the unvaccinated. The effects of this were said to include spontaneous abortions and reproductive problems even in the testing process.<sup>39</sup>

The Johns Hopkins University also confirmed that self-spreading vaccines spread through both vaccinated and unvaccinated populations by design. Vaccinated people become

<sup>36</sup> 'Summary of further modelling of easing of restrictions – Roadmap Step 2', Section 32.

<sup>37</sup> Ibid, Section 56.

<sup>38</sup> Ibid, Section 31.

<sup>39</sup> Pfizer, 'A phase 1.2.3, placebo-controlled, randomised observer-blind dose-finding study to evaluate the safety, tolerability, immunogenicity and efficacy of SARS-Cov-2 vaccine candidates against Covid-19 in healthy individuals', sections 8.3.5.1-3

super-spreaders. The paper extols this ability to vaccinated whole populations even amongst those who refuse a vaccine.<sup>40</sup>

Dr G Vanden Bossche, an esteemed virologist who used to work for vaccine manufacturers, issuing a stark warning that viral shedding and immune escape next season could be catastrophic and lead to mass deaths.<sup>41</sup> The vaccine will cause the virus to jump on to unvaccinated people. Prophylactic vaccines should not be used in a pandemic. It will make the virus increasingly infectious to the point where it gets out of control. *'We are talking about a very, very serious problem. ... We are turning this person into a potential asymptomatic carrier that sheds the virus. ... We are very close to vaccine resistance.'* The body's natural antibodies will lose out to the antigen specific antibody from the vaccine. We lose every protection against any kind of coronavirus. Antibodies won't work anymore and the immune system will be bypassed at a time when infectious variants will be everywhere.

### *Calls for cancellation*

As well as governments cancelling the Astra-Zeneca and Johnson and Johnson jabs, one French authority is calling to stop all of the vaccines being rolled out.

The Centre territorial d'information independante et d'Avis pharmaceutiques (CTIAP) published a report stating that none of the Covid vaccines are safe or effective because they were not properly clinically tested and were not properly authorised. They contain new and untried components, which should be considered as 'new active substances'. This decision was based upon data released by the European Medicines Agency.

Doctors for Covid Ethics sent a letter to the European Medical Agency chief executive Emer Cooke, copied to EU presidents, regarding the danger of the vaccines. They showed the serious consequences and ended, *'If you or your regulatory body does not immediately suspend its 'emergency' recommendation of potentially dangerous inadequately tested gene-based 'vaccines', while the matters which we have highlighted to you are properly investigated, we hereby put the EMA on notice of being complicit in medical experimentation, in violation of the Nuremberg Code, which hereby constitutes the commission of crimes against humanity.'*<sup>42</sup>

On 23 April 2021 molecular biologist and toxicologist Dr Janci Chunn Lindsay called for the CDC to immediately halt Covid vaccines citing fertility, blood clotting and immune escape concerns. She showed the committee that these vaccines are not safe. MIT senior scientist Dr Stephanie Seneff, an expert in protein synthesis, shared these concerns. She added that there were also problems with auto-immune disease.

Many other doctors around the world are calling for the vaccine rollout to be stopped but these get no media attention.

### *There are two prime aspects to the vaccine hazard*

#### THE IMMEDIATE EFFECT

The first is the immediate effect, which is not the elite's prime intention. These are the people who suffer and die after the initial vaccine rollout. Many of these die from anaphylactic shock due to the PEG used as a binder in the vaccine ingredients. Medics like Mike Yeadon warned that this would happen months ago. It is widespread now.

---

<sup>40</sup> ALT News, 'Self-spreading vaccines are no myth – its hard science Johns Hopkins confirmed them – Covid genocide is here', 1 May 2021.

<sup>41</sup> See YouTube video, Vejon Interviews, 'Mass vaccination in a pandemic – benefits versus risks'.

<sup>42</sup> See doctors4covidethics.

The adverse effects include death and multiple medical conditions including: heart attack, stroke, blood disorders, blindness, paralysis, deafness, seizures and so on. There have been hundreds of deaths and scores of thousands of physiological injuries reported on the MHRA Yellow Card system. Yet studies show that this is only 1% of the true figure. No one is doing anything to investigate these nor is the government halting the roll out. See my paper 'Do not take the Covid vaccine' for details on the adverse effects from official sources.

The US VAERS data currently shows nearly 4,000% increase in vaccine deaths so far this year. In 2020 82 people died after a vaccination but by May 2021 there have been 3,317 deaths from vaccination so far in 2021. When will people wake up. It's usually standard practice to terminate a vaccine if it kills up to 50 people.

