

Evidence that the pandemic is fake

Introduction

Though I have covered parts of this in previous papers, I thought it would be beneficial to summarise the proofs that the pandemic, which has ruined economies and caused social devastation, is fake. In fact it is part of a strategy to initiate permanent social change to make societies more amenable to a totalitarian world government.

There are now more than enough facts and data coming in from around the world that can categorically prove that the pandemic is false.

Virus mortality rate¹

The latest immunological studies show that the overall lethality of Covid-19 is about 0.1%.² Even the CDC had to admit that the mortality rate was less than 0.3% (actually 0.26%). The death rate for the flu vaccine is 0.6%, twice as high as Covid-19!

Oxford University stated that it was between 0.1% and 0.41%. Stanford University researchers estimated the IFR as between 0.12% and 0.2% on 17 April. A meta analysis of multiple studies (April to early May) done by John Ioannidis showed a rate of 0.06 to 0.16. This means that Covid-19 is comparable with seasonal flu and less severe than a number of past flu epidemics.

The recent Stanford University antibody study now estimates that the fatality rate if infected is likely 0.1 to 0.2%, a risk far lower than the previous WHO estimates that were 20 to 30 times higher and that motivated isolation policies ... Let's stop under-emphasising empirical evidence while instead doubling down on hypothetical models. Facts matter.

Dr Scott Atlas, Stanford University (not involved in the Stanford study).³

After months of false information, the CDC finally had to admit that the infection fatality rate is now best estimated as 0.0065%.⁴

So, the claimed pandemic is within the range of a normal to severe influenza outbreak. In the US and UK overall mortality has been in the range of a strong influenza season. In countries like Germany, Austria and Switzerland it has been like a mild flu season. In some countries, like Japan, it has been insignificant.

The risk to children is minimal. The risk outdoors is minimal. The risk from touching surfaces is minimal. Even Anthony Fauci has stated that the risk of dying from Covid-19 is similar to dying from influenza. Children are more at risk from dying from a lightning strike than Covid-19.

¹ Swiss Policy Research, 'Facts about Covid-19'.

² I have broken these down and given sources in earlier papers. E.g The Seeker, 16 April 2020.

³ The Hill newspaper, 'The data is in – stop the panic and end the isolation'.

⁴ CDC, Coronavirus Disease 2029 (Covid-19), 'Covid-19 pandemic planning scenarios', updated 10 July 2020.

80% of test-positive persons were symptom-free. Even elderly people were around 60% symptom-free. 95% of infected people develop only moderate symptoms. 60% of people already have cellular background immunity due to contact with previous coronaviruses. The median age of the deceased is over 80 years and only 4% had no serious preconditions. The risk profile of deaths corresponds to normal mortality.

In short, the supposed pandemic has been like a flu season.

Over two thirds of extra deaths occurred in nursing homes which do not benefit from a general lockdown. In many cases the deaths were more likely from stress and isolation. In fact up to 30% of additional deaths may have been caused by the lockdown. For example, the treatment of heart disease and strokes decreased by 60% because patients feared to go to hospital and normal treatments ceased.

The claims of young healthy people dying from Covid-19 were false. They either already had serious conditions, such as undiagnosed leukaemia, or were not young (one report of a 9-year old turned out to be 109-years old).

National death statistics

UK excess deaths are lower than the five-year average

The ONS recently⁵ produced figures on excess deaths so far this year. Lo and behold it shows that the death rate is lower than the average over the last five years.

For example, in Week 29 (ending 17 July) the number of deaths registered was 3% below the five-year average (270 deaths fewer). This was the fifth consecutive week that the deaths were below the five-year average. The number of deaths in care homes, hospitals and other communal establishments was also fewer than the five-year average. However, the number of deaths in private homes was 766 higher than the five-year average (presumably caused by the lockdown).

Regarding deaths attributed to Covid-19 registered up to Week 29, 63.4% occurred in hospital, 29.7% in care homes, private homes 4.7% and hospices 1.4%.

Afterword: this trend continued in following weeks up to the present (week 31). In week 28 there were 560 fewer deaths than the five-year average.⁶ On 19 August there were no deaths at all recorded in English hospitals.

NHS deaths

Simon Dolan forwarded a Freedom of Information request⁷ of Nottinghamshire Health Care Trust deaths from Covid-19. The answer came back that between February and July 2020 only 14 people died who tested positive for Covid-19. For that, millions in that area were in lockdown, patients died from lack of treatment and businesses bankrupted.

On 27 August the NHS published statistics for Covid-19 deaths up to 26 August.⁸

⁵ Office for National Statistics – ‘Deaths registered weekly in England and Wales, provisional: week ending 17 July 2020’.

⁶ ONS, ‘2020 weekly all-cause deaths above the five-year average for England and Wales’.

⁷ Freedom of Information Act 2000, Section 17.

⁸ Covid-19 deaths by age group and pre-existing conditions, 27 August 2020. Covid-19 Patient Notification System.

Age group	Did have pre-existing conditions	Did not have pre-existing conditions	% deaths with condition	Total
Total	28,141	1,390	95%	29,531
0-19 years	16	4	80%	20
20-39	181	34	84%	215
40-59	2,028	267	88%	2,295
60-70	10,648	575	95%	11,223
80+	15,268	510	97%	15,778

This is official data. As late as August the people that died from Covid-19 (and this is presumably an inflated figure caused by testing), were fewer that died than a bad flu season.

USA data

At the end of August the CDC finally updated the Covid-19 numbers and admitted that only 6% of all the 153,504 deaths recorded actually died from Covid-19.

This is huge. This means that only 9,210 Americans died from Covid-19.

World Covid-19 death statistics⁹

Country	Deaths per million	Percentage
Britain	825	0.08% of population
Italy	582	0.06%
Sweden	558	0.06%
USA	482	0.05%
France	452	0.05%

A recent study of Covid deaths outside hospitals in Sweden found that only 15% of them died from the virus but most were from other factors.¹⁰

Note: Britain with a lockdown fared much worse than nations without a lockdown (Sweden, Iceland, Belarus etc.) or nations with only a partial lockdown (Germany, Denmark, Japan etc.). Sweden's significantly high figure was due to a pre-existing problem with Care Home management where most of the deaths occurred.

As a comparison, the Black Death pandemic killed between a third and a half of the population of Europe. Thus the Covid-19 fatality rate is virtually insignificant.

Note: I have established in previous papers that the death rate for Covid-19 is massively inflated by government manipulation of death statistics. Swiss doctors reported that the real Covid-19 phenomenon was about 4% of reported deaths; only 4% had no previous, serious preconditions.¹¹ This means that the epidemic death rate is even lower.

⁹ Source: Worldometer.

¹⁰ Dr John Lee, The Spectator, 'The coronavirus immunity riddle', 29 August 2020.

¹¹ Nicholas Kollerstrom, 'Coronavirus, planned in the US, activated in the UK', 9 August 2020.

A study in America showed that the different states experienced Covid-19 in proportion to how much they locked-down.¹² Another study showed that the increase in mortality in a country started immediately after the lockdown.¹³ This is not surprising as epidemiologists warned beforehand that Covid-19 spreads in confined indoor environments whereas sunshine kills viruses. Shutting people indoors is the worst thing you can do to stop an epidemic.

It is claimed that ten to 21 million people have caught the virus (but this is based on faulty tests and is greatly inflated). However, the flu can affect one billion in a single year. Thus Covid-19 is less damaging than flu.

Infection rate

This figure is highly inflated due to phoney testing (see later). Nevertheless, although the public thinks that millions are infected due to constant scaremongering by the media, the ONS has just published figures showing that only 0.05% of the population is infected.¹⁴

That is around 33,000 supposedly infected people, but anything between 80% and 100% of these are false positive tests. The number of actual sick people is very small indeed. There is a far greater threat to the public from TB, hepatitis B, sepsis, heart disease, stroke, cancer, pneumonia and car accidents.

NHS stats

‘England deaths with Covid-19 by absence or presence of a pre-existing condition.’

- In the pandemic only 4 children (aged 0-19) died from Covid-19 that had no existing preconditions. 16 died from other co-morbidities.
- In the age range 20-39, 33 died that had no existing preconditions. 179 died from other co-morbidities.
- In the age range 40-59, 267 died that had no existing preconditions. 2016 died from other co-morbidities.
- In the age range 60-79, 575 died that had no existing preconditions. 10,592 died from other co-morbidities.
- In the age range 80+, 509 died that had no existing preconditions. 15,187 died from other co-morbidities.

‘Percentage of deaths with Covid-19 by pre-existing condition [PEC].’

- 95% had one or more PEC.
- The leading specific PEC was diabetes (26.44%) but 71.49% was listed as ‘other’. The next most common ones were: dementia, chronic pulmonary disease and chronic kidney disease.

‘Trendlines (7-day average) for Covid-19 deaths by England NHS region ...’

- This graph shows essentially a 45% curve downwards to virtual zero by 9 August. That is, the epidemic is over.

¹² JP Morgan, 21 May 2020.

¹³ Kollerstrom, op. cit. See articles by Vanessa Beeley and Oxford University.

¹⁴ ONS, ‘Covid-129 Infection Survey’, 7 August 2020.

An economic survey¹⁵

Across all countries the growth rates of daily deaths from Covid-19 fell from a wide range of initially high levels to levels close to zero within 20-30 days after each region experienced 25 cumulative deaths.

After this initial period, growth rates of daily deaths hovered around zero everywhere in the world.

The cross section standard deviation of growth rates of daily deaths across locations fell very quickly in the first 10 days of the epidemic and remained at a low level.

When interpreted through a range of epidemiological models, these facts implied that the reproduction numbers and transmission rates fell from widely dispersed initial levels and the effective reproduction number hovered around one after the first 30 days of the epidemic everywhere in the world.

The conclusion of the researchers is that failing to account for these facts resulted in overstating the importance of social policy mandated by governments.

A comparison

There are far greater threats to life than Covid-19 – yet no one worries about them. You are at more risk from heart disease, stroke, flu, pneumonia, road traffic accidents, tuberculosis, diarrhoea, and hepatitis B. Why create lockdowns economic destruction, panic and needless deaths for this virus?

Covid-19 claimed deaths	Other mortality rates
<i>British deaths</i> Less than 46,000 have died from Covid-19 – but this figure is vastly inflated by wrong death certificates. The real figure could be easily less than half of this.	Half a million die in the UK every year.
	170,000 die of heart disease and stroke in the UK.
	In the winter of 2017-18 there were 50,000 excess UK deaths due to flu and pneumonia.
<i>Global deaths</i> 790,964 – again this is greatly inflated.	
	57 million die each year globally; the virus has only killed less than a million.
	1.6 million people die of diarrhoea globally every year.
	There are 1.1 million road traffic fatalities per year globally. Less than 800,000 have died of Covid.
	1.1 million die of TB every year. In 2017 TB killed nearly 1.6 million .
	Hepatitis B kills 886,950 people every year.
	Malaria kills 730,730 people every year.

¹⁵ American Inst. for Economic Research, 'Four stylised facts about Covid-19'.

Do SARS-Cov-2 and Covid-19 even exist?

Many doctors state that Covid-19 does not exist?

No scientist can offer verified proof that Covid-19 exists.

In January RNA from a supposed Chinese virus was sequenced and shown to be related to SARS; this was named SARS-Cov-2. This was material taken from sick patient's lungs. There is confusion as to whether this is the pathogen that causes Covid-19. Many assumptions were made in the ensuing panic that have not been scientifically tested (was this material a virus, cellular debris, exosomes or other things).

Dr Andrew Kaufman has stated that there is no evidence of anyone dying from a novel illness.¹⁶ The early conclusion that a novel virus caused a new type of pneumonia in Wuhan had no scientific basis. Kaufman states that early papers proving a new coronavirus flat out lied. This was borne out by other researchers.

Dr Stoian Alexov, President of the Bulgarian Pathology Association said that he and his colleagues had not found any evidence of deaths from a novel coronavirus. He called the WHO a '*criminal medical organisation*' for creating worldwide fear and chaos without providing objective verifiable proof of a pandemic.¹⁷ He also states that it is impossible to create a vaccine against claimed Covid-19.

The director of the Institute of Forensic Medicine at the University Medical Centre Hamburg-Eppendorf said that there's a striking dearth of solid evidence for Covid-19's lethality.¹⁸

A group of doctors have written to the British PM challenging Public Health England to '*show proof*' that a virus exists.¹⁹

No large-scale, electron microscope, conclusive study has been done. Particles in photos of studies could be: different viruses, genetic fragments, cellular debris or exosomes.

Scientists²⁰ have asked the authors of the original papers²¹ claiming to have found a new virus whether the electron microscope shots depicted purified viruses. None of them could say 'Yes'. No one has shown a new purified virus called SARS-Cov-2. The original authors claiming a new coronavirus have no proof that the material gained from patients was viral or cellular debris.²² '*The existence of SARS-Cov-2 RNA is based on faith, not fact*'.²³ The eminent virologist Dr Charles Calisher was asked if he knew of a single paper in which SARS-Cov-2 has been isolated and purified, he said, '*I know of no such a publication. I have kept my eye out for one*'.²⁴

²⁰ E.g. Torsten Engelbrecht and Konstantin Demeter; see later.

