

The current genocide of humanity

For then there will be great tribulation, such as has not been since the beginning of the world until this time, no, nor ever shall be. And unless those days were shortened, no flesh would be saved; but for the elect's sake those days will be shortened. Matt 24:21-22

Preface

The end time is characterised by a series of contrasts. One of these contrasts is that the world is divided into two camps. Those that are part of the global Elite will enjoy great riches, luxury, security and hedonism in their totalitarian control over the world;¹ and those that are persecuted to death by the former group, chiefly Christians.² The deaths of Christians will be public and a cause of great rejoicing.

One aspect of the Elite cabal's control at the end is that it is a death cult; it proposes and activates eugenicist and Malthusian policies aimed to kill billions of people. It rejoices in this calling the mass of humanity '*useless eaters*'.³ This paper shows that this death plan is currently being worked out.

The major political and economic question of the 21st century will be 'What do we need humans for, or at least why do we need so many humans'.

We just don't need the vast majority of the population.

[Technology] will make [people] redundant and will make it possible to replace the people.

Yuval Noah Harari, WEF advisor.⁴

Introduction

While the world sleeps and absorbs the lies of the media, there is an ongoing destruction of mankind day by day. The level of destruction is actually accelerating. This has been a long-term plan of satanic proxies who rule the world, but now the strategy is being implemented. The domination of the Elite over the minds of the mass of the population means that 99% of people have no clue that even relatives and friends are being murdered on a daily basis. This shows how much these psychopaths that serve Satan are in control.

In order to explain what is going on (much of which I have written about before) I will itemise some of the relevant issues. Those that I have covered previously in depth I will only summarise; those that I have only mentioned briefly, or regarding new data, I will expand on.

Malthusianism⁵

I have explained this many times, so briefly here:

- The people that rule the world (bankers, corporatists, financiers, the super rich, aristocrats, Jesuits, Freemasons) are all Malthusians. That is, they seek the depopulation of the world, stripped to a global population of 500 million.⁶ This means the eradication of over 7 billion people.
- They are also eugenicists⁷ intent on eradication of ethnic groups that they feel are unfit for society. This is chiefly: the poor, the fragile, the sick, the elderly, those with low IQs, Black Africans, Muslims, ethnic minorities in the West, Hispanics, Russians and Asians.
- They have openly stated this many times.⁸
- This explains why there are plans being implemented to destroy whole swathes of the population.

These are discredited theories. The world's population could fit shoulder to shoulder on Newfoundland Island. There is sufficient food and resources for all, but the greed of Western Elites means that there are shortages in the developing world. In fact since the time of Malthus, humanity has learned to grow far more food than is required for all. The expansion of food production has greatly exceeded the needs of the expanding human population.

A precursor: The Irish Potato Famine

Would the British government indulge in a Malthusian genocide of its own people? Surely not; this is fantasy! So say the deniers of globalist-controlled depopulation. To counter this, here is an example (one of many) where the Malthusian British government deliberately caused a holocaust of its own people.

The standard story taught to schoolchildren is that a potato blight hit Europe in the mid-19th century and this directly led to famine in Ireland, which killed 2 million people and caused others to emigrate to the USA. This is a lie.

The potato blight caused about 100,000 deaths in the whole of Europe. Why did it cause the deaths of 2 million in a small country like Ireland? What about the many other crops grown in Ireland that could sustain life, such as wheat, barley, maize, oats, vegetables etc. to say nothing of beef, lamb and poultry? It is a logical fallacy.

⁵ The policies of Thomas Robert Malthus [1766–1834], an English economist. In his *Essay on Population* (1798) he theorised that the rate of increase of the population tends to be out of proportion to the increase of its means of subsistence. Therefore controls on population are necessary to prevent a catastrophe.

⁶ This is openly stated by many people and was engraved on granite monoliths called the 'Georgia Guidestones' in America.

⁷ The science of improving a population by controlled breeding to increase the occurrence of desirable heritable characteristics. Developed largely by Francis Galton as a method of improving the human race, it fell into disfavour only after the perversion of its doctrines by the Nazis. [New Oxford Dict.]