The numbers are huge. In the first few weeks over 2,000 died in Scotland alone. Worldwide hundreds of thousands have been injured or killed – yet nothing is reported in the media. In America, 3,544 died and there were 12,619 serious injuries reported between 14 December 2020 and 23 April 2021. The most cited medical doctor at the US National Library of Medicine, Dr Peter McCullough, has warned that the vaccines are killing large numbers and should have been halted long ago.<sup>43</sup> In America between 25 to 50 deaths is enough to pull a vaccine from the market.<sup>44</sup> [He has also formulated a treatment protocol (sequenced oral multi-drug therapy) that has 85% success rate against Covid.]

The adverse reaction of blood clots has raised government attention in some countries, especially Europe, and many nations have stopped the Astra-Zeneca programme as a result. Some US states have halted the Johnson and Johnson rollout for the same reason. But this is only one side effect amongst dozens that are not being reported in the media.

Across the world many thousands have now died from the vaccines and hundreds of thousands damaged. What will it take to stop this madness. But this is only the beginning.

#### A STEALTH, DELAYED EFFECT: MASS DEATHS

The real purpose of the global elite is a stealth killing mechanism that kills in the next flu season and beyond. This is due to viral interference or enhanced antibody reaction or antibody dependent enhancement (there are various names). This is a well-known effect of vaccines, such as the flu vaccine. When the vaccinated immune system comes in contact with the wild virus or a similar virus in the next season, it causes an overreaction, a cytokine storm, that causes severe illness and often kills. Vaccinated people will get the very cytokine storm that they took the vaccine to avoid and many will die.

Dr Sherri Tenpenny has identified at least eight mechanisms in the vaccines that can cause death. The messenger RNA in the vaccines codes for the spike protein of the virus. The spike protein is also manipulated so that it can be patented (natural things cannot be patented). The body makes this spike protein to provoke the immune system against it. It causes permanent replication and cannot be turned off. The antibody to this spike protein is deadly. The spike protein antibody attacks the lung tissue and breaks it down. It inhibits your M2 macrophages (anti-inflammatory macrophages) causing death. It attacks two different types of cell in your brain. It attacks the inner mitochondrial membrane in two different mechanisms and the motor nerves. This is what caused many patients to have nerve damage like motor neurone disease. The antibody to the spike protein also attacks

---

<sup>43</sup> Interview with Alex Newman on the New American.

<sup>44</sup> The 2009 swine flu vaccine was pulled after 25 US deaths.

the pancreas, causing diabetes or making existing diabetes worse. It also causes autoimmune disease.

It takes between 19 to 48 weeks to see the most damage caused by this process; hence causing deaths in the next flu season next winter that can be blamed on a new variant. In fact the mRNA will cause mutants of the virus.

This is a perfectly designed kill machine.  
Dr Sherri Tenpenny.<sup>45</sup>

In April it was discovered by Dr Pavel Solopov<sup>46</sup> that the spike protein itself causes serious damage to the lungs. Remember that the mRNA vaccines are designed to change the human DNA to make the human cells create the spike protein to provoke the immune system. If the body creates a lot of spike protein this alone could lead to death.

This was later confirmed by the Salk Institute. It published an article<sup>47</sup> saying that the virus spike protein is what causes vascular damage in patients. It is such vascular damage which promotes the recorded: strokes, heart attacks, migraines, blood clots and other reactions published by the MHRA Yellow Card system and the US VAERS. The body is genetically coded to produce the spike protein and this itself is killing people.

#### *Increased risk from variants*

Studies are already proving that vaccinated people are more at risk of Covid variants. Israeli researchers compared people who had the Pfizer vaccine and against unvaccinated people who tested positive for the South African B.1.351. The variant was eight times more prevalent in the vaccinated people. Another study showed that the Pfizer vaccine was 6.8 times less effective against the variant.<sup>48</sup>

In this way next autumn the elite can say that a sudden high mortality rate from a flu-like virus is a variant of Covid-19, or a new type of coronavirus, or a third wave, when in fact it is the result of the vaccine months before. This is a very clever way to kill millions of people but blame it on something natural.

#### *Covid surges following vaccination*

All over the world there have been significant surges of Covid infections following vaccination. I have explained that the vaccines suppress the immune system for between several days and three weeks. People get infected in that period and cannot fight the disease. The vaccine made patients more prone to infections and death.

Thus many vaccinated areas also saw a rise in the Covid death rate. In the Seychelles, the most vaccinated nation (63% fully vaccinated), Covid cases shot up from 612 on 28 April to 1.068 on 3 May causing the government to shut the country down.