²¹ Leo LM Poon et. al; Myung-Guk Han et. al.; Wan Beom Park et. al; Na Zhu et. al.

²² This opens a whole debate on whether viruses even exist or are rather exosomes produced by the cells to get rid of toxins.

²³ Torsten Engelbrecht and Konstantin Demeter, op. cit.

²⁴ Ibid.

There are no specific distinctive symptoms for Covid-19.²⁵

The disease-causing effects of any virus are scientifically tested using Koch's Postulates which demand that four conditions must be met. The virus thought to cause Covid-19 (SARS-Cov-2) does not meet any of them. It must be isolated and purified – this has not been done. There is no British peer-reviewed study proving that Covid-19 causes disease and the WHO has issued instructions not to do one. Why?

The Lancet stated that since scientists had not performed tests for detecting an infectious virus in blood they '*avoided the term 'viraemia' and used 'RNAemia'. RNAemia was defined as a positive result for real-time RT-PCR in the plasma*'.²⁶

New Zealand's Ministry of Health and the Institute of Environmental Science and Research have no record of Covid-19 virus isolation anywhere.²⁷

University of Toronto, McMaster University and Sunnybrook HSC have no record of Covid-19 virus isolation. Health Canada has no record. The National Research Council, Canada has no record.²⁸

Admittedly, this is confusing since many scientists have claimed to have analysed the virus – but what sample are they starting with? There seem to be two issues. The first is: is there a virus called SARS-Cov-2? The second is, is there a disease called Covid-19 or does some condition (e.g. a virus / 5G) trigger other underlying pathological features (such as pneumonia or oxygen depletion) caused by something else (e.g. gamma retroviruses imparted in flu vaccines)?

At the moment we have to accept that there is a virus (SARS-Cov-2) but why has this not been properly analysed and isolated according to Koch's Postulates? Is there some other hidden force at work?

The testing is useless

The lockdown mandates are being driven now by testing, chiefly PCR testing, which the government claims show spikes of infections. It does not and the test is useless.

As I have explained before, the tests being used are scientifically pointless. There is no test currently being used to definitely establish Covid-19. The various tests can only specify that a previous coronavirus (e.g a cold) had been experienced at best. No one has isolated a specific Covid-19 antibody.²⁹

PCR tests

- Most tests are rRT-PCR tests; that is, real-time, reverse transcription polymerase chain reaction tests.

²⁵ Confirmed by Thomas Loscher, former head of the Dept. of Infection and Tropical medicine at the University of Munich. Email 6 March 2020, quoted in Torsten Engelbrecht and Konstantin Demeter, 'Covid19 PCR tests are scientifically meaningless', Off-Guardian, 27 June 2020.

²⁸ Ibid.

²⁹ Off-guardian.org, 'No one has died from the coronavirus'.

- RT/PCR tests have never been tested for efficacy. There is no gold standard by which they can be evaluated for accuracy.
- The inventor of the technology (Kary Mullis) never designed it to test for viruses. It is a manufacturing technique to replicate DNA sequences millions of times but it is not a diagnostic tool.
- In looking for an RNA virus, like presumed SARS-Cov-2, the RNA must be converted to complementary DNA with the enzyme Reverse Transcriptase (hence 'RT' in RT/PCR). This transformation process is widely recognised as inefficient. The amount of DNA obtained with the same RNA base material can vary by a factor of ten. The DNA sequences get doubled in every cycle of the process and the variation gets magnified. In current PCR tests there can be 40 cycles – which is also recognised as being faulty. These factors alone make the test worthless.
- False positive results arise from low sensitivity, specificity of the test, low prevalence in the community or laboratory errors. A specificity of 95% would result in 2.4 million false positives, or 41% of all positive tests.³⁰ Tests are supposed to be done in consultation with a health professional – but that is not being done currently due to the numbers. Experts estimate that in America 667,000 positive tests are false positives.³¹ These people were needlessly forced into isolation with their families. *'Mass testing of asymptomatic individuals is likely to produce large numbers of false positives, either from the inherent limitations of the test or from past infections.'*³²
- People who become infected with Covid-19 and recover can have SARS-Cov-2 RNA detected in their upper respiratory specimens for up to 12 weeks. Positive tests result but the patient is not infected. Thus the CDC no longer recommends testing to determine when a patient can leave isolation; lack of symptoms is a better indicator.
- The CDC manual for PCR tests actually states, *'Positive results are indicative of active infection with 2019-nCoV but do not rule out bacterial infection or co-infection with other viruses. The agent detected may not be the definite cause of disease.'* [So what point is there?]
- The CDC also stated: *'Detection of viral RNA may not indicate the presence of infectious virus or that of 2019-nCoV is the causative agent for clinical symptoms. ... This test cannot rule out diseases caused by other bacterial or viral pathogens.'*³³
- The FDA also admitted that: *'positive results ... do not rule out bacterial infection or co-infection with other viruses. The agent detected may not be the definite cause of disease'*.³⁴
- The instruction manuals of PCR kits state that they are not intended as a diagnostic test.³⁵ Roche's LightMix Modular Assays produced by TIB Molbiol state: *'These assays are not intended for use as an aid in the diagnosis of coronavirus infection'*.
- The tests do not show the amount of viral particles in the body (viral load).
- We need to know where the RNA for which the PCR tests are calibrated comes from. The PCR test does not give us this information. If SARS-Cov-2 has not been isolated and purified we cannot know that the RNA comes from this virus. The RNA gene sequences which scientists took from tissue samples early on, for which PCR tests are calibrated, cannot be concluded to have come from a specific virus called SARS-Cov-2

³⁰ To say a test is 90% specific means that it will correctly identify 90% of people who are not infected. So if 10 healthy people are tested, 9 of the tests will return negative results.

³¹ Rational Ground, Jennifer Cabrera, 'New CDC guidelines are aligned with science'.

³² Ibid.

³³ CDC 2019- Novel coronavirus (2019-nCoV) real time RT-PCR Diagnostic Panel, 30 March 2020.

³⁴ Quoted in Torsten Engelbrecht and Konstantin Demeter, op. cit.

³⁵ E.g. as those by Altona Diagnostics and Creative Diagnostics.

(see earlier). There is also no proof that these RNA sequences are the causative agent of Covid-19.

- The test does not detect the presence of the SARS-Cov-2 virus, despite statements by the government and the media. At best, it detects a segment of one component of a virus, i.e. the RNA molecule contained within the virus capsule. The segment detected could come from an intact virus particle, from a non-viable virus particle or from residual material or debris from virus particles destroyed by the immune system or other cell debris.
- Donors can be asymptomatic but still test positive. These are not infectious.
- People can be tested multiple times and give multiple contradictory results, even in one day.³⁶
- Different reports have stated that the tests give 30%, 50% and even 80% false results.³⁷ In Britain this could mean that hundreds of thousands of people are wrongly told that they are positive.
- Florida has admitted that some people who tested positive had never been tested at all and many others were incorrectly confirmed positive. The figures everywhere are flawed. The British government admitted that their number of positive tests was incorrect after being challenged.
- Fruit (papaya) have tested positive, along with a goat and a quail. [Tested in Tanzania, demanded by the President John Magufuli, who has a doctorate in chemistry. The president then kicked the WHO out of his country.]³⁸
- People have wondered why there are so many false positives. We now know. One of the WHO primer sequences in the PCR test for SARS-Cov-2 is found in all human DNA. The sequence is: CTCCCTTTGTTGTGTTGT, which is found in the WHO coronavirus PCR testing protocol document. These are amplified by the test to be detected and found positive. However, the exact same 18-character sequence is also found on Homo Sapiens chromosome 8.³⁹ This means that if done properly, all humans should test positive.⁴⁰ I am not a geneticist but the data looks convincing.

RT-qPCR testing programmes for SARS-Cov-2 are wholly inadequate, poorly organised and surrounded by confusion and misinformation. Comprehensive testing is not hindered by availability of suitable assays, reagents, equipment or testing capacity. It is delays in the bureaucratic validation and approval process and lack of involvement of the wider research and commercial service provider community by public health laboratories that are at the heart of the testing conundrum.

International Journal of Molecular Sciences, Stephen Bustin and Tania Nolan, April 2020.

Looking closely at the facts, the conclusion is that these PCR tests are meaningless as a diagnostic tool to determine an alleged infection by a supposedly new virus called SARS-Cov-2.

Torsten Engelbrecht and Konstantin Demeter, Covid19 PCR tests are scientifically meaningless, *Off-Guardian*, 27 June 2020.

³⁶ 610 patients in Wuhan were tested. 29 had 3 to 6 test results that flipped between negative, positive and dubious. Reported in the *Journal of Medical Virology*. This also happened in other places like Singapore.

⁴⁰ Steve Kelly, 'Piece of mindful', 6 April 2020.

These faulty tests are driving lockdown policies and this causes damage. Apart from the colossal economic destruction causing many to lose their livelihood, the faulty tests damage patients directly. Patients are stressed on being told they are positive for Covid-19 when they have no symptoms; this stress can cause illness. It also skews medical diagnosis because non-viral factors are immediately excluded from the diagnosis and the patients are treated with highly toxic drugs and intubation. In New York this resulted in over 96% deaths caused by malpractice. For elderly folk and people with pre-existing conditions, the treatment also causes great damage. Based on faulty tests giving a false diagnosis the treatment becomes fatal.

Due to faulty tests we have the situation where: 1) excess mortality is caused by lockdown measures; 2) Covid-19 deaths are certified as such by rubbish tests when in fact patients died from a multiplicity of other diseases.

STOP PRESS: As I was editing this paper, news came in that the CDC had updated its guidance on Covid-19 testing. It now says that individuals who do not have Covid-19 symptoms and have not been in close contact with someone that has the virus **DO NOT NEED A TEST.**⁴¹

It also states that individuals do not necessarily need a test even if they have been in close contact (within 6 feet of an infected person for 15 minutes) but do not have symptoms. Testing is also not needed for people with a high Covid-19 transmission area and attending public or private gatherings of more than 10 people without masks or social distancing.

This means that the country must be fully opened up in every area immediately – churches, music venues, comedy clubs, gyms, bowling clubs and so on.

Government admits faulty test data

In August the government was forced to admit that it had been double-counting test results. It seems that there was confusion caused by Pillar 1 tests (done in hospital) and Pillar 2 tests (done in the community). People were tested in the community and found positive, then going to hospital and tested again – hence the double-counting.⁴²

The result was 1.3 million results were discounted by the Dept for Health and Social Care between March and August. This was called ‘an adjustment’.

Eventually the CDC admitted that the data on the infection rate was flawed. The amount of people with the virus was much lower than they originally claimed. The director of the Harvard Global health Institute called this ‘*a mess*’.

The American Coronavirus Task Force also admitted that the national Covid-19 death count was much lower than previously reported. This was because Dr Birx affirmed Covid deaths of people ‘with Covid’ rather than dying ‘from Covid’.

Antibody tests⁴³

These are just as misleading as PCR tests.

Emphasis is placed on the presence of antibodies; so if you test negative then you are at risk. This is a lie. Currently only 6% of Brits have tested positive for antibodies, yet 99.9% of the population is not sick with this virus.

⁴¹ Rational Ground, Jennifer Cabrera, ‘New CDC guidelines are aligned with science’.

⁴² The Guardian, 14 August 2020.

⁴³ Thanks to Dr John Lee, The Spectator, ‘The coronavirus immunity riddle’, 29 August 2020.

The chief way that the body fights off a virus is by T-cell responses, which kill virally infected cells. Studies show that up to 60% of people never exposed to Covid-19 still had T-cells that reacted to the virus. That is, you don't necessarily need to have had the virus to be protected from it.

T-cells are very hard to measure. So no one is testing for them.

There is another recently discovered viral defence mechanism that operates entirely within cells: RNA interference (RNAi). If an RNA virus such as Covid-19 manages to get inside a cell, special RNA molecules are made by the cell that interfere with and hinder replication of the virus. This vital mechanism is not being tested for at all. There are other defence mechanisms.

What about people that died?

It is a fact that an unknown number (due to the various frauds) of people died from a horrible disease that was like a severe pneumonia which led to oxygen deprivation. I know of nurses that were distressed watching these patients die (though they were wrongly treated).

How does this square with: a) there is no new virus; b) the number of deaths in Britain this year is lower than normal?

We cannot find a definitive answer to this. The best guesses are:

- There is a new virus out there but it has not yet been properly isolated.
- There is an existing mutated coronavirus that worsens existing pre-conditions to lethal levels. Many medics are saying that the virus depresses the immune system and patients die of whatever their prior problems are.
- There is a virus that causes oxygen deprivation in a few people that are prepared for it; such as by gamma retroviruses imparted through flu vaccinations triggered by the virus.
- There is something else that is triggering oxygen deprivation such as 5G. [5G certainly causes this by damaging cells through vibration. Also many of the badly affected areas (Wuhan, Lombardy, New York) have initiated 5G transmissions.]

Without methodical scientific study being open to all causes and evaluating hard data, we cannot discover the answer.

The scary 'R' number

The mysterious 'R' number has been used by the government to drive draconian policies by overstating its usefulness.