⁸ See my papers, 'Depths of Deception' or 'A handbook of the global conspiracy' for examples. Examples: 'We want to exterminate the Negro population'. [Margaret Sanger.] 'A total world population of 250-300 million people, a 95% decline from present levels, would be ideal'. [Ted Turner.] 'In order to stabilise world population, we must eliminate 350,000 people per day'. [J Cousteau.] 'Cut the population by 90% and there aren't enough people left to do a great deal of ecological damage'. [Mikhail Gorbachev.] 'The elderly are useless eaters'. [Dr Henry Kissinger.] 'Maintain humanity under 500 million in perpetual balance with nature'. [Georgia Guidestones.]

The real cause of death was the confiscation of food by military means done under the authority of local landowners and thus hid under legalistic interpretation of law to commit murder by food deprivation.

The British government sent 67 regiments (out of 120) of troops into the counties of Ireland over six years to enforce this removal of food for exportation. However, in the first instance the cause was the intervention of the local constabulary and militia groups established by the landowners. When these could not contain dissent and resistance, the troops were sent in to violently confiscate the food that the Irish people had grown.

Irish families lived in a sort of feudal system whereby they resided in 10-30,000 acre estates ruled by a landowner. These were mostly British; 98% had non-Gaelic names and comprised of Lords, Baronets and MPs.⁹ In the famine the landowner claimed all the produce which was sent for export. He also wrote the laws that governed the people on his land. Thus the constabulary could be called to 'legally' enforce the decision of the landowner to remove food produce; which they did.

The result was that Irish families died in droves. Un-blessed mass graves were dug outside of sacred ground cemeteries all over Ireland and are marked today by headstones and memorials set up by Christopher Fogarty. The Irish people only talk about this in whispers and establishment faculties (schools, universities, government, and media) cover this up. Having denied this even happened for decades, mounting evidence has forced the government to admit that it occurred but now they say that the landowners were all Irish, which is untrue.

The famine was a deliberate act committed by the landowners directly tied in with the British government.

The net result was the deaths of 2 million 'undesirable' Irish people caused by a British holocaust.¹⁰ The British government has form on ethnic cleansing and genocide. [In fact there was a similar genocide committed earlier in Ireland by Elizabeth I and later by Oliver Cromwell.]

Conclusion: the British government has history in committing genocide.

Examples of depopulation strategies

The Midazolam murders: death of the elderly

The spike of excess deaths in 2020 (attributed to a pandemic) was not caused by a respiratory virus. The infection fatality rate of supposed Covid-19 is about 0.03% (see later). The figure of 0.09% is stated in the House of Commons and is recorded in Hansard. The point is that the claimed Covid virus was not a great killer it was comparable to influenza or less; hence Public Health England downgraded it on 19 March 2020. So the spike of deaths was not caused by Covid.

In fact, the excess deaths, which mostly occurred in care homes and hospital wards, was due to the treatment given by doctors. This was asserted two years ago by many, including me, but is now a provable fact. There was a deliberate policy to kill elderly people, which amounts to genocide of the old. Why was it deliberate? Because the effect of the treatments was known to doctors and all in authority. They prescribed treatments that they knew would kill patients with suppressed respiratory conditions. The effect was a slow death with the patient suffering in full consciousness.

The treatments were these:

- **Midazolam:** which sedates and suppresses breathing. Why would you give a drug that suppresses breathing to a patient with restricted breathing problems?
- **Morphine:** which sedates and suppresses breathing.
- **Remdesivir:** which also affects breathing but chiefly kills the kidneys and damages other organs. It depletes iron, the necessary mineral that carries oxygen in the blood. It is not a fully authorised drug.
- **Mechanical ventilation:** in trauma situations ventilators used properly are effective in allowing surgery to save a life. They need continual professional oversight, which did not happen in many Covid situations. For respiratory patients this is a dangerous treatment. Patients that can still breathe, but with difficulty, require oxygen in the normal manner and necessary drugs (mostly vitamin C, D, Zinc and others). For patients with plaque on their alveoli (as with certain types of pneumonia that was ascribed to Covid) ventilation collapses the lungs and kills because there is nowhere for the air to go.

The combinations of these treatments killed people outright. Doctors that applied these knew that they would kill elderly, frail patients. They are still being used today.