There are also claims that the vaccinated are already becoming super-spreaders of Covid, which is what is causing the surges.

---

<sup>45</sup> Brighteon video, '8 ways mRNA Covid vaccines can kill you', Dr Sherri Tenpenny.

<sup>46</sup> See Medical Xpress, 'SARS-Cov-2 spike protein alone may cause lung damage', 27 April 2021.

<sup>47</sup> Salk Institute, 'The novel coronavirus spike protein plays additional key role in illness', 30 April 2021. The article does not associate the vaccine with this phenomenon but proves that the spike protein on its own causes vascular damage. The vaccine manufacturers inject this spike protein, or use mRNA to get the body to manufacture it, thus the vaccines also cause vascular damage and this is evidenced in the reported adverse events.

<sup>48</sup> Mercola.com, 'Will vaccinated people be more vulnerable to variants?', 19 April 2021.

### **Are the people in control this evil?**

Would people like Bill Gates do something so sinister? You bet ya. He has already done this in test runs on poor young people in Africa and India. Thousands upon thousands have been maimed and killed by Gates' vaccination projects.<sup>49</sup> The man is criminally insane.

The elite are avowed eugenicists and they have publicly stated that they want 95% of the world's population removed. The vaccine is the perfect eugenic bioweapon to murder large sections of the population.

As Satanists, the elite follow the character of the Devil, who is not just a liar but a murderer:

You are of your father the devil, and the desires of your father you want to do. He was a murderer from the beginning, and does not stand in the truth, because there is no truth in him. Jn 8:44

The Covid vaccination programme is nothing but bio-warfare enacted upon a deluded population. God will judge this wickedness. The unrepentant wicked rich perpetrating this evil will go to hell.

There will be ... pestilences. Matt 24:7

There will be ... pestilences; and there will be fearful sights. Lk 21:11

On the earth distress of nations, with perplexity ... men's hearts failing them from fear and the expectation of those things which are coming on the earth. Lk 21:25-26

The earth shall reel to and fro like a drunkard, and shall totter like a hut; its transgression shall be heavy upon it, and it will fall, and not rise again. It shall come to pass in that day *that* the LORD will punish on high the host of exalted ones, an on the earth the kings of the earth. Isa 24:20-21

## **The stealth killing machine**

Why is it that every aspect of government imposed policies result in killing people? Those who believe that this is simply gross incompetence cannot believe that any longer; there is too much evidence that this is malicious.

The government is merely a tool and democracy is only a smokescreen or pantomime. The real people in control are the globalist bankers, corporatists and elite families. For example, the British government is controlled by the entirely separate state of the City of London, run by the Rothschilds.

Now the global elite are eugenicists. I explain that in my papers, 'Do not take the Covid vaccine', 'Bill Gates', 'The Depth of Deception', plus many other papers. Their key goal is to reduce the world's population by 95%. Various programmes, such as the UN's Agenda 2030 are geared towards this.

---

<sup>49</sup> See my paper, 'Bill Gates'. He is a truly evil man.

So the people in real control seek to kill 13 out of every 14 people. We can prove that many of their programmes have already killed hundreds of thousands of people; Bill Gates alone has done this in India and Africa in recent years. Allopathic medicine is the third biggest killer in America. Pharmaceuticals, and especially cancer treatments, kill people for profit after making their lives a profitable misery for many years first.

So it is not a great stretch to affirm that the whole Covid crisis is a killing programme by stealth. Examine the result of UK government policies that kill:

Policies that can result in death
<b>Lockdowns</b>
Lockdown worsens the viral epidemic. Most infections occurred in indoor settings. Immune systems are suppressed by remaining indoors.
The crashing of the economy leads to an increased death rate amongst the unemployed.
Creating and worsening mental health conditions, especially in kids.
Missed urgent medical treatments, such as for cancer, will unnecessarily kill thousands.
Pushing sick people from hospital into care homes.
Depriving care home residents of medical care led to unnecessary deaths.
<b>Wrong hospital treatment</b>
Using ventilators.
Refusing Vitamin D treatment.
Refusing Vitamin C treatment.
Refusing the HCQ cocktail treatment.
Refusing Ivermectin treatment.
Rejecting Budesonide.
Failing to surgically remove plaque from lung tissue to aid breathing.
Prescribing Remdesivir which worsens anaemia in oxygen depleted patients.
The patient's death is blamed on Covid when they could have been saved by the proper treatment. Their death was due to doctors.
Issuing DNR orders.
<b>PCR Tests</b>
Swabs are coated with Ethylene Oxide, which causes cancer.
Swabs contain magnetic silver-like threads of unknown origin.
Some swabs contain spike threads that detach into the nasopharynx.
Some swabs are contaminated with Covid.
Some swabs are claimed to contain medication hydrogel.
Swabs are administered wrongly, causing injury to nerves and even the brain.
Infected swabs cause inflammation and disease in the nasal cavity close to the brain.
They can cause severe nasal bleeding that can lead to heart attack.
It is on record that PCR tests have killed people.
Many of these items cause problems that are only apparent in the long-term and thus do not get attributed to the test. Death by stealth.