The 'R' number is a measure of how many people someone with Covid-19 will infect, and it measures the supposed growth rate in infections. This is an arbitrary figure, variously measured, that is basically pointless. What are far more accurate and sensible are hard facts, such as actual death rates (not claimed Covid-19) or genuine hospitalisations.

The current SAGE⁴⁴ report affirms that the ‘R’ rate is now 0.9 to 1.1; when it gets over 1 measures are considered. However

- SAGE admits that ‘R’ cannot be measured directly so it is always uncertain.
- SAGE admits that different groups work out ‘R’ in different ways. Some use hospital admissions and death rates. But this data has a time-lag of up to three weeks, plus there is the unreliability of death rate figures (e.g. the patient actually died of a co-morbidity). Some use contact-pattern surveys of people’s behaviour. But this relies on people providing accurate returns and how does this relate to the spread of the disease anyway? Another system is based on consistent, regular sample testing – but the tests are useless, as I have explained.
- SAGE merges the results from all of these to give an estimated figure, which they admit may be unreliable.
- SAGE admits that local areas can have ‘flare-ups’ which are not representative of the surrounding area.

This is a shockingly poor method on which to base lockdown policy.

The ‘R’ number is meaningless.

The curve

The curve of the virus (a graph of its progress) has been the same in all countries – just as epidemiologists predicted.

There is no evidence of a second wave in any country (see later). The infection rose sharply and then gradually declined, just as all viral epidemics.

It seems that re-infection can occur, but this does not cause disease. Antibodies may wane but the body’s memory responses don’t. When necessary the body produces the antibodies it requires.

Survival rates

As you can see from the table below, the risk of dying from Covid-19 is minimal. Most of the population has over 99.99% chance of survival.

Chances of Surviving Covid-19				
Age	Female		Male	
	No underlying conditions	One or more underlying conditions	No underlying conditions	One or more underlying conditions
0-9	99.99996	99.9639	99.99996	99.9603
10-19	99.99 (numbers simplified from this point)	99.96	99.99	99.96
20-29	99.99	99.94	99.99	99.90
30-39	99.99	99.86	99.99	99.79

⁴⁴ Scientific Advisory Group for Emergencies.

40-49	99.99	99.81	99.99	99.69
50-59	99.99	99.36	99.98	99.21
60-69	99.95	98.76	99.88	97.99
70-79	99.82	97.60	99.52	95.65
80+	98.90	92.81	96.33	79.91

Medical response

Treatments that killed

I explain, in previous papers, that the official response to the alleged virus in Britain and America was shocking. This led to a number of whistleblower doctors and nurses accusing the medical systems of these countries of murder.

Initially antivirals were administered which worsen iron depletion and cause death (crashing iron levels is insane in dealing with a disease that causes oxygen depletion). For some inexplicable reason many patients were given morphine, which caused death.

But the main problem was intubation or the use of ventilators. This is a dangerous treatment at the best of times and the death rate is high due to collapsed lungs. In places where ventilation was used as a priority, like New York, the death rate was over 96%. The reason for doing this in America was financial; using a ventilator gained the hospital \$36,000 from the government. Also a Covid-19 diagnosis resulted in a \$12,000 grant.

Through fear and panic about infections, many ventilators were put in place wrongly killing the patient; some were done by untrained staff. Whistleblower medics reported this; some with secret filming.

Hydroxychloroquine

One has to ask the question why most government-based hospitals rejected the use of HCQ⁴⁵ with zinc and azithromycin, which had a 100% success rate in private hospitals where it was administered, and in nations like China, Singapore and South Korea. I/V vitamin C and D were also beneficial as were some other drugs. A graph of nations that used or did not use HCQ reveals that the case fatality rate of nations that did not use HCQ is multiple times greater than nations that did use it. The proof is in the data.

The essential message, later put out by many maverick doctors, is that there are good treatments and no need to fear. HCQ early (the first 5-7 days) on kills the disease stone dead. Patients in later stages may need more treatments and oxygen.

As well as the refusal to utilise a proven drug (HCQ) then came a smear campaign from various sources (including Fauci) stating that HCQ was dangerous or even that it killed people, when in fact it is a drug that is well-known and has been used safely for 65 years to treat malaria, rheumatoid arthritis and Lupus and is based upon quinine. It is approved as safe for children and pregnant women. These damaging studies were later proved to be fraudulent. One study used four times that approved dose and deliberately killed patients

⁴⁵ Hydroxychloroquine.

to smear the treatment. Another study in the Lancet was proved to be based on faulty data and had to be withdrawn. One of the studies used by Fauci from a Brazilian outlet was debunked. Ten studies opposed to HCQ were of patients in late stages of the disease.

The question is: why were governments and authorities trying to stop treatments that healed patients? Why also advocate a vaccine that has not even been safety tested or proved to be effective yet? Even if there were a safe vaccine (which many scientists claim will be impossible) why is it necessary if we already have effective prophylactic treatments and successful hospital therapies?

It was as if the authorities were trying to increase the number of deaths from this alleged disease.

Some doctors demanding the use of HCQ

Dr Harvey Risch

Renowned Yale epidemiologist, who published in May 2020 in the *American Journal of Epidemiology*, 'Early outpatient treatment of symptomatic, high-risk Covid-19 patients that should be ramped up immediately as key to pandemic crisis'. He asserts that there is unequivocal evidence for the early and safe use of the HCQ cocktail.

Dr George Fareed.

Dr Michael M Jacobs.

Dr Donald C Pompan.

[The three doctors above wrote an open letter to Anthony Fauci demanding that he reverses his condemnation (on false grounds) of the HCQ cocktail. Other doctors have accused Fauci of murder for preventing wide access to this cocktail that has been effective wherever it was used early on.]

Dr Steven Hatfill.

Dr Delores Cahill.

Dr Judy Mikovits.

Dr Vernon Coleman.

Dr Joseph Mercola.

The US Frontline Doctors group

1,000 doctors in Germany.

Multiple doctors worldwide.

There are 53 global studies that show positive results with HCQ against Covid-19.

Dr Fauci and the FDA are doing the same thing that was done in 1987 [the HIV/AIDS crisis]⁴⁶ and that's led to the deaths of hundreds of thousands of Americans that could have been saved by the usage of this drug [HCQ].⁴⁷

⁴⁶ There was a generic, cheap medication that treated AIDS which Fauci and the FDA rejected.

⁴⁷ Dr Harvey Risch, Yale school of public health epidemiology, Fox News interview, 24 August 2020.

Effects in a GP surgery

An anonymous whistleblower (corroborating other whistleblowers) explained the devastating effects of lockdown measures on a local surgery in London.

- The visit list disappeared (no home visits) as it is considered a risk to staff.
- No routine GP appointments until mid August, then 5 a day were allowed.
- As of 26 August, no GP face-to-face appointments. Patients have e-consultations via a website. Elderly and non-English speakers cannot do this so a telephone consultation is arranged.
- Due to this the phone lines are constantly engaged; patients cannot get through.
- Many patients begging for an appointment are denied.
- Reception staff are getting mentally ill from the daily crises that develop and dealing with patient's anxiety.
- There is no continuity care for patients.

The whistleblower then gives multiple examples of specific failures of health care by doctors, most of the stories are about suffering old people being treated badly.

The health care system has collapsed. Outstanding waiting lists are now at 15.3 million.⁴⁸ I predicted this catastrophic failure in February.

Surveys

According to the ONS two out of every five excess deaths (16,000 deaths) were caused by a lack of access to medical care.⁴⁹

Immunity

Government 'experts' lied about the immune response to Covid-19. They downplayed herd immunity, and downplayed the ability of the body to defend itself.

No novel coronavirus has been shown to exist. At most there is a new strain of existing coronaviruses that generally causes a mild response.

Fearful studies and models which predicted mass deaths failed to take into account pre-immunity and thus were shockingly wrong. For example the fatalities in Sweden (with no lockdown) were only 6% of those predicted by Ferguson.

The body has the ability to recognise Covid-19 as a similar coronavirus to others it has previously dispatched – and immediately fights against it, with no need for vaccines. Many in the population were already immune to Covid-19.

Studies back in April were already explaining this. In several closed communities the infection rate was capped at 20%. Statistically, this aligns with maximal infection rate in those communities. Studies published in *Cell* corroborated this; about 60% of people in California who had never been exposed to Covid-19 had immune memory cells that

⁴⁸ The Times, Peter Byrne, 'Coronavirus: NHS data shows 15m on hidden waiting list'.

⁴⁹ Mail Online, 7 August 2020.

recognised the virus and had immunity. A German study showed that such immunity could reach a level as high as 81% of the population.⁵⁰

The Brazilian city of Manaus showed us that the Covid-19 epidemic went into spontaneous decline when about 20% of the population developed antibodies regardless of lockdown or social distancing.

The evidential facts also back this up. The virus began infecting people 8 months ago and has spread across the whole world. Yet in all countries, the infection rate remains below 20% of the population. This limited rate of infection remains unchanged regardless of social distancing measures (if any), masks or lockdowns. In Sweden (no lockdown) the percentage of people who survived the virus exceeded 99.9%. Belgium is a similar case.

The argument that 60% of the population must be infected before there is herd immunity ignores pre-immunity and is also based on mathematical errors.⁵¹ A virus spreads in the population until enough people become infected and immune. A lockdown may slow its spread but does nothing to lower the total number of infections or overall mortality.

Flattening the curve can only be harmful since the infection returns once the restrictions are removed. Moreover, efficient protection of high-risk groups is possible only for a limited period of time ... Therefore, paradoxically, it is precisely lockdowns and restrictions that slow the building of herd immunity, which in turn is needed to stop the epidemic and protect high-risk groups. In the long run, such policy can lead to excessive mortality. ... In Sweden ... there is no second wave because there was no lockdown.⁵²

Summary

- There is pre-immunity to Covid-19 in as high as 81% of the population.
- The infection rate was always capped at 20% in all countries; only 1 in 5 people will be infected.
- In all cases in all countries over 99.9% of the population survived.
- The media has ignored this vital information and instead spread fear.

Factors of the lockdown measures

The lockdown was the worst policy to combat a viral epidemic. This is now obvious and the CDC have reversed their policy on lockdown measures (now the damage has been done) and admitted that Covid-19 does not spread easily from touching surfaces. Even Andrew Cuomo (Governor of New York) confirmed a recent health study showing the 70% of new infections originate in the home – making quarantine a stupid policy as a breeding ground. Even the WHO had to eventually admit that transmission of the virus by asymptomatic people was very rare – but this was the reason for a lockdown in the first place.

Norway, Ireland and Belgium have already declared that they will not impose further lockdowns as the damage done greatly outweighs any dubious benefits. Why is the British government still imposing local lockdowns and threatening more?

⁵⁰ Michael Levitt, Haaretz, 'Countering the second wave with facts, not misconceptions'.

⁵¹ Michael Levitt, Haaretz, 'Countering the second wave with facts, not misconceptions'.

⁵² Michael Levitt, Haaretz, 'Countering the second wave with facts, not misconceptions'.

The WHO guidelines, published in 2019, formally state that lockdowns and social distancing should not be effected during a pandemic or an epidemic.⁵³ It says, '*Not recommended in any circumstances: contact tracing, quarantine of exposed individuals, entry and exit screening, border closure*'.

In our analysis, full lockdowns and widespread Covid-19 testing WERE NOT ASSOCIATED WITH REDUCTION IN THE NUMBER OF CRITICAL CASES AND OVERALL MORTALITY.

The Lancet, 'Covid-19 policies and health outcomes study', July 2020, p5.

Tracing

A 2019 WHO study showed that contact tracing is not recommended in any circumstances. Why is it now mandatory?

Who is accountable for the wasted £10 billion⁵⁴ the government spent on a failed IT track and trace system?

When herd immunity is achieved, the virus threat is over. What possible point is there in track and tracing?

Temperature tests

It is now mandatory to be subject to your temperature being taken in many situations (dentists, GP surgery etc.). This is done by a laser device that is pointed point blank at the centre of the forehead.

Lasers must never be pointed at the forehead, especially in babies or children. Yet people are lining up in shopping malls to have this done and some are having it done several times a day.

This is a dangerous practice that can damage the brain or especially the pineal gland in the centre of the forehead. This is a pea-sized conical mass of tissue behind the third ventricle of the brain, which has important functions.

The pineal gland is a vital part of the body's endocrine system, which produces the hormone melatonin. Melatonin affects multiple body functions, including the immune system, and is a powerful antioxidant. The pineal gland connects the endocrine system with the nervous system, containing cells of both types.

If you are affected by this practice, demand that they point the laser at your wrist or the fold of your elbow. This is a better reading anyway since the forehead can be up to one degree cooler than the body's real temperature.

Another issue is that we are getting children to get used to having a gun pointed at their head. What is this doing psychologically?

Death certificates

The government changed the notifiable disease on death certificates to include Covid-19 but not flu. Doctors were pressurised to certify patients died from Covid-19 when their actual reason for death was something else. Patients claimed to have Covid-19 were said to have died from it, which is something different (association is not necessarily causation). People dying from road traffic accidents were listed as dying from Covid-19.

⁵³ WHO, Table 1, 'WHO advice on pandemic and epidemic', October 2129.

⁵⁴ The Times, quoted in Lockdown Sceptics, 8 August 2020.