There is evidence that this was the plan all along. Although the government condemned the Liverpool Care Pathway (that committed an old patient to death by slow starvation and thirst while on morphine), in effect this pathway still exists under a different name. Old patients that were said to have Covid were put on this death pathway and treated with the above to kill them off. This was by the use of DNR status; often issued without any consent of the patient or of the next of kin.¹¹ There was a concerted government plan, overseen by Matt Hancock, that sought to get rid of tens of thousands of old people – and it succeeded.

This care pathway was not restricted to the Covid crisis; it is continuing right now. This week I met an elderly lady who is frail and on dialysis, but very bright, cheerful and expecting to live many more years. She was seen by a doctor and put on new drugs (I don't know what they are) and she deteriorated rapidly. She lost her happiness, became

¹¹ DNR =Do Not Resuscitate.

depressed, anxious and feeble. She was then sent to a hospice where her sons were told that she was about to die and had been put on a DNR without her consent. She managed to get her son to remove the DNR but is trapped in the hospice (which has a record of unusually high excess deaths). She is currently fighting to improve her condition by seeking a second opinion from a holistic doctor / nutritionist (a course of action I recommended) and adamantly believes that her worsened state is caused by the new drugs.

The deliberate killing of the elderly by medical murder is one aspect of the current genocide of humanity.

Death by vaccine

Vaccines in general

Vaccines and morbidity from earliest times

The idea of a vaccine is contrary to sound medical science. The immune system has barriers, one of which is the skin. Injecting a toxin through the skin, when that pathogen is usually breathed in, is an action against the immune system.

All vaccines are harmful and always have been. It is alleged that more people have died from vaccines than saved from the very beginning. In the 1700s smallpox vaccines were killing people, such as the philosopher/theologian Jonathan Edwards.

Immunologist Edward Jenner was accused of causing death in the early 1800s; despite this he received government funding. To take one modern example, over 100 American people died from the measles vaccine in the early 2000s while only one person died from measles (even then from a co-morbidity). There was virtually no risk of death from wild measles but a very high morbidity from the measles vaccine.

Death from polio vaccines

Another example is that it is now confirmed that polio epidemics in Africa and India were caused by polio vaccines.¹² It is also confirmed that the Johan Salk (Rockefeller Foundation) polio vaccines in the 1950s-60s caused cancer due to Simian Virus 40, a carcinogen mutation, being in the contents. Finally, on 11 July 2013, the CDC admitted that between 1955 and 1963 over 98 million Americans received one or more doses of a polio shot which was contaminated with Simian vacuolating virus 40 (SV40), which causes cancer.¹³ Independently, Dr Michele Carbone, Asst. Professor of Pathology at Loyola University in Chicago, verified the presence of SV40 virus in tissue and bone samples from patients who died. He found various bone cancers and lung cancer. In 1993 the Seattle Times (6 October) announced that all polio in the US was caused by vaccines.

No evidence for efficacy

There is no evidence that any vaccine prevented any serious disease or epidemic. The trust in vaccines is the result of a continual propaganda assault from birth, through school and in the media. The claimed success in the early 20th century was entirely due to better sanitation, clean drinking water, better food and more of it, hospitals, dental surgery,

¹² See my paper 'Bill Gates'.

¹³ See my paper, 'Do not take the Covid vaccine'.

better living conditions etc. The vaccine introduction came after the peak in infectious diseases and took the credit.¹⁴

No risk-benefit trials

There isn't a single risk-benefit trial on all cause mortality and morbidity vs. placebo for any of the US 70 approved vaccines. Not one vaccine is 100% safe. According to US medical protocols (LD 50),¹⁵ vaccines only have to be 50% safe in order to be considered effective. That is, 50% of people could die and the vaccine is authorised; but not if 51% die.

Allegation: vaccines cause modern chronic diseases

Dr Ariyana Love avers that all modern chronic diseases have arisen from vaccines as a deliberate plan by the allopathic Elite. It is now certain, for example, that vaccines cause autism. When Dr Andrew Wakefield asked for further investigations into this correlation he was struck off. Today, scientific papers have proved the link and explained the mechanism. According to Dr Ariyana Love (and many others), vaccines are a bio-weapon.¹⁶

Allegation: The Spanish Flu was caused by a vaccine or vaccines

The Spanish Flu was not a natural influenza outbreak but the result of the vaccination of US troops with smallpox and Meningitis vaccines by the Rockefeller Foundation in Fort Riley. The soldiers got sick and then went to the Belgian front. When civilians got sick this spurred a vaccination rollout and facemasks, which ramped up the deaths. The people that did not get sick were the unvaccinated. It was commonly known at the time that the vaccines killed people, but this has been covered up in history by Elite-controlled academic institutions. Many millions died in this scandal.