<b>Facemasks</b>
Some masks contain asbestos-like threads: graphene, which cuts the lung tissue.
Some masks contain 'nano-worms' or micro-fibres.
Dirty masks lead to bacterial infections.
Constant mask used causes hypoxia (oxygen deprivation), dizziness, bacterial pneumonia, staph. infections, a suppressed immune system, raised blood pressure, cognitive weakness, and many other problems.
There is anecdotal evidence of facemasks being a leading cause of death.
Many of these items cause problems that are only apparent in the long-term and thus do not get attributed to the masks. Clever.
<b>Vaccines</b>
PEG (polyethylene glycol ) in certain vaccines causes anaphylactic shock, which can kill.
Most of the vaccines contain cancer cells from humans and animals.
MRNA vaccines change the body's genome forever leading to all sorts of problems.
The antibody to the spike protein, which the body is forced to create, causes all manner of fatal repercussions. One of which is creating a cytokine storm in the next flu season.
There are eight mechanisms in the vaccines which can kill patients.
There are multiple other dangerous contents; such as: the carcinogen Polysorbate 80.

## The conquest by China

The Covid scam began by a cunning deception from China. International fear was ramped up by shocking scenes of people dropping dead on the street which we now know were faked. China then set the policy of lockdowns, which Neil Ferguson thought we could not get away with in the UK until Italy also followed suite. Most governments also followed suite blindly adopting a command economy, collectivist society, Communist strategy of imprisoning its own citizens in house arrest.

China has openly stated that it wants to take over the world and intends to do it by stealth without firing a single shot. It has allied with Bill Gates to do this, who is heavily invested in many Chinese concerns. The Covid crisis was the machine to enable many Chinese strategies to flourish.

Firstly, it made billions by manufacturing the Covid paraphernalia: facemasks, ventilators, PPE garb, PCR tests etc. It then contaminated these to do harm to non-Chinese people, as I have explained in this paper.

Meanwhile, China was buying up western interests all over the world with the collusion of government individuals who made millions by treacherous business deals. Anything China could get, it bought: ports, land, infrastructure, technology, companies and so on.

For example, Chinese entities invested 11.7 billion Euros in European Union countries in 2019 alone. In 2018 they spent \$25 billion in the US. Government support makes it easier for Chinese companies to buy foreign firms.

China has planned to dominate the world in smart manufacturing, digitisation and emerging technologies by 2025. To do this it wants to buy up western firms, particularly innovation-heavy smaller business. In addition Chinese companies engage in huge amounts of research and development collaboration, often of a sensitive nature, with western counterparts. The security aspects of this appear to have been ignored so far, except in the US whose Committee on Foreign Investment now screens take-overs.

As a result of lockdown policies in the west, many businesses are struggling and become ripe for take-over by China. We have handed them these firms on a plate.

China even has a ready-made management population in the UK. The significant Chinese population in Britain has children that out-do any other ethnic minority. Chinese students frequently top academic studies.

China has already heavily invested in Africa and Australia, but the Covid crisis, and the complicity of government ministers, is aiding the rapid take-over of British interests by China. As well as having a Chinese style social credit system emerge with vaccine passports, we are well on the way to having an infrastructure dominated by Chinese-owned companies, even those running vital utilities.

Covid is creating a Communist take-over of every walk of life. So far, hardly anyone has noticed.

## The stratification of society

The Covid crisis has factionalised society along the lines of how much propaganda one accepts. We see the following:

### The sheep

- Those who fully accept all that the government and mainstream media tells them. They do no research, not even for their own well being, and blindly accept totalitarianism and deadly vaccines.
- Example: most people, according to the polls (though these are questionable).

### The uncertain

- These are people beginning to question the government narrative and are beginning to understand that the draconian policies are not based on medical science. However, they are not researched enough to progress any further and are wary of conspiracy theories favouring convergent opportunism. They may have researched details, such as that lockdowns don't work or that Covid vaccines are dangerous, but cannot put the pieces together to reveal the underlying plan.
- Example: Dr Mike Yeadon, who is fully opposed to Covid vaccines but accepting of all other vaccines and shows no signs yet of understanding the global elite fundamentals (though he is on a revelatory journey).