The death statistics for Covid-19 are basically meaningless. The fact that the inflated death rate is less than the five-year average shows that there was no Covid-19 epidemic; the panic was caused by faulty statistics and scaremongering.

Empty hospitals

The forced quarantine of the healthy was supposed to stop hospitals being overrun. In fact, hospitals were largely empty. In many cases hospital staff were sent home because they had nothing to do. Some private hospitals in America went bankrupt because they had no patients. Non-Covid wards were empty. The Nightingale tent hospitals were not used and were empty, apart from the London one that had 59 patients (but other London hospitals had empty wards).

Hospital workers were so bored that they arranged flash-mob dance routines and uploaded them to Tik-Tok (a disgrace). While citizens clapped health-care workers, most of them failed to do their normal work since all hospital treatments, except emergencies, were cancelled. This certainly led to thousands of needless deaths and unnecessary suffering. The only busy staff were ICU and A&E workers. The nation applauded medics who failed to do their job or to protest the government's measures.

NHS statistics for available beds showed that there were more available than ever before.

How can there be a pandemic when the hospitals were largely empty?

Many weeks after herd immunity was achieved, hospitals are still stopping people using their services and halting treatments. Consultations are now mostly by 'phone and Skype – and this is said to continue. Doctors surgeries are now mostly by telephone. All of this is downgrading the medical community and the contract between health-care workers and patients.

If you manage to get to see a doctor, you have to go through a stupid process that resembles vetting for Bubonic Plague or Ebola. You have to queue outside and speak to a receptionist by intercom. You are medically surveyed, hand sanitised, temperature taken and forced to wear a mask (I ignored all of these things). Only a few patients are allowed in at a time (hard luck for the other sick people left in the rain) and only a few seats are available. When you get to the doctor he will be wearing a full visor, surgical gloves and a plastic apron (as if that will stop a virus). Today I saw my doctor and he struggled to read the computer because he wore spectacles and had the plastic visor.

All of this nonsense is to increase a sense of fear and panic.

Facemasks

For information on this topic see my paper, 'Mask-erade'.

It is a fact that wearing facemasks have killed people (at least two so far).⁵⁵ It poses great danger in causing blood-oxygen deprivation, raised blood pressure, inhalation of CO₂ and a large buildup of a toxins and bacteria on the surface. Images began to appear on social media of people covered in spots from staph infections caused by masks.

⁵⁵ Vernon Coleman, 'Why the Coronavirus Hoax is a Hoax', 9 August 2020.

Facemasks are of no use whatsoever against a virus. Even Anthony Fauci originally stated that facemasks were of no use in combating a virus. Facemasks can make you very sick but they are also a sign of slavery⁵⁶ and compliance.

Quarantine / concentration camps

It seems that the next stage of government control is to isolate people in quarantine camps.

Fantastic as this seems it is already happening in New Zealand under its fascist premier, Jacinda Ardern, and this seems to be a trial run for the rest of the world. Ardern has also postponed the planned elections.

First, the government outlawed private firearms to stifle any rebellion, then it illegally mandated quarantine camps for people who might be infected with Covid-19. The Prime Minister even stated that some people may never be allowed to leave. This is equivalent to the Nazis rounding up Jews in camps and ghettos. The unreliable testing methods are the basis for locking people away in preparation for a global vaccine depopulation exercise. The quarantine will be of positive cases and also close family members.

In the camps, every activity of people is monitored. Those that refuse testing will be kept in quarantine for longer periods or even indefinitely. Just imagine considering this fascism when the 'pandemic' began in January. No one would have believed it possible to fall into totalitarianism so quickly. Many are speculating that these camps will be turned into death camps.

Canada has also warned that non-compliant people will be arrested and involuntarily quarantined. Isolation chambers for suspected virus infected people are being built already in Canada in preparation for a general lockdown in the autumn.⁵⁷

In America this is called 'Non-Congregate Sheltering'. So far Covid cases have been placed in hotels dedicated for this purpose. There are claims that camps are also being built; film of open human cages with toilets in Caruthers, California has been published. New York State is considering Bill A99 which allows the state to take an individual suspected of having Covid-19 (plus their contacts and other carriers) to a detention centre and there compelled to undergo compulsory medical treatment, including forced vaccination. This is no conspiracy theory; I have seen the bill.

People with pre-existing medical conditions, such as diabetics and kidney disease patients, will suffer very badly in a quarantine camp where they will not get their necessary needs met, such as specialist diets.

Health officials are already signalling that the death rate from the virus is going to rapidly increase in the autumn (why, if herd immunity is gained?).⁵⁸ It seems that the elite is planning a mass death event blamed on a fake virus that kills fewer people than flu.

⁵⁶ Historically, many slaves were forced to wear face masks of various sorts, including iron.

⁵⁷ Odessa Orlewicz, Liberty Talk Canada, video (deleted from YouTube). The facility is being built by Onyx Inc.

⁵⁸ See Dr Theresa Tam, Canadian Director of the Centre for Emergency Preparedness and Response. CDC director Robert Redfield.

There is no second wave

The government has claimed that there is a second wave that demands a new set of isolationist directives. These are said to possibly include: opening schools but closing pubs or even closing shops (why?) as well as halting the easing of lockdown (stopping casinos, skate rinks etc. from opening). Yet by the end of July supposed Covid-19 cases had fallen by 96% since the peak.⁵⁹

There have also been a number of regional lockdowns in the north (Leicester, Manchester, Aberdeen etc). The reason is claimed that there is a spike of infections in each area.

The truth is that there is no spike.

The cause of the panic is the increased number of tests carried out, which we know give false positive readings. The government overacted and misunderstood the data. Taking into account the rise in tests and adjusting for that, the cases of infection are going down not up.

The ONS provided data on 31 July supposedly showing an increase in the number of infected people from 0.05% to 0.09% of the population if you compare the period 29 June to 12 July. Sounds ominous, but the raw statistics are that only 5 more people tested positive. In the penultimate two-week period 31,542 people were tested and 19 tested positive. In the more recent period 28,325 people were tested of whom 24 tested positive. The alarming surge or second wave which demanded more lockdowns was only five people.⁶⁰

Professor Carl Heneghan (Oxford Prof. of Evidence-Based Medicine) stated that the increase in cases, in Manchester East Lancs and West Yorks, that led to Matt Hancock quarantining 4.5 million people, disappears if you control for: a) the date the tests were taken rather than when the results came through, b) the increase in Pillar 2 testing.⁶¹

New data from Imperial College and Ipsos Mori studied the largest swab-testing survey in the country. This showed that infections FELL as the lockdown eased up. *'There was no overall rise after primary schools returned and non-essential shops reopened. [In fact] ... community prevalence actually fell after lockdown measures were relaxed decreasing from 12 infections per 10,000 people in May to 8 in 10,000 by mid-June to early July.'*⁶²

It seems that the weakest data, actually no data, is enough for power-mad politicians like Matt Hancock to close down society and further damage the economy. We are led by fools.

Despite obvious facts (such as the three major Devon hospitals having no Covid patients at all and empty wards), there are rumours that banks have been told that a second lockdown will take place on 18 September. Due to the complete collapse of hospital treatment, this winter will see a surge of deaths – but not from Covid.

More pointless lockdowns

On 21 August new restrictions were announced for Oldham, Pendle and Blackburn as a result of 'viral outbreaks'. Residents are forbidden to associate with anyone from outside their household.

⁵⁹ The Sun, Dan Wootton, 10 August 2020.

⁶⁰ Lockdown Sceptics, 4 August 2020.

⁶¹ As reported in the Telegraph, 3 August 2020..

⁶² The Telegraph, Sarah Knapton, 6 August 2020.

However, graphs of cases show that the epidemic is falling, not rising.

Carl Heneghan and Jason Oke wrote a paper for the *Centre for Evidence-Based Medicine* blog on 20 August urging the government not to introduce more restrictions in Oldham. They argued that the decisions on lockdown should be based on hospitalisation and death data, not case data. This data shows that 1,252 beds are occupied across the Pennine hospitals of which a mere 9 are occupied by Covid patients as of 9 August. At the peak of the crisis only 290 beds were occupied by Covid patients; 9 is nothing. Data also shows that admission is low at 3-4 patients per day.

Birmingham has also been added to a watchlist of an 'area of enhanced support'. However, Birmingham has 31 cases per 100,000, which is lower than London (50/100,000).⁶³

The latest infection survey also shows that there is no increase in cases above the previous week. There is also no difference in Covid infection rates between different regions.

All this shows is that the government is intent on continuing to spread fear and threatening a second lockdown in the autumn. The facts do not justify the policy.

PostScript

As I was editing this paper Scotland introduced more lockdowns around Dumbarton and the wider area and Matt Hancock was still threatening more lockdowns this autumn.

Since there is no evidence of significant deaths or hospitalisation from Covid-19 this makes no sense. In addition, doctors and scientists everywhere are saying that lockdown are wrong plus the CDC and the WHO are now agreeing – they cannot afford to ignore the hard data. This means that there is a political impetus for lockdowns that has no basis in fact, and this agrees with the totalitarian plans of the elite for societal change (see later).

It is now alleged that the 5G antennae that were installed everywhere during the lockdown are going to be switched on in September and October. It is a scientific fact that at the right frequency and wattage, 5G towers are capable of killing or injuring all life forms. This is not a conspiracy theory it is empirical science.⁶⁴ Even birds know this. See videos of multiple bird types, from raptors to songbirds, attacking 5G towers that are operational and trying to dismantle them. They know something is attacking them.

The 5G frequencies have the power (at the right wattage) to cause the water in cells to vibrate (like a microwave oven) and the net result is oxygen deprivation. Over a long enough period this causes death. Over a shorter period, or at a less powerful wattage, it causes sickness, bleeding, headaches, breathlessness, fits, foetal damage, and so on.

The allegation is that a second wave will a) be partially initiated by the normal flu season that is coming; b) 5G radiation causing the same symptoms as Covid-19 (chiefly oxygen deprivation).⁶⁵

I have no data to determine how true this is. What I do know is that I have seen the erection of many 5G towers in my area in recent months and at the right wattage they can cause harm. Whether there is a conspiracy to create a second wave, I cannot say. But it appears that politicians are determined to create one.

⁶³ ONS Infection Survey.

⁶⁴ I am slowly working on a paper on this.

⁶⁵ Hypoxaemia (US hypoxemia): an abnormally low concentration of oxygen in the blood.

Public perception of the danger of the pandemic

As a result of relentless media scaremongering for months, the general public believes that the epidemic is huge and a threat to their life. This has led to breakdowns in social intercourse. In America a woman maced a man because he was not wearing a facemask. In Britain people have been attacked for not wearing a mask; e.g. by crutches or walking sticks. People have been drummed out of supermarkets by a baying mob for not wearing a mask. It is routine to be called a murderer if you don't wear a mask.

The truth is that the mask wearers are causing more medical problems for themselves and masks offer no protection against a virus.

Here are some statistics.

Issue	Public perception	Official figure
Deaths in the USA from Covid-19.	9% of the population (nearly 30 million people).	155,000 people. [This is an inflated figure.]
Deaths in the UK.	7% of the population (5 million people)	0.08% of population. Less than 50,000. [This is an inflated figure.]
Deaths worldwide.	Many millions.	740,296 as of 11 August – but this is highly inflated.
Number of cases worldwide.	5-20%.	0.28%. [This is an inflated figure.]
Number of cases in UK.	22%.	As of 7 August 0.05% of the population is infected (ONS). [The actual number of cases is far fewer.]
Number of cases in US.	20%.	This is 20 times the confirmed cases stated by the CDC.

Source: KEKST CNC poll: 'Research report, Covid-19 opinion tracker', 10-15 July 2020, edition 4.⁶⁶ ONS. Worldometer.

British people think that about 100 times more people died from the virus than actually did.

Note that the official figures suffer from vast inflation due to fabricated death certificates and useless testing stats.

Architects of lockdown measures

See my paper, '*The truth about the lockdown*' which shows the financial connections between medical and science advisors to the British government and the Big Pharma vaccine makers or to the Bill Gates Foundation or to Gates' vaccine organisation GAVI. If a vaccine emerges as the government's response to this fake pandemic, Big Pharma stands to make trillions of dollars.

⁶⁶ Covid19research@KekstCNC.com

Government mistakes

There are so many of these; please read my previous papers on the lockdown for many of them. Essentially, just about every decision made by the government was the opposite of what should have been done. It is now universally accepted (on both political sides) that the government has been useless in dealing with this situation. Here are some:

Deliberately damaging care homes and killing old people

40% of claimed Covid deaths, up to 12 June, were care home residents. The Health Minister (the useless Matt Hancock) was warned not to fail to protect care homes, which he then failed to project. Worse he told hospitals to send people sick with the virus into care homes where many more died unnecessarily. This is tantamount to manslaughter.

Publishing false data on the epidemic and failing to audit it properly

Virtually everything published was faulty or fraudulent; the tests are useless. The 'R' number is pointless. The number of cases is far lower than claimed. The hospital cases are far lower than claimed as other causes of death were listed as Covid. The death statistics was faulty because people with Covid were claimed to have died from Covid. The death certificates were altered with no scientific basis and flu was not listed.

