

Covid Vaccines: an aide-mémoire

Supporting data for all these claims can be found in my many papers on the Covid crisis.

- The vaccines are experimental and have not been fully tested.
- The vaccines are not authorised; they have temporary emergency licence.
- There is no insurance compensation for damage caused because they are voluntary.
- There is no compensation from vaccine manufacturers; they have legal immunity.
- Seeking government compensation is a labyrinthine process that usually fails.
- The vaccine trials were incomplete, badly conducted, fraudulent and had bad results.
- The vaccines are not safe and effective. Even the trials proved this.
- The vaccines are not vaccines in the traditional sense. They do not inject an attenuated portion of the whole virus to generate an immune response. They inject multiple substances, including mRNA (Moderna / Pfizer) or other processes (Jansen / AstraZeneca) in order to get human cells to manufacture the virus spike protein – which is toxic and deadly. This changes the body's DNA permanently.
- The vaccines wreck the immune system. The more boosters, the worse it gets.
- The vaccines increase the risk of myocarditis; especially in boys aged 12-40.
- Deaths from myocarditis in young men have massively spiked.
- The vaccines increase the risk of pericarditis.
- The PEG coating of the mRNA causes anaphylaxis in about 30% of people.
- Since the vaccine rollout there have been numerous deaths and serious injuries. The number of these is being covered up but official figures put deaths at tens of thousands. Over 30,000 deaths in the EU alone. Studies show that the real figure is up to 100x this. Many millions have been seriously injured.
- Vaccine injuries include: heart attack, thrombosis (blood clots), blindness, paralysis, deafness, nerve disorders, inter-cranial abscess, lung damage, sterilisation, miscarriages, newborn death, auto-immune disease (e.g. Lupus), AIDS type symptoms, seizures, brain damage, gastro-disease, immune system collapse and more.
- An MIT study showed that 86% of vaccine adverse reaction reports in America showed a direct causal link to the vaccines.
- In the past when reported deaths or serious adverse events hit 50 the vaccine rollout was terminated. There are currently millions of reported adverse events associated with the Covid vaccines. There are over one million in Britain alone.
- There are multiple bad ingredients in the vaccine including: nano-metals that assemble, graphene oxide and graphene hydroxide (which act like razor blades in blood vessels), parasites, cancer-causing agents (like Polysorbate 80), cells from murdered babies (e.g. HEK 293), aluminium (which causes dementia) and more.
- Some ingredients form inside the body into a self-assembling operating system that can be accessed remotely. The CEO of Moderna openly boasted about this.
- The vaccines cease being any use against Covid after a few months. Pfizer admits this.
- Vaccinated people become more open to infection than unvaccinated people.
- Vaccinated people spread the virus to others.
- Vaccinated people are more likely to hospitalisation.
- Countries with the highest rates of vaccination have the highest rates of Covid.
- Countries like Israel (highly vaccinated) have hospitals filled with vaccinated people.
- Vaccinated people drive the variants.
- The people demanding vaccines (e.g. Vallance, Gates) profit from them.
- The vaccines are an agent of depopulation. But batches vary; some are placebos.

Scripture quotations are from The New King James Version