### The lockdown sceptics but not fully awakened

- These are people that fully oppose the draconian totalitarian policies of the government and contradict Covid medical propaganda with good science. However, they do not believe in conspiracy theories, especially that an elite cabal is behind government policy. Often, despite being intelligent, they have not researched the right areas.
- Example: Toby Young, who has one foot in the mainstream media and one foot in the sceptics camp. He denies that the Great Reset plan is an elite conspiracy and believes that what has happened in 2020/21 is all based on political incompetence, yet is an ardent lockdown sceptic and government critic. Despite being a sound intellectual, he had never heard of Carroll Quigley's book, *Tragedy and Hope* (a fundamental historical work that is a primer for basic understanding of the emergence of the elite).

### The newly awakened

- Those who have begun to understand the psychotic plan of the global elite in all its forms; the Great Reset, Agenda 2030 etc. as a result of the Covid crisis. These have researched some aspects of the plan (eugenics, depopulation, medical tyranny, globalist control of governments, vaccine evils etc.)
- Examples: James Delingpole, who went from typical mainstream media pundit (Spectator, Telegraph etc.) to full-on conspiracy theorist in the last year. Lawrence Fox: an actor who was cancelled for truthful wrong-speak and vilified by the woke media. Ironically, this propelled him into hero status among social conservatives and led him to create a new political party and stand for London mayor. In his interviews he shows that he has begun to understand the plan behind what is happening. People are attracted to his obvious passionate sincerity.

### The full-on understanders

- Those who have researched for years to understand what the global elite plan is and fully understand its ramifications in various centres of life.

- Examples: James Corbett, who has lucidly written and eloquently spoken on all the issues for many years. Dr Delores Cahill: though focused on vaccines due to her expertise, she is also a political activist in Ireland working for freedom from the tyranny of the elite. Catherine Austin Fitts: a brilliant economist and former US government advisor who fully understands the elite plan. Gemma O'Doherty: Courageous Irish journalist and activist who speaks out on elite issues. Frances Leader: whose blog has unveiled elite plans and activities for many years. The UK Column, led by Brian Gerrish, an alternative news source that exposes all the activities of the elite and corruption in government. Jay Dyer, American researcher with a deep understanding of what is going on. Hear his interview on '*the Delingpod*' with James Delingpole.

## Connectivity

I have explained many times why Christian fellowship is so important and that this must be expressed as mutual edification within church gatherings. The reason is because Christians must represent the fellowship which goes on eternally within the Godhead; a continual, loving, interdependent community.

Because humans were created by God for fellowship with God, all mankind strives for a sense of belonging, of community. This is why all sorts of clubs, associations, fellowships, cults and friendship groups develop the world over. People long for community. It is why the best films always involve a sense of community or brotherhood.

God sets the solitary in families. Ps 68:6

Now what has overwhelmingly happened during the reaction to Covid-19 has been the shutting down of society and terminating multiple forms of human connectivity. A sense of community has been destroyed and the result is increasing isolation in people leading to depression, anxiety and illness. Hundreds of community groups and schemes have been shut down; even libraries.

I maintain that this is a deliberate satanic strategy.

You must understand that Satan and his demonic fallen angels feed and thrive on human suffering and negativity. The more he can get society to convulse in negativity and hopelessness, the more he is built up and exhilarated.

All the evidence is in; facemasks, social distancing and lockdowns have no effect on hindering a viral epidemic. So why were they enacted?

At this point in time, 40 million British people are in areas where Covid has vanished. Public Health England figures show cases plummeting in every region and fewer over-80s catching Covid than ever. Hospital cases are at the lowest level for a year. For weeks excess deaths are below the five-year average.<sup>50</sup> Community immunity is certainly evidenced by the number of people with antibodies, as even the ONS has recently admitted (70% of English adults have Covid antibodies).<sup>51</sup> [The establishment claims that this is due to vaccines; the more likely explanation is seasonality.]

Yet signals are emerging showing that restrictions are going to continue despite the roadmap saying they will end on 21 June. For examples pointing to this:

- Councils are advertising for Covid-Marshals with job contracts starting on 1 July and continuing for two years. Cost, £3 million.
- Bill Gates has said that lockdowns will be necessary until 2023.
- Joe Biden has said that masks will be required for two more years.
- The new EU vaccine passport, recently voted in, includes the phrase 'Covid 21'.
- Tony Blair has lobbied the government to extend the lockdown beyond 21 June.