Causing more hysteria by scaremongering about a second wave which is non-existent

The expanding tests have created more false positive results that drive this narrative when the truth is that there is no second wave. Deaths from Covid and hospitalisations are now virtually zero.

Failing to carry out a proper risk assessment of the social and economic damage caused by a lockdown

This is a really basic failure of leadership. Who in their right mind kills an economy and thousands of people just because there is an epidemic, which turned out to be less than a bad flu season.

Initiating draconian measures that had no point

I.e. facemasks and social distancing that continue to damage businesses and restrict services (e.g. banks) when they have no effect whatsoever on stopping viral transmission. In any case, infection from surfaces are rare and asymptomatic people do not transmit the disease.

Closing schools

Early on it was discovered that children are at a very low risk. Few get the disease and those that do have mild symptoms. Severe cases are very rare. So there was no necessity to close schools and ruin kid's lives. Only two British children aged between 5 and 14 have died of Covid. This means that dying of a lightning strike is more likely for this group.

Screw up the exam marking system

This was a catastrophic failure. After ruining children's schooling at a crucial point in their lives, the government failed to establish a credible marking system to take into account the child's likely success rate in exams. Calamitous 'A'-level results then emerged causing national meltdown.

Over-reliance upon experts that had vested interests (in the pay of Bill Gates)

Surely sane government would get a wide-range of medical experts in a room and debate all possible outcomes. This was never done. Many globally admired epidemiologists warned the government about the dangers of a lockdown and the government ignored

them and followed vested interests like Imperial College (funded by Gates) and fatally flawed computer models. Even Oxford professors like Sunetra Gupta and Carl Heneghan were ignored. Why did Bill Gates have a private session with Boris Johnson at the beginning of this crisis (which was kept secret) but senior epidemiologists were not consulted?

Failing to quarantine travellers from Covid hotspots on planes.

Indeed, the government actually arranged to fly many in (such as Eastern European vegetable pickers) with no proper medical examination.

Failing to resource medics with proper equipment early on.

Many well publicised failures in this department.

Censorship

Note that scientists and doctors that are opposing the establishment narrative about the epidemic are being denied a voice and sidelined. In Britain, doctors and nurses have been warned that if they speak against the government narrative they will lose their job. This is not scientific process but state control.

All over the world doctors and nurses have been going public denouncing the pandemic narrative and exposing malpractice in hospitals. Some of these used hidden cameras to film events in hospitals in real time. All these whistleblowers found that they were censored by the Big Tech companies like Google, Facebook and Twitter. These companies deleted the videos as soon as they were uploaded. This proves, by the way, that Big Tech is in cahoots with Big Pharma and the plans of the global elite.

A group of eminent US doctors joined forces as ‘The Frontline Doctors’ to draw attention to the lies about the pandemic and particularly the efficacy of HCQ as a prophylactic. The speeches they gave got millions of views until Big Tech deleted them. So they did a press conference in the open air in front of Congress with a broadcaster and repeated their concerns.⁶⁷ Their aim was to try to reassure the public that there are effective treatments and diminish the fear that exists. How can that be threatening to the establishment?

In some cases doctors that saved scores of lives with HCQ were arrested or threatened yet doctors in New York that killed patients with wrong treatments were ignored.

- Prof Johan Giesecke (epidemiologist).
- Prof Sunetra Gupta (Professor of Theoretical Epidemiology).
- Dr John Ioannidis (Professor of Medicine).
- Prof Knut Wittkowski (epidemiologist).
- Dr Stella Immanuel (GP).
- Dr Joseph Varon (Chief Medical Officer).
- Dr Dan Erickson.
- Dr Anders Tegnell.
- Dr Pablo Goldschmidt.
- Dr Karin Molling (virologist).
- Dr Eran Bendavid.
- Dr Jay Bhattacharya.
- Dr Tom Jefferson (epidemiologist).
- Dr Michael Levitt (biochemist).
- Dr Richard Schabas (Chief Medical Officer).
- Dr Carrie Madej.
- Erin Marie Olszewski (whistleblower nurse).

The list of doctors coming forward and new organisations appearing to combat the false narrative is growing daily (except in Britain where medics are under threat of sanctions).

Lockdown effects

I stated from the beginning that the lockdown would kill more people than the epidemic, and I was right. More and more data is coming in proving this. Even the British government has admitted on at least four occasions, that the lockdown has killed as many people as the virus. The full effect of this won't be known until statistics are compiled for the whole year regarding needless deaths from other causes due to cancelled medical treatment or direct effects of isolation and unemployment.

Other factors emerging

Mental health

- Anxiety calls to US healthcare lines up 1000%.⁶⁸
- Emotional distress and suicide increased. Suicide calls in US up 600%.⁶⁹ By July, CDC director Robert Redfield said, '*We're seeing far greater suicides now than we are deaths from Covid. We're seeing far greater deaths from drug overdose*'.⁷⁰
- Alcohol abuse up.⁷¹
- Eating disorders and mental health issues are soaring.⁷²
- In a 20 July report, the American medical Association revealed that over 35 states have reported an increase in '*opioid-related mortality*' as well as ongoing concerns about mental illness.⁷³

⁷¹ Breitbart, Dr Dan Erickson, 27 July 2020.

⁷² The Sun, Dan Wootton, 10 August 2020.

- Sharp rise in fear. [Note people driving while wearing a mask.]
- Sharp rise in irrational aggression caused by the lockdown and fear (such as attacking non-mask wearers or people considered as too close in proximity).

Factors involving children

- Child abuse increased.⁷⁴
- More children died of other medical issues than Covid-19 because they did not attend hospital.⁷⁵
- The UN estimated that 10,000 children are dying every month from hunger caused by epidemic measures.⁷⁶
- Child admissions to A&E fell by 50% in the lockdown.⁷⁷
- Children get access to a lot of mental health services through schools. Closing the schools denied this access when it was needed most. As a result many children are suffering from anxiety, paranoia, depression and other mental issues.⁷⁸

Failed hospital treatments

- In America, 150,000 people a month not receiving cancer screening.⁷⁹
- Over 30,000 people are living with interminable pain waiting for hip and knee operations.⁸⁰
- 40,000 are facing cancelled treatment for cataract surgery.⁸¹
- 10,000 are waiting for hernia repairs.⁸²
- In the 18 weeks since 23 March (lockdown) 3 million people missed vital cancer screenings. 315,000 fewer people than normal received urgent cancer referral and there were 38,000 fewer treatments.⁸³
- Karol Sikora (senior oncologist and co-founder of Rutherford Health) estimated that there could be 30,000 excess deaths from cancer in the next ten years.⁸⁴
- Cancer Research UK estimates that 2.4 million people were waiting for cancer screening, tests or treatment the end of May. There is a backlog of 2.1 million people waiting for breast, bowel or cervical screening.⁸⁵
- The Royal College of Surgeons state that 2 million operations have been delayed.⁸⁶
- The number of heart attacks detected and treated fell by 40%. The number of deaths from heart attacks rose by 40%.⁸⁷

Unnecessary deaths

- Lockdown has killed 21,000 people unnecessarily.⁸⁸ This figure will definitely rise as more research is conducted. The government was warned that it could kill 200,000 people.⁸⁹ 100s of millions will have died globally of starvation.⁹⁰
- Oxfam warned that the lockdown could kill 12,000 people per day globally by 2021.⁹¹

Employment

- Over 139,000 jobs were lost in Britain in June.⁹²
- Nearly a million British jobs lost throughout the lockdown up to August.⁹³
- 200,000 over-50s have dropped out of the workforce and may not return.⁹⁴
- Economists predict that unemployment will skyrocket beyond the 3 million mark of the 1980s.⁹⁵
- 50 million workers were laid off in America.
- Unemployment in the US rose from 3.5% to 14.7%.
- In the US 60 million were placed on food stamps.

The economy

- UK debt hits £2 trillion for the first time. At the end of July debt rose to £2.004 trillion. For the first time since 1960 debt has reached 100% of GDP.⁹⁶
- Britain is officially in a recession. There was a 2.2% contraction in the first three months of 2020 and a 20.4% drop in the quarter April to June – making it officially a recession (a drop for two quarters).
- The UK has the deepest recession among the top economies. It is worse than Germany, France, Italy or the USA. It is expected to be worse than Japan and Canada when they post stats.⁹⁷
- The economy shrank by a fifth in the second quarter alone. This is worse than anything since records began in 1955.⁹⁸
- As lockdown eased the economy grew by 8.7% in June; a small rise after a deep plunge. Recovery is hindered by the reliance upon services – which necessitate close interaction of people and are damaged by social distancing policies, which continue.
- \$6 trillion was added to the American national debt.
- The gap between rich and poor widened by 46% in a year.⁹⁹

Were all the government measures designed to deliberately damage people?

While this will seem shocking to some, the simple fact is that all the government measures have actually hurt people, and continue to do so. Another fact is that all the measures taken were planned long before and simulated in various conferences (see next). Lockdowns, for example, were not activated by medical necessity but were decisions taken by elite figures like Bill Gates years ago. Let's look at a few of these.

The lockdown

I have explained this many times, the lockdown was the very worst approach to take to counteracting a virus epidemic. You do not quarantine the healthy but rather the sick and the vulnerable (like old people). See previous papers where I outline all the deleterious damage done by the lockdown, especially to old people where care homes became virtual euthanasia centres due to stupid policies.

- The lockdown has certainly killed and injured more people than the epidemic.
- The lockdown caused a sharp rise in domestic abuse, especially of women and children.
- It created serious psychological problems including: depression, anxiety, paranoia, claustrophobia and even suicide, the rates of which skyrocketed.
- It put many people out of work; with the knock on medical and psychological effects.
- It bankrupted many small businesses, with the obvious medical and psychological repercussions.
- It crashed the economy, which will have lasting deleterious effects on the poor.

Hospital policy

Just about everything the government did was wrong.

- It focused hospitals on Covid-19 as a panic measure before any facts were available to suggest that it was a serious issue and when epidemiologists warned otherwise.
- It closed all other hospital departments and wards before there was any demand to do so.
- It built Nightingale tent hospitals that were never used.
- It terminated all normal hospital treatments except A and E. This in itself has caused tens of thousands of deaths from a lack of treatment for cancer, sepsis, TB, heart disease, stroke, hepatitis and other diagnoses. It caused unnecessary suffering to thousands who could not get necessary treatment they had long waited for.
- It actually sent patients sick with 'confirmed' Covid-19 into care homes where many people needlessly died as a direct result.
- It refused treatment to sick elderly people, refused to take them to hospital and made them sign DNR¹⁰⁰ forms. DNR agreements are now required for anyone over 60 (why?).

Facemasks

See my paper on facemasks. People are collapsing in the street and even dying as a result of long term use of facemasks; there is no official record of these deaths. These muzzles have absolutely no effect on stopping a virus infection but do:

- Inhibit oxygen intake. Headaches result, along with cell damage.

¹⁰⁰ Do not resuscitate.

- Exacerbate CO₂ intake.
- Create a build up of toxins, particulates, viruses, bacteria and debris, which then gets inhaled. See many photos and videos on social media of faces covered in spots / lesions from staph infections.¹⁰¹
- Suppresses the immune system.
- Causes breathing difficulties.

They do no good whatsoever in a virus epidemic but do cause medical damage. They were deemed unnecessary at the height of the epidemic but are mandated now that no one is dying from it. Is that not weird?

Social distancing

Social distancing of six feet does absolutely nothing to stop an airborne virus, which spreads throughout an environment quickly. However, Covid-19 was confirmed to not be transferred by short-term surface contact anyway. People close to each other in the open air were unlikely to be infected, as the virus required long-term close contact indoors.

Thus the social distancing demands in shops was pointless. However, the long queues at every shop that developed were a real problem for many vulnerable people in the community. Unless they had a friend or family member to get stuff for them, they were left high and dry.

Closing schools

This was utterly pointless since it was known early on that children rarely catch the virus and even if they do the symptoms are minor. However, the collapse of the education system has done immense damage to children, some of which will never recover.

The psychological damage being inflicted on children is immense and yet to be quantified. Their education is being ruined. Isolation policies cause psychological damage. Some kids are literally being put in plastic boxes at school, segregated from classmates, socially distant, and forced to wear masks. This is insane.

Temperature tests

As mentioned earlier, these are directing a laser beam at point blank range directly at the pineal gland, which is very dangerous and can cause numerous health problems, including a damaged immune system.

Summary

Just about everything that the government did as a response to this fake pandemic caused severe damage to whole strata of the population. The question is: was this done deliberately to harm people or was the government completely stupid? It has to be one or the other as all the policies were so bad and would obviously damage the economy and the population, as many warned beforehand.

¹⁰¹ Staphylococcus: a bacterium of a genus that includes many pathogenic kinds that cause pus formation, especially in the skin and mucous membranes.

Indicators of growing totalitarianism

Anti-democratic measures

Jacinda Ardern has suspended the forthcoming elections in New Zealand due to the virus. Why? People can easily vote with social distancing strategies.

Victoria, Australia introduced curfews and limited travel to 5 miles as late as August when the virus was over.

In Melbourne children can be removed from parents.

A federal court in Washington unilaterally suspended the 5th Amendment right to due process, and the 6th Amendment guarantee of a speedy trial.

California overturned the 3rd Amendment by using governor executive powers to take over private hotels, motels and medical facilities to quarantine virus patients.

The mayoress of Champaign, Illinois, planned to violate the Bill of Rights to ban the sale of guns, ammunition, gasoline, alcohol and utilities, close bars, restrict access or egress from the city and take possession of private property.

Newark, New Jersey, warned that promoting false information (i.e. non-government propaganda) would result in prosecution.

New York City mayor, de Blasio, called for the nationalisation of industry and factories.

The US Model State Emergency Health Power Act (drafted by the CDC) allows government to: quarantine, force vaccinations and mobilise the military to enforce this.

Australia has activated its emergency pandemic plan giving the government power to cancel public events, force people to work from home, close children's childcare centres and impose other mandates to restrict citizens.

The Swiss Federal Council has declared a special situation whereby councils can issue emergency police ordinances, normally illegal, which include mandatory vaccines, quarantines, closure of institutions and banning events.

Concentration camps

New Zealand illegally introduced quarantine camps that included indefinite lockup for those that refused virus testing. This was challenged by a lawyer, so PM Jacinda Ardern passed a new law allowing this dictatorial policy several days later.

Canada and America are working on doing the same thing.

Gestapo-like police actions¹⁰²

A police chief in Australia stated that anyone violating curfew orders (including no travel beyond five miles) would have their car windows smashed and the driver pulled through the window.

A British police chief stated that they would create roadblocks to police social distancing and would search the bags of shoppers for wrong purchases.

¹⁰² See previous papers for sources.

Various people (including women) have been thrown to the ground by police and a chokehold put on them for not wearing a facemask. In one Melbourne case a teenage girl was literally attacked by a male police officer, manhandled to the ground, straddled by the officer, put under a choke hold, then assisted by between 6-8 police officers and several cars on blue lights, and arrested for resisting arrest (she did not but was attacked first) - all because she had no face mask but had genuine medical reasons not to wear one. The video is horrifying.

People wild-camping in Britain have been arrested by the police for breaking social distancing rules.

British police smashed into a man's flat, breaking the doorframe, on suspicion of breaking social distancing rules (this was illegal). In fact, the man was alone. He filmed the whole scene and uploaded it to YouTube.

Multiple British people have been arrested for breaking social distancing regs by walking in parks.

Local lockdowns

As well as a national lockdown, now eased, the British government imposed local lockdowns affecting millions of people who were put into complete isolation. As explained earlier, there was no scientific justification for this whatsoever.

A fast-tracked vaccine

The more you study the facts about vaccines the more you realise that they are dangerous. Since the late-1700s they have been killing and injuring huge numbers of people. Edward Jenner was ridiculed in the early 1800s for killing more people than he healed with vaccines.

The real problem with vaccines is the ingredients that they put directly into the bloodstream with no ability of the body to stop anything dangerous (they by-pass the normal body barriers). These ingredients include multiple toxins like: formaldehyde, mercury, Polysorbate 80, aluminium, aborted baby cells, animal DNA etc.; many of these are carcinogens or just poison. Why would anyone ever inject a highly toxic substance like mercury or aluminium into a baby?

However, I cannot discuss vaccines in detail here. What is necessary to explain is that something new is being done with the Covid-19 vaccine. This is the use of recombinant DNA / RNA cells to literally change the body's genome. This has never been done before. It is using genetically modified technology in humans. The vaccine is designed to make us into genetically modified organisms.¹⁰³ This is going to change what it means to be human. No one knows exactly what this will do to humanity.

The current leaders in making a new vaccine are Moderna and Inovio, and GSK (see previous papers and later). Most are funded by Bill Gates.

Vaccine trials are being fast tracked at a rate never seen before in history. There are no randomised placebo trials; the makers have been allowed to neglect this. Scientific methods are being abandoned due to supposed haste to find a cure. They are also exempt

¹⁰³ Dr Carrie Madej, YouTube, 'Crucial medical doctor concerns on the forthcoming Covid-19 vaccine', 20 July 2020.

from proving that they will cure Covid itself. They just have to prove that the vaccine is producing antibodies.

Vaccines often require 20 years of development and testing before being released. The supposed Covid vaccine is being developed and released in a few months. This alone should make people afraid. But they are also using aborted baby cells (MRC5 foetal cell lines) which they call ‘immortalised cell lines’ or ‘deployed cells’ which in fact means cancer cells. These are also used in MMR and other vaccines.

What’s worse, the vaccine makers have been given indemnity against lawsuits. They can kill people and no one can do anything about it. They have been given an open book to do anything they want. In the Swine flu epidemic, the vaccine killed and injured (mostly paralysis) more people than the flu – and the result was lawsuits costing billions. This is why Big Pharma pursued indemnity laws and got them.

The vaccine is also going to be used to implant biomarkers and even nanobots, which are all to do with population control and surveillance (ID-2020; see previous papers).

Apart from the fact that many doctors have said that a vaccine for this virus is impossible (as it was with SARS-Cov-1) because it mutates so fast, there are many valid reasons to believe that the planned vaccine is highly dangerous and its real purpose is not healing.

The corruption of the vaccine corporations¹⁰⁴

The most corrupt corporations on earth are the ones creating vaccines. Why should anyone trust them? The development of these vaccines is being done in secret, rather than in collaboration, and the motive is profit.

The six corporations involved are: Johnson and Johnson, Pfizer, Moderna, GSK, AstraZeneca, Novavax, plus two Chinese companies. All six western firms have backgrounds of impropriety. Four of the six have been convicted of criminality; including: falsifying research, bribing doctors and regulators, marketing drugs for children for conditions not approved of by regulators, manipulating the stock market, false advertising and more.

Johnson and Johnson

- Has multiple lawsuits against it claiming its baby powder products cause cancer.
- The Press found that the company knew since 1971 that asbestos was contained in its baby powder.
- Despite US court rulings against the firm, it continues to sell the products overseas.
- The company has been convicted by the US Security Exchange Commission of wide-scale systemic bribery (violating the Foreign Corrupt Practices Act) and is still under new investigations.
- Accused of bribing Iraqi terrorists to win contracts.

Pfizer

- Agreed to pay \$460 million to settle charges alleging bribery of doctors and health-care officials to gain regulatory approval for drugs.
- In 2018 an article claimed the company funded Iraqi terrorists.
- Pfizer will get \$2 billion for a coronavirus vaccine under Operation Warp Speed (the US project to get a quick Covid vaccine).

¹⁰⁴ I acknowledge some help here from Tony Cartalucci, Land Destroyer Report.

Moderna

- Is accused of manipulating the stock market (insider trading) to assist its aim to be the first to market a Covid vaccine. The watchdog said that the company had exploited virus fears to boost the firm's value and the accounts of executives.
- Has received \$483 million from the US government for a vaccine.

GSK (GlaxoSmithKilne)

- It was convicted of the largest human healthcare fraud case, which resulted in 2012 in a \$3 billion settlement.
- The firm targeted the antidepressant Paxil to patients under 18 when it was approved only for adults.
- It pushed the drug Wellbutrin for uses it was not approved of.
- It distributed misleading articles in journals.
- It bribed doctors with kickbacks.
- It failed to give the FDA safety data about its diabetes drug Avandia.
- It was fined \$490 million by China for bribery in 2014 for crimes in 2001.
- It was charged with bribery by Poland's fraud squad.
- Moncef Slaoui, formerly of GSK and Moderna, now heads up the US government's Operation Warp Speed, which is giving GSK \$2.1 billion for a vaccine.

AstraZeneca

- Guilty of bribery in multiple countries.
- Fined by the US government.
- Paid \$5.52 million to resolve SEC foreign bribery cases in Russia and China.
- Was accused of bribing Iraqi terrorists to win contracts. The lawsuit was filed by over 100 veterans.

Novavax

- Billions go in; nothing comes out.
- Like Moderna, Novavax has made no profits in over 30-year's history.
- It received billions of government funds for vaccines for SARS, MERS, Ebola, flu and now for Covid-19. None have been marketed
- Executives stand to get millions even if its products fail. CEO Stanley Erck and three others would gain \$101 million if a vaccine enters a mid-stage clinical trial.
- Is getting \$1.6 billion funding from the US government for Covid-19.

Why is it that all the companies involved in Operation Warp Speed are severely corrupt? Why is it that those leading the US Department of Health and Human Services overseeing the programme are also guilty of corruption?

Precursors of a planned pandemic control event

It is important to note a principle of the global elite Luciferians. They believe that if a population is warned about their plans to harm them in advance, they are absolved of all guilt when the event actually occurs. In their eyes this forms consent. Thus repeated events

(such as 9/11) were predicted in various books, films and commentaries long before the event happened.

Some of these items below may be coincidental (such as Koontz's novel), but it is clear that the scenario being played out by western governments on dealing with this false pandemic is according to a planned course of action agreed by most nations and set by the global elite. Lockdowns, surveillance, tracking, vaccinations, authoritarian police control, and so on were all planned for and stipulated years ago. The control of national responses to pandemics is the United Nations and the WHO.

Richard Day (1969)

On 20 March 1969, Rockefeller insider Dr Richard Day¹⁰⁵ gave a speech to the Pittsburgh division of the American Medical Association predicting:

Travel ... would become very restricted. People would need permission to travel and they would need to give a good reason to travel. If you didn't have a good reason for your travel you would not be allowed to travel. And everyone would need ID ... later on some sort of device would be developed to be implanted under the skin that would be coded specifically to identify the individual. ... Everything is in place and nobody can stop us now. ... Some of you will think I'm talking about Communism. Well, what I'm talking about is much bigger than Communism. Everything has two purposes. One is the ostensible purpose which will make it acceptable to people; and second, is the real purpose which would further the goals of establishing the new system and having it. ... Next heading to talk about is health and disease. There would be new diseases to appear which had not ever been seen before. Would be very difficult to diagnose and be untreatable – at least for a long time.¹⁰⁶

Other subjects discussed by Day: everything will change constantly; population control; permission to have babies; redirecting the purpose of sex; sex education as a tool of world government; encouraging homosexuality; euthanasia; limiting access to medical care; eliminating the elderly; elimination of private doctors; suppressing cancer cures as a means of population control; inducing heart attacks; education as a tool for elite propaganda.¹⁰⁷

Dean Koontz (1981)

Koontz wrote *The Eyes of Darkness* where he referred to a virus called 'Wuhan-400', which was made by a scientist as a biological weapon.

Agenda 21 (1992)

See Agenda 2030 (2015).

This is the basis of the elite's strategy to bring about world domination by a centralised cabal under the pretext of environmental sustainability. It resulted from a UN conference called 'The Earth Summit' in Rio de Janeiro, Brazil in June 1992. It was agreed by UN delegates, NGOs and individual nations to be executed at local, national and global levels. '21' refers to the full implementation in the 21st century. The agenda has 40 chapters.

The plan was to reshape (the 'new normal, 'the reset') the political world. This includes depopulation of the world by 95%. Governments must take control of all land use and remove any decision making from private property owners (Socialism). People are to be

¹⁰⁵ Medical; Director of Planned Parenthood.

¹⁰⁶ Dr Lawrence Dunegan made notes (illegally) and published the speech via Randy Engel who made an audio tape. Available on multiple sites, e.g. 'The Revelations of Dr Richard Day.'

¹⁰⁷ I am indebted here to Henry Makow and others.

removed from rural areas and herded into large urban cities to shutdown travel. The Wildlands Project identifies rural areas that are not available to humans.

The Covid-19 pandemic was a means to help bring about certain Agenda 21 objectives.

Patents on coronavirus begin to appear (1999+)¹⁰⁸

- 1999: Ralph Barrick (researcher at the University of North Carolina Chapel Hill) manipulated coronaviruses leading to chimeras that allowed the virus to enhanced gain-of-function properties.
- 2002: coronavirus was seen as an exploitable mechanism for good or bad.¹⁰⁹
- 2003: coronavirus epidemic in Asia. The (US) CDC realises that money can be made from a coronavirus transmitted to humans patent (and also that populations can be manipulated by pandemic fear, and governments can mandate draconian measures all leading to selling vaccines). Thus the coronavirus itself, plus diagnostic testing for that virus, is patented to enable profit. The virus is patented to allow vaccine manufacturing. The CDC gained the propriety rights to the disease (US Patent 7279327), the virus (US Patent 7220852) and its detection (US Patent 7776521). Anthony Fauci was at the centre of this story, which involved hundreds of millions of dollars.
- 2003-2018: Fauci and Barrick with the CDC controlled the industrial complex behind coronaviruses.

This patenting was illegal. Nature is prohibited from being patented. It is impossible to patent a natural particle. But it is also illegal to patent a biological warfare agent, which a man-made manipulated coronavirus would be. If SARS-Cov-2 is natural, it cannot be patented. If it is man-made, it cannot be patented. Yet Big Pharma has managed to patent coronaviruses.

The CDC filed a request with the patent office to keep its patents on coronaviruses secret.

Today you cannot do anything with a coronavirus (such as observing it, testing it, manipulating it) without a licence from and fees to the CDC.

The CDC had all the requirements to turn a pathogen into a profit.

The Pentagon (2000)

Advanced forms of biological warfare that can target specific genotypes may transform biological warfare from the realm of terror to a politically useful tool.¹¹⁰

The Dead Zone, episode 'Plague' (2003)

This TV episode aired in the US on 13 July 2003. It includes mentions of 'China', 'coronavirus', 'Chloroquine' and 'lockdown'.