---

<sup>50</sup> In the seven weeks before 6 May the ONS reported that there were 5,511 fewer deaths than the average of the last five years.

<sup>51</sup> Sky News, 'Covid-19 Almost 70% of adults in England now have coronavirus antibodies latest figures suggest', 28 April 2021.

- The UK government has awarded a £320 million contract for a '*The provision of Media buying services for Covid-19 campaigns*', which continues until 31 March 2022. Contract awarded to OMD Group Ltd, a subset of an American media company.
- The UK government produced a document entitled, '*Summary of further modelling of easing of restrictions – Roadmap Step 2*'.
- And so on.

Satanic inspired governments want to stop human community and local connectivity for much longer to do as much damage to people as possible.

Facemasks hinder face-to-face communication. Evidence is pouring in of the immense damage being done to children and babies by masking facial expressions. Learning is being hindered. Speech development is being held back by measurable quantities. One group of toddlers recently were placed together indoors out of necessity at some event. Instead of playing together they sat motionless and speechless looking at each other. They hadn't seen other infants for a whole year and were socially repressed.

Lockdowns stop people gathering in communities of all sorts, from going to a music gig, seeing a comedy show, going to the theatre or even seeing sick elderly relatives in a care home or hospital. The level of this wickedness is incalculable.

Social distancing ensures that even going to a supermarket and casually chatting with a stranger is now verboten. Despite scientific proof that this restriction is utterly pointless, the government has said that it will continue after 21 June, even though it is killing many businesses, such as restaurants.

The government, under demonic instruction, does not want people to get back into communities until society has been permanently ruined and people accept their stratified roles as drones in a Brave New World. Some new type of Soma<sup>52</sup> is going to be necessary to stifle multiple human needs that won't be available in a technocratic new world order.

As part of a post-human future (the technocratic plan) at the same time as governments stop people from socialising, the deep state has recently pushed sex-dolls and even cloned AI sex-dolls to cater for lonely people (clones of missing partners built up from photos). There are now many types of sex-manikins that are being advertised that will form part of the new technocracy. Human interaction is being curtailed but robotic relationships are being developed. This is how insane and wicked society is developing.

You must understand that this policy is psychological warfare on society. The aim is to make people insane, muddled in thinking and confused, so they will accept the new form of technocratic society that will emerge. Isolation is a well-known tactic for breaking down mental health and is a form of extreme sanction in prisons. Isolating people makes them unbalanced and compliant.

It is not just an attack on all the aspects of a free society (freedom of movement, freedom of speech, free assembly, freedom of worship) but an assault on the mind. Being in lockdown has driven people slightly mad.

It is also continual mental torture to disrupt all human conventions and communal cultural pursuits. Who could have believed that a British government would:

- Stop people hugging each other.

---

<sup>52</sup> The drug given to citizens in Huxley's *Brave New World* to stupefy them into supine compliance.

- Stop people visiting granny.
- Prevent people from being with their dying relatives.
- Stop their children from playing with other children.
- Stop people going out of their own house.
- Stop people going to a park or a beach.
- Stop people attending a worship service.
- Stop people from attending a funeral or a wedding.
- Isolate the queen from family at her husband's funeral.

This is insanity and it is a deliberate ploy to damage the mental state of citizens. More specifically, it is to disrupt the normal protocols of community and relationship connectivity. It is pure evil.

But worse, the society that is planned to take the place of a ruined western culture is going to be more like a beehive than a free society. With continual restrictions (there will be an excuse for an autumn/winter lockdown) society will be technocratic and cold. Individuality, freedom of expression, spontaneity and joy will be eviscerated from culture. A Chinese-soviet style of social credit, based on vaccine passports, will determine not just social-compliant status and mobility but what kind of culture you can access. The technocrats that want to run society<sup>53</sup> have no imagination or creativity; they are dull people. Such masters can only create a societal machine where people are gears and pistons in an enterprise rather than a family based on a shared traditional culture.

Without social connectivity, community and opportunistic relationships, society becomes mechanistic, heartless, frigid and boring. It follows the strict, rigid hierarchy of the Devil that created it rather than the loving community God intended for mankind.

Is this what you want?