WHO, International Health Regulations (2005)

This states in the foreword that the WHO is, '*the management of the global regime for the control of the international spread of disease*'. It lays down regulations for national governments to cope with pandemics under the direction of the WHO. This is a binding agreement on 196 nations to follow the direction of the WHO on disease control that terminates all previous regulations.

¹⁰⁸ I am indebted here to the film, 'Plandemic II'.

¹⁰⁹ US patent application US11/748.359; 2003-04-25. Application was also filed by the CDC on 14.5.2007.

¹¹⁰ Pentagon, 'Rebuilding America's Defences', 2000,

Sylvia Browne (2008)

The psychic Sylvia Browne, in her book *'End of Days: predictions and prophecies about the end of the world'*, wrote: *'In around 2020, a severe pneumonia-like illness will spread throughout the globe, attacking the lungs and bronchial tubes and resisting all known treatments'*.

I do not believe in or endorse psychics; but I do believe there is a long-term elite plan that has included the current crisis, which is known by insiders.

Rockefeller Lock-step programme (2010)

This was a strategy to use a pandemic as a front to establish global power.

The Rockefeller Foundation published a report in May 2010, in co-operation with the Global Business Network, which was called *'Scenarios for the future of technology and international development'*. The first scenario was called *'Lock Step'*. This envisioned a world of totalitarian government where the public allowed national leaders to overstep their power and impose draconian rules that continued after a pandemic faded away. These rules included mandated facemasks and temperature checks.

Contagion (2011)

The film *'Contagion'*, directed by Steven Soderbergh, was about an illness called MEV-1 which becomes a global pandemic. There are many parallels to the current situation.

(US) National Institute of Health (2012-13)

The NIH realises the ethical dangers involved with gain-of-function research¹¹¹ on coronaviruses and warns the CDC to stop; and yet also continue. Around 2014 the CDC gets round this conundrum by farming out (sub-contracting through cover organisations) the research, with massive grants of \$3.7 million, to the Wuhan level 4 laboratory (Institute of Virology). Anthony Fauci was directly involved in this.

Anthony Fauci (2016)

There is no question that there will be a challenge to the coming administration (Trump) in the arena of infectious diseases ... But also there will be a surprise outbreak.¹¹²

In 2015 Fauci (as leader of the National Institute for Health) donated \$3.7 million to the Wuhan level-4 bio-lab for development of viruses. How did he know that there would be a surprise outbreak?

Jeremy Konyndyk (2017)

The former director of USAID's Office of US Foreign Disaster Assistance said a virus similar to the 1918 flu pandemic will emerge, in a Politico article.¹¹³

One by One film (2014)

Directed by Diane Jessie Miller.

This is a film propagandising to expose the New World Order programme through a series of conversations. A sort of primer on how someone wakes up to what is happening in society. The emphasis is upon the planned depopulation of 13 out of every 14 people.

¹¹¹ Making a virus more powerful in order to study it.

¹¹² Kollerstrom, op. cit.

¹¹³ Ibid.

Bill Gates

Bill Gates predicted a coronavirus-like outbreak – down to it starting at a Chinese market – in 2019 Netflix documentary show ‘The Next Pandemic’.¹¹⁴

2015

In 2015, Bill Gates predicted an epidemic would kill millions.¹¹⁵

December 2016

Bill Gates warned President Trump right before he took office about the possibility of a pandemic, the Wall Street Journal reported.¹¹⁶

2018

In a 2018 discussion about epidemics hosted by the Massachusetts Medical Society and the New England Journal of Medicine, Gates said a pandemic could happen within the next decade.¹¹⁷

UN sustainable development plan Agenda 2030 (2015)

An update of Agenda 21. In 2015 193 UN member countries signed a resolution putting unelected officials in charge of changing society and the future of the world. They promised to adopt the 2030 sustainable development goals. The Fortune 1000 corporations also pledged their support. This planned to reset (transform) the world economic system and gradually introduce totalitarian government under the guise of environmentalism.

Two of the six programmes of Agenda 2030 centred on ‘Health and Digital Co-operation’ established by Klaus Schwab (founder of the World Economic Forum) in his ‘Fourth Industrial Revolution’ plan. The former involves taking over health agencies, institutions and medical science required to stimulate an event to vaccinate the whole world. Bill Gates is a forum collaborator. The latter involves data collection, data surveillance and profile analysis of every human being necessary for a global take-over and control.¹¹⁸

To implement this social engineering, the planners needed a global pandemic with lockdowns, restriction orders and shutting down businesses. This required ‘experts’ to create and spread fear of disease. UK political scientists saw dissenters as a threat to the plan and published a paper, ‘Options for increasing adherence to social distancing measures’. This stated, ‘*a substantial number of people still do not feel sufficiently personally threatened ... The perceived level of personal threat needs to be increased among those who are complacent, using hard-hitting emotional messaging*’. Thus the pandemic was used to form social control.

The implementation of the UN / World Economic Forum plan was achieved through the collaboration of Big Pharma, Big Media and national governments acting together: control the news, control information, censor criticism, control money, social control, control the narrative. Through fear of a fake virus the elite managed to shut down all forms of cultural and social expression: places of worship, the arts, music venues, comedy venues etc. All large gatherings were cancelled. This was a compliance-testing event.

¹¹⁴ Mail Online, headline, 31 January 2020.

¹¹⁵ Los Angeles Times, Christi Carras, 13 April 2020. This was in a Ted Talk.

¹¹⁶ Business Insider, Hillary Hoffower, 13 May 2020.

¹¹⁷ Ibid.

¹¹⁸ I acknowledge some help here from James Grundvig, ‘Manufactured crisis: what are you going to do?’.

Imperial College developments (2018)

Bill Gates donated \$8 million to Imperial College to develop a ‘*tailor-made flu and disease X vaccine*’.

Intelligence community (2018)

The intelligence community’s Worldwide Threat Assessment warned about a novel strain of a virulent microbe that is easily transmissible between humans and continues to be a major threat.¹¹⁹

The 2019 threat assessment in January stated, ‘*The US and the world will remain vulnerable to the next flu pandemic or large-scale outbreak of a contagious disease that could lead to massive rates of death and disability, severely affect the world economy*’.

The Crossing (2018)

This ABC US television series has a narrative about a superior elite in the future called ‘The Apex’ who engineer a bio-weaponised virus that is incurable, to get rid of the common people in their millions. The Apex are immunised against this virus. The disease is called ‘Mantle’s disease’. Mantle is another word for ‘cloak’ or for something covering the face; perhaps suggesting a hidden or stealth symbolism.

The death of Kary Mullis (12 August 2019)

As explained earlier, he was the inventor of the RT/PCR technology to multiply DNA. He was a fearless and outspoken Nobel Peace Prize-winner. If he was around during the epidemic, he would have denounced the use of PCR as a diagnostic test for an un-proved virus. He could have threatened the whole scam; thus he had to disappear before the planned pandemic could be initiated.

He died the day before Operation Crimson Contagion began.

Operation Crimson Contagion (2019)

On 13 August 2019 a four-day conference was held called ‘Operation Crimson Contagion’ in Washington DC. This planned for a global influenza pandemic, which featured: school closures, social distancing, medical countermeasures and a lockdown of the population. It featured visitors from China that carried a new virus to the USA.

‘A world at risk’, report (September 2019)

This is a report on global preparedness for health emergencies, which features an image of a coronavirus on the cover. It was prepared by the Global Preparedness Monitoring Board. It called for government spending on preparation that included making vaccines for: ‘*A rapidly spreading pandemic due to a lethal respiratory pathogen*’. It mentions that this pandemic may well be due to a deliberate release of a pathogen.

Event 201: The Coronavirus High-Level Pandemic Simulation (18 October 2019)

NB: the logo actually shows ‘2’ a globe and ‘1’. In other words, this is a corroboration of the original UN Agenda 21 (now 2030).

This was an event held in October 2019 that featured a ‘*global pandemic exercise*’. It was organised by the Bill and Melinda Gates Foundation with the World Economic Forum. It was held at the Pierre Hotel in New York City under the auspices of John’s Hopkins University’s Centre for Health Security. It simulated a global coronavirus pandemic and stipulated that air flights would be cancelled and a lockdown of the population mandated.

¹¹⁹ Ibid.

This simulation almost exactly correlated with what actually happened in 2020, including:

- The sudden appearance of a new coronavirus that caused respiratory illness.
- Effects which varied from mild flu-like symptoms to severe pneumonia.
- The demand for global business and governments working together.
- Identifying conspiracy theories, which affirmed that the pharmaceutical companies and the UN released the virus.
- The heavy demand for facemasks and PPE.
- The fear that hospitals would be overwhelmed.
- The spread of fear of infection.
- Public expectation for a vaccine.
- Penalties put in place for refusal to comply, including arrest and detention.
- Mandating a lockdown.
- Suspension of travel.
- Economic crash.
- Martial law due to riots.

Everything that happened afterwards in real life with the coronavirus (with the exception of Wuhan as the origin) was acted out in this simulation. Real life events followed the script of Event 201.

Note: All major events used by the elite to institute a new transformation of society (such as 9/11 in New York, 7/7 in London, shootings in Las Vegas etc.) are rehearsed in a government / NGO drill. The real event then uses footage filmed in the drill to enhance news reports. Event 201 was the drill to prepare for the planned pandemic.

World Military Games (18 October 2019)

On 18 October 2019 US soldiers arrived in Wuhan, China for the Military Olympic Games involving 10,000 soldiers from 103 nations. They stayed in a hotel a few hundred yards from the Wuhan seafood wet-market. These soldiers had been engaged in operations close to Fort Detrick (a US bioweapon lab) beforehand. They performed so badly in these games that the Chinese authorities concluded that they were not really trying and were there for some other purpose.

I explained in an earlier paper that a flu epidemic began amongst 45 US soldiers in the hotel and then spread to the seafood market.

Crisis meeting in Brussels (23 October 2019)

There was a crisis meeting of NATO nations in Brussels where the elite were in total panic; at the same time all Israeli embassies shut down globally.¹²⁰ The American Vice President and the Secretary of Defence were urgently called back, mid-air, to Washington. All the ministers of defence in Europe were called in.

The reason was because investigator Ole Dammegard¹²¹ had warned about the global effects of a planned epidemic crisis outlined in Event 201 co-ordinated with 39 planned

¹²⁰ Publicly stated to be caused by a strike over wages.

¹²¹ See 'Light on Conspiracies' website.

attacks across Europe in 36 hours targeting key infrastructure plants with false terrorist attacks and an earthquake in Central Europe.¹²²

The repercussions were to be power failures, famine, martial law and shutting down the Internet. It was a sort of European 9/11 with London and Manchester among the targets. Dammegard did his best to warn the world about this in multiple radio interviews, broadcasts, tweets and social media exposures. This is what panicked the elite.¹²³

The elite then went into hiding for six weeks and the planned global crisis only went forward at half-cock; just the virus aspect. They could not fulfil what Dammegard had warned about so publicly or they would be exposed. This is why the ‘pandemic’ crisis was not as powerful as it was planned to be (up to 45 million dead).

Mike Pompeo (2019)

In a press conference flanked by President Trump and Anthony Fauci, Pompeo states that ‘*we are in the middle of a **live exercise***’ while referring to the emerging pandemic. In other words, a live exercise of what had been planned and prepared for.

DAVOS (2020)

At the DAVOS globalist conference in January 2020, Klaus Schwab (founder of the World Economic Forum) stated, ‘*The pandemic represents a rare but narrow window of opportunity to reflect, re-imagine, and reset our world*’. In other words, to implement the UN Agenda 2030 sustainable development plan.

Strategic Partnership Framework (2020)

On 23 January 2020, the World Economic Forum signed the final stage of the Strategic Partnership Framework with the Organisation for Economic Co-operation and Development (OECD). This was six months after signing the original framework outlining the areas of co-operation to deepen institutional engagement and jointly accelerate the implementation of the UN’s 2030 Agenda for Sustainable Development.

Infections begin

The infections claimed to be from a novel coronavirus began around the end of October and early November. The Chinese medical authorities were slow to deal with this and only realised that a new sort of flu outbreak was amongst them on 30 December. They then announced this to the WHO.

The WHO recognises that two severe outbreaks of flu broke out in November and December across the world. Many people in Britain (including me) had flu with the exact symptoms of Covid-19 but the government denies that this was Covid-19. If these were Covid-19 then this changes the whole picture of when the epidemic began and when it climaxed – long before the lockdown. In any event, the virus probably peaked around the 10 March but certainly by the end of March. Thus the lockdown was pointless. It is now August and some businesses are still shut down, despite the fact that the virus is statistically finished (deaths are approaching zero).

¹²² He learned this from data intercepted from a key insider.

¹²³ Free Zone Archives, ‘From drill to reality – Ole Dammegard’. Dammegard is an expert in the elite and false flags. He correctly predicted the Westminster Bridge terrorist attack 2 months before it occurred; he has predicted 59 other attacks.

The Ferguson model (March 2020)

An Imperial College paper appeared on 17 March 2020 authored by 30 scientists led by Neil Ferguson. It predicted 2 million dead in the USA and half a million dead in Britain from a novel coronavirus.