---

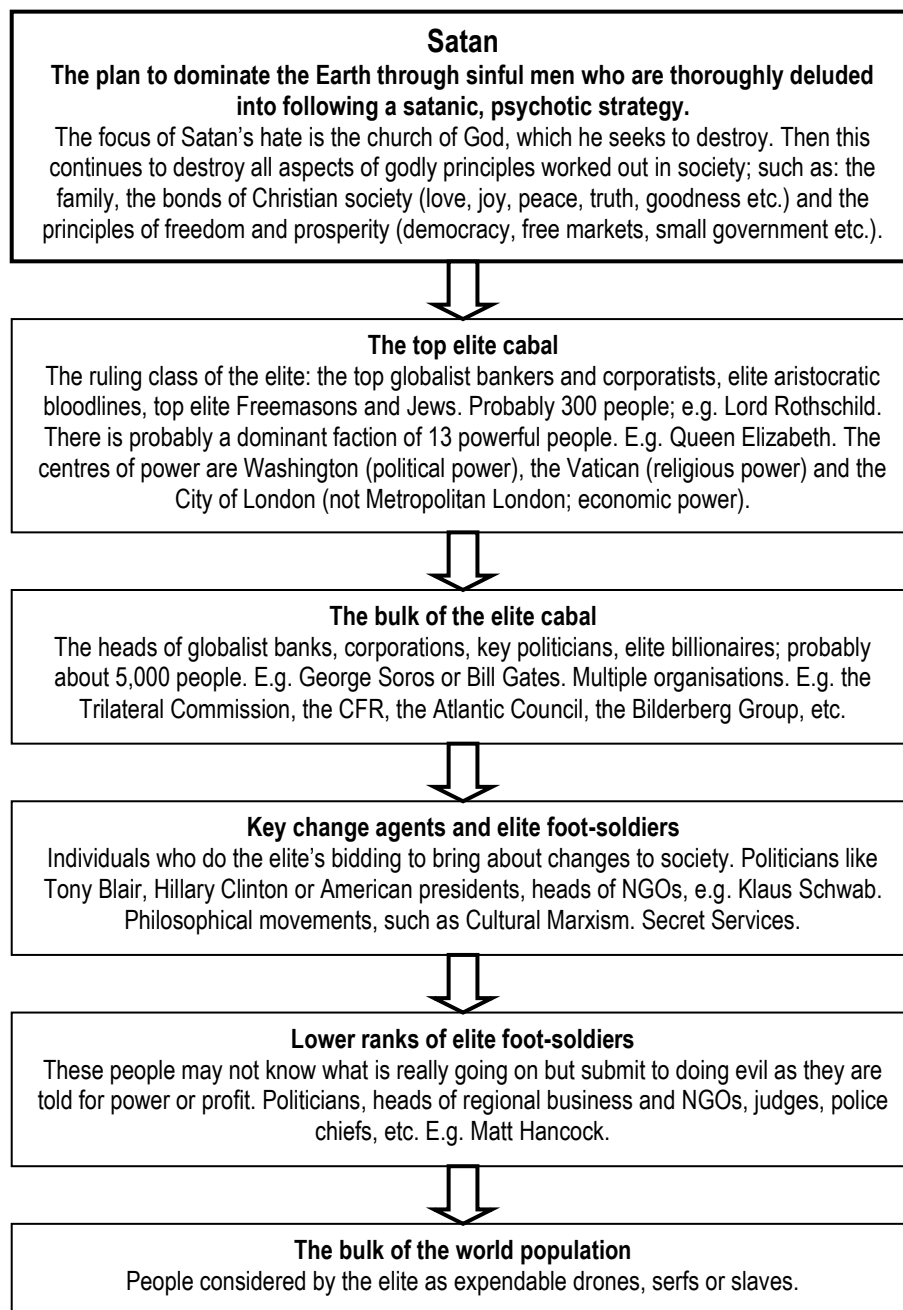

<sup>53</sup> Such as Bill Gates or Klaus Schwab.

## The spiritual perspective

When those that understand what is going consider the seriousness of events, they wonder: 'why is the elite doing this?'. Why put infected swabs up children's noses twice a week? Why make the world wear infected facemasks? Why smash small businesses? What sort of people are these?

This can only be understood by those who appreciate the spiritual realm and particularly the war between God and Satan, which is being played out by proxies on the Earth today. Without understanding divinity, none of this makes sense. Without understanding Biblical eschatology, there is no hope. However, those who understand the victory of Christ are positive and full of hope as all this shows that the return of Christ is near.

What is going on is satanic. There are layers of accountability.

## Conclusion

The times we are in are unprecedented in human history. Never has so complete a stealth attack been performed on human populations globally. This is a time of exceptional satanic attack mediated through human government proxies.

And yet, despite the obvious human damage being enacted (especially towards the old and the young) the majority of the population is supine and complaint. The British have completely lost their bottle and their minds. Through scaremongering about fear of killing granny, the population has allowed the government to kill thousands of old people and ruin the lives of millions of children.