Thus a college funded by Bill Gates instigated the establishment responses planned by Bill Gates in Event 201.

Man-made (2020)

Despite many claims that SARS-Cov-2 is a natural organism, studies were shown to be seriously faulty and top-level scientists (including Nobel winners)¹²⁴ claimed that the virus was man-made.

Covid-19 medically downgraded (19 March 2020)

The Four Nations Public Health departments, and other organisations, downgraded the infectious threat of Covid-19 from a high-level infectious disease on 19 March 2020. This meant that a lockdown was pointless.

British Lockdown (23 March 2020)

All non-essential business and shops closed. The population was told to stay indoors. Schools closed. All non-Covid medical treatments ceased. Most hospital departments closed.

Exposé (2020)

Eminent scientist Dr Judy Mikovits publicly exposes¹²⁵ Anthony Fauci (NIAID) as directing and controlling the cover-up of the truth about the 'pandemic', including silencing people with millions of dollars and smearing those that can't be bought. Mikovits also accuses Fauci and Robert Redfield (CDC) of killing millions of people in the HIV crisis through neglect.

The plan: in summary

- Slowly publish increasing warnings of a new coming pandemic that will be like Spanish Flu.
- Patent coronaviruses, tests and vaccines.
- Create a new pathogen. [This was most likely done in Carolina and Fort Detrick and then sub-contracted to the level-4 laboratory in Wuhan.]
- Release the new pathogen, call it a coronavirus and kill 8-45 million people worldwide. [This aspect failed due to the immune system being so brilliant.]
- Ramp up fear of a new pandemic to hysterical levels in the media. Make this unrelenting.
- Institute national government strategies to fight the pandemic by introducing draconian measures.
- These measures will include: a national lockdown, social distancing, mandatory facemasks and severe penalties enacted by a Gestapo-like police.
- Use the pandemic to kill as many old and disabled people as possible. [NB denying the elderly access to medical care, DNR forms and sending sick people into care homes.]
- Continue draconian measures even when the disease has ceased by using tests that give false positives. The PCR test is the best tool.

¹²⁴ Such as Professor Luc Montagnier, Nobel Medicine 2008.

¹²⁵ 'Plandemic 1' film, 2020.

- Build concentration camps for dissenters, positive test cases and test sceptics. Call these necessary quarantine centres.
- Get people used to the fact of the ‘new normal’, a social reset where things are forever changed.
- Changes include: restrictions on travel, curfews, abolition of paper money, social distancing measures, mandatory vaccines, biomarker IDs under the skin, unprecedented surveillance of the population, medical martial law, control the Internet, precipitate an economic crisis etc.
- Establish totalitarian government worldwide.
- Use the pandemic crisis to roll out installation of 5G towers all over the world. [Check your neighbourhood; this happened. 5G antennae have been installed in towers, schools, lampposts and some even disguised as trees.]

The political plan in outworking

- DAVOS meeting in January of key elite power players.
- 11 March: The WHO declares a pandemic. The decision to do this was really taken by the World Economic Forum, the elite foundations,¹²⁶ the financial establishment and especially the Gates’ foundation.
- The reason: the elite see the world economy as a hindrance to global health and wants it shutdown. Covid-19 was the pretext to shut down the global economy. The virus is blamed for economic collapse but the collapse was really caused by political decisions to lockdown society. Lockdown is economic genocide.
- The economic collapse actually increased the wealth of the top 1% people and companies. Small and medium sized businesses have gone bankrupt or are in crisis. Large on-line corporations got wealthier. Businesses which have gone bankrupt (e.g. most Latin American airlines) stand ready to be bought up cheaply by global corporations.

Orchestration of events

The international orchestration of parallel events at the same time proves that nations were following a script predetermined by the global power players. These policies make no sense but they were adopted anyway. These include:

A national lockdown; quarantine / house arrest of the whole population.

This goes against all sound medical science. It was known (and stated) before lockdowns that they would cause additional unnecessary deaths and were of no use in stopping a virus. Nations all over the world did it anyway.

Social distancing measures

Make no sense in trying to stop a virus epidemic, but nations did this anyway.

Facemasks

Are pointless in trying to stop a virus infection but nations did this anyway.

These policies were planned in advance and followed a script decided years ago and evidenced in items like Event 201. They did no good to stop the virus but most nations applied them. [The few nations that did not apply them rigorously fared much better.] Why? Because these nations are under the control of people above national governments.

¹²⁶ E.g. Rockefeller, Rothschild, Carnegie, Ford.

Notice that nations that had very few Covid-19 deaths, like Australia and New Zealand, introduced the most draconian measures. This makes no sense – other than being a test bed for martial law and totalitarian government. For example: in August one Victoria man was fined \$10,000 for holding a birthday party for his son. There were virtually no deaths and very few virus patients in hospital at this time and therefore no need for strict measures. Despite few deaths, New Zealand is locking people away in detention centres.

Summary of key facts

Virus facts

No one has isolated and purified the SARS-Cov-2 virus. No one has subjected the new virus to Koch's postulates (which is necessary to prove it exists). Debris from the lungs of Wuhan patients was presumed to be a virus; it could be exosomes. No one has proved that there is a new disease called Covid-19 caused by a novel coronavirus. Covid-19 has no specific identifiable symptoms to differentiate it from other diseases.

99.8% of people survive the virus with no progressive or significant disease.¹²⁷

Children are virtually unaffected by it.

It is not transmissible by touching surfaces.

It is not easily transmissible in the open air but is infectious in closed environments over prolonged periods.

On 19 March Public Health Britain (Four Nations) downgraded Covid-19 from being a very serious infectious disease. The Advisory Committee on Dangerous Pathogens also concluded that Covid-19 was no longer a serious threat. This was before the lockdown.

The epidemic dissipated after 20% of a population were exposed to it.

Death stats

For many weeks the excess death rate for 2020 was lower than the previous five years.

There was never a pandemic.

The mortality rate for Covid-19 is about 0.1%. Early claims of 3.4% were blatant lies.¹²⁸

The mortality rate for Covid-19 is less than a bad flu season.

Testing

The PCR test was not designed as a diagnostic test and is completely useless in identifying Covid-19 infection.

The PCR test results in false positive diagnosis.

Antibody tests are also misleading.

¹²⁷ Breitbart, Dr Dan Erickson, 27 July 2020.

¹²⁸ WHO's statement in early March.

Treatment

Covid-19 comes in two stages. If the HCQ cocktail is administered in the first stage, the disease is wiped out very quickly.

The worst form of treatment is using a ventilator. This caused 96+% deaths in New York City.

Intravenous vitamin C and D are also helpful treatments.

No vaccine has been properly tested for Covid-19.

In the H1N1 epidemic (Swine flu) vaccines injured and killed millions of people.

No coronavirus vaccine is efficient.

No vaccine has ever been developed for SARS-Cov-1, despite trying for 17 years. Why will a vaccine suddenly be found for SARS-Cov-2 in a matter of months?

National reactions

US states that did not have a severe lockdown fared better than those that did.

Nations that did not have a severe lockdown fared better than those that did.

Countries that had the severest lockdown also had the worst virus outcome.

Nations that used HCQ as a prophylactic fared better than those that rejected it.

Nations that used vitamin C and D, Zinc and certain other measures fared much better than those that used retrovirals and intubation.

Britain has possibly the worst outcome in the world.

Restrictions of personal liberty

Mandated lockdown (forced quarantine) of healthy people. Something never done in history.

Mandated facemasks – despite them being useless against a virus and contributing to disease.

Social distancing mandates causing multiple social / health problems and commercial loss.

People being arrested for going to the beach, going to a park, wild camping, walking in the countryside – all of which help to boost the immune system.

Police breaking into homes without a warrant on the suspicion that someone has an ‘illegal gathering’.

In New Zealand, police are arresting people and putting them, and their families, into concentration camps for testing positive to the virus or for refusing a test.

Do not fear

There was no pandemic but there was an epidemic of gross fear. The way that the elite controls nations is by fear. Fear is the easiest way to gain power over populations.

The way to combat what the elite is trying to do is to refuse to fear. For Christians, faith in God and trusting his divine providence are the means of conquering fear. God is in control of nations, not the elite. Tyrants can only do what God allows in his plan.

Finding peace in divine sovereignty allows people to remain calm in the face of the world's dilemmas.

When the elite tries to make you hate others – love them. When the elite pushes lies – publicise the truth. When they try to divide society, work to unite people. When the world pushes selfishness – act to do good to others. When the world dumbs down – strive to raise your intellect. When it tries to make you scared – refuse to fear and trust God, then laugh at the works of the Devil (he hates it).

Practical advice

- Cancel your BBC licence.
- Stop watching TV broadcasts.
- Stop following mainstream media news.
- Find good independent sources of news.
- Spend more time with your family.
- Seek to do good to your neighbours.
- Give money to good charities.
- Eat healthily.
- Read good books.

Quotes

We have a lot of evidence that it's a fake story all over the world. ... We have medical evidence that that is a scam, that this is not true.

Doctors for enlightenment (Germany), Awakening (video) '640 Doctors, "CV19 is a global scam"', Helko Schoning (GP). ACU 2020.org

The ill-founded opinions expressed by international experts, replicated by the media and social networks repeat the unnecessary panic that we have previously experienced. The coronavirus identified in China in 2019 caused nothing less than a strong cold or flu, with nor difference so far with cold or flu as we know. ...

Each year there are 3 million newborns who die in the world of pneumonia and 50,000 adults in the US for the same cause, without alarms being issued. ...

There is no evidence to show that the 2019 coronavirus is more lethal than respiratory adenoviruses, influenza viruses, coronaviruses from previous years or rhinoviruses responsible for the common cold.

Dr Pablo Goldschmidt, virologist, Off-Guardian, 'Coronavirus scepticism II', 3 April 2020.

The number of deaths of coronavirus in Italy is 10% of the number of deaths of influenza in the country between 2016-2017.

Dr Michael Levitt, Nobel Prize-winner for Chemistry, Off-Guardian, 'Coronavirus scepticism II', 3 April 2020.

In the majority of cases, Covid-19 takes the form of a mild cold or is even symptom-free. Therefore, it is highly unlikely that all cases of infection are recorded, in contrast with deaths which are almost completely recorded. This leads to an overestimation of

the CFR.¹²⁹ ... The CFR of 0.2% currently measured for Germany is below the Robert Koch-Institute's (RKI) calculated influenza CFRs of 0.5% in 2017/18 and 0.4% in 2018.19.

German Network for Evidence-based Medicine. 'Covid-19: where is the evidence?', 20 March 2020.

The implications of these findings are of utmost importance. They call for immediate removal of most restrictions on the economy, immediate return to normal life of low-risk population while helping high-risk groups reduce the rate of social contacts. ...

The policies adopted by countries around the world are based on assumptions that are both unscientific and false.

Michael Levitt, Haaretz, 'Countering the second wave with facts, not misconceptions'.

In our analysis, full lockdowns and widespread Covid-19 testing WERE NOT ASSOCIATED WITH REDUCTION IN THE NUMBER OF CRITICAL CASES AND OVERALL MORTALITY.

The Lancet, 'Covid-19 policies and health outcomes study', July 2020, p5.

I believe history will say trying to control Covid-19 through lockdown was a monumental mistake on a global scale. The cure was worse than the disease. I suspect right now more people are being harmed by the collateral effects of lockdown than by Covid-19.

Mark Woodhouse, professor of infectious disease epidemiology and a member of the Scientific Pandemic Influenza Group on Behaviours (which advises the government).¹³⁰

What have we been witnessing these past few months? A worldwide crisis caused by the arrival of a new virus of exceptional virulence – or a crisis of awareness, in which incomplete information led to a wildly disproportionate reaction? Have lockdowns, face coverings and the rest saved millions of lives worldwide? Or have they had relatively little effect on the course of the pandemic, and ended up causing more harm than good?

Dr John Lee, The Spectator, 'The coronavirus immunity riddle', 29 August 2020.

Conclusion

The severe measures taken against a supposed virus epidemic have been the most alarming in British history. Civil rights have been attacked more than at any other time. Rights guaranteed in the British Constitution (Magna Carta, Bill of Rights etc.) have been shattered. The economy has been ruined.

None of these measures were required by medical constraints or scientific evidence. This means that the choice was a political one alone. I have shown that there were a number of precursors to the lockdown and restrictions, so the political choice was a pre-planned policy determined by people like Bill Gates, Anthony Fauci and other elite figures.

The only reason for such draconian measures is to apply special social control over populations and condition them to accept further totalitarian demands further down the line. This is preparation for a fascist dictatorship.

It is common that people read the history of Germany in the 1930s and condemn the German people for failing to see the threat of Hitler's rise to dictatorial power and their failure to do something about it. A whistleblower health care worker (now under

¹²⁹ Case Fatality Rate.

¹³⁰ Tom Woods, Liberty Classroom.

investigation) recently exposed the fact that hospitals were empty in the lockdown and medics sat around doing nothing and failed to give proper medical care to thousands. She referred to Germany and said that people wondering what they would have done in the 1930s now have their answer – they complied with lying government draconian restrictions just as easily as 1930s German did.