Never was there a time when truth was so much needed.

### **What do we do in the face of this unprecedented evil?**

We do what we should always do.

First, we centre ourselves in God and gain the peace of Christ. We refuse to panic, fear or worry and give ourselves to God's will. We worship God, despite whatever wickedness surrounds us, and give thanks. We also secure ourselves in the hope of the Gospel fulfilled at the coming of Christ.

Second, we focus on the truth in every circumstance that surrounds us. We understand the truth behind what is going on and wage war against evil by prayer and faith. Wherever possible, we explain the truth to those that will listen. We can also turn the current circumstances into Gospel opportunities.

Third, we strive more than ever to do good in every way possible. We seek new ways to do good to people around us, showing love and care to those in need or in fear.

You are the salt of the earth. ... You are the light of the world. ... Let your light so shine before men, that they may see your good works and glorify your Father in heaven. Matt 5:14-16

That you may become blameless and harmless [unmixed, free from guile], children of God without fault in the midst of a crooked and perverse generation, among whom you shine as lights in the world, holding fast the word of life. Phil 2:15-16

## Resources

In addition to multiple sources given in earlier papers, here are some useful research websites:

- *Lockdown Sceptics*: blog run by journalist Toby Young. This is a treasure trove of scientific papers, factual data and sagacious political comments. The first port of call on Covid research.
- *AIER* (American Institute for Economic Research): An American free-market think tank with excellent research papers.
- *The Delingpod*: podcast by the journalist James Delingpole. Conversations with eminent commentators, plus a regular post with Laura Perrins of the Conservative Woman.
- *London Calling*: podcast hosted by James Delingpole and featuring his best mate Toby Young. Entertaining weekly rants against the Covid narrative and government incompetence.
- *Planet Normal*: Excellent lockdown sceptic Telegraph weekly podcast with journalists Allison Pearson and Liam Halligan. Usually features an interview with an eminent commentator. Also features gripping email responses from the public.
- *Natural News*: website of Mike Adams; anti-medical corruption. Mike also started the YouTube alternative platform Brighteon. Many deleted YouTube videos can be found there and on another platform, BitChute.
- *Ivor Cummins website*: podcasts, videos and papers by a brilliant engineer giving excellent empirical analysis of statistics. He is working on a film exposing the Covid hoax.
- *Unherd*: Freddie Sayers - interviews and papers that go against the tide.
- *Dr Mike Yeadon*: appears in various channels, such as twice on the Delingpod, where he is always worth listening to.
- *Dr Sherri Tenpenny*: powerful anti-vax analytical researcher. Appears in multiple videos.
- *Vaxxter*: anti-vax website that hosts many of Dr Sherri Tenpenny's papers.
- *Dr Andrew Kaufman*: appears in various websites giving excellent information.
- *Mercola.com*: Dr Joseph Mercola gives excellent analysis of multiple medical issues.
- *James Corbett*: (Corbettreport.com) excellent analysis of geo-political issues.
- *New World Next Week*: James Corbett with his friend / co-host James Evan Pilato discuss real news and expose fake news.
- *Dr Delores Cahill*: esteemed immunologist appears in many podcasts.
- *Gemma O'Doherty*: courageous Irish investigative journalist and activist.
- *Dr Sunetra Gupta*: esteemed Oxford epidemiologist. Co-author of the Great Barrington Declaration.
- *Dr Jay Bhattacharya*: Stanford professor. Co-author of the Great Barrington Declaration.
- *Dr Martin Kulldorff*: of Harvard. Co-author of the Great Barrington Declaration.
- *Dr Judy Mikovits*: esteemed (and smeared) biochemistry research scientist.
- *The UK Column*: news channel started by retired naval officer Brian Gerrish that exposes elite, corporate and government corruption.
- *The Conservative Woman*: the only radical, critical, independent, British Conservative commentary blog that is not tied to the establishment. Note editors Kathy Gyngell and the outspoken Laura Perrins. Outstanding articles.
- *Lord Jonathan Sumption*: a retired, Christian, senior judge with incisive analysis of the legalities around government decisions. Very critical of rule by diktat.

- *Dr Vernon Coleman*: sceptical papers, books and podcasts by a retired GP.
- *Dr Carl Heneghan*: Oxford epidemiologist.
- *Dr Knut Wittkowski*: American epidemiologist.
- *Centre for Research on Globalisation (Globalresearch.ca)*: Michel Chossudovsky, a Canadian economist and researcher.

### **Papers by Paul Fahy**