ASIDE: studies on transmission of the Spanish Flu at the time showed that person to person transmission was difficult. Samples were taken from sick people and put up volunteer's noses, mouths or even injected. They did not get sick. Experiments were done on horses with nosebags full of samples; they did not get sick. This means that the cause of the Spanish Flu was not a pathogen coughed up by victims.

Recently studies by Dr Carl Heneghan (Prof. of Evidence-Based Medicine at Oxford) have shown exactly the same thing. Transmission of respiratory viruses by victims is difficult and the real causes of flu and colds are unknown.

Toxic components

Vaccines are filled with dangerous components, cancer-causing agents and pathogens. These include polysorbate-80, polysorbate-20, formaldehyde, aluminium, mercury, Ebola, anthrax, cancerous human embryo cells, Beta-Propiolactone, Gentamicin Sulphate & Polymyxin B, Neomycin Sulphate, Phenol / Phenoxyethanol (used as an anti-freeze) and PEG. These cause nerve damage, brain damage, cancer, seizures, dementia, immune system damage and much more. Check out the small-print contents information on vaccine websites to confirm this. Covid vaccines contain much worse contents.

Summary

Vaccines have killed and maimed millions of people and continue to do so. Potentially over 98 million people¹⁷ contracted cancer from the Salk vaccine alone.

Covid vaccines

Having covered this extensively for two years I will summarise.

What can we say with certainty?

- Professor Jeffrey Sachs was commissioned by The Lancet to lead an investigation into the source of SARS-Cov-2. He determined that it came from American biotechnology.¹⁸ No one took this matter further. [I stated this two years ago.]
- Prof David Martin has explained that there are patents on SARS-Cov-2 development in America and of the Covid vaccines going back 20 years or longer.¹⁹
- A 19 nucleotide sequence from a Moderna patent was discovered within the SARS-Cov-2 genome. The CEO could not explain this when asked.
- The Covid vaccines do not work and could never work.²⁰
- An Oxford study shows that vaccinated people have a 44% increased chance of getting severe infection and being hospitalised.²¹
- It is accepted by the Prime Minister, and the drug companies, that the vaccines do not prevent transmission or stop you getting ill; therefore, they fail as a vaccine.
- There has been a 370% increase in the annualised case rate.²²
- The mRNA and DNA technology is new and experimental. It changes the human DNA forever and the full effects of this are unknown. It should never have been rolled out without years of testing. It supposedly had less than three months.
- The Pfizer trial was a fraud. The Pfizer 6 month report showed no benefit whatsoever; the report was entirely negative. The release of the thousands of pages of data show that the vaccine was neither safe nor effective. More vaccinated people died in the trial than were vaccinated. Serious adverse reactions, including paralysis, were not reported to the FDA. Trial victim Maddie de Garay, who is now paralysed and eats with a tube, was said by Pfizer to only have '*mild abdominal pain*'. There were four times as many cardiac arrests in the vaccinated than the unvaccinated. There were no tests on pregnant women so the effect could not be said to be safe. The trial was un-blinded after three weeks. Multiple serious adverse reactions were known from the start. Why did doctors offer a vaccine to people that was an experimental new gene treatment that changed your DNA with no knowledge of long-term effects, did not have full authorisation and whose trial data and reports showed no benefit whatsoever?
- Pfizer admitted to clinical trial fraud in a federal court. They said that the FDA knew all about it!
- The Classen paper²³ confirmed that there was no overall benefit from all three of the US vaccines, but there was an increase in morbidity. It stated, '*Based on this data it is all but a certainty that mass Covid-19 immunisation is hurting the health of the population.*'
- The Benn paper²⁴ confirmed that the vaccines had no mortality benefit

- The choice of the spike protein to be manufactured in the body was the selection of the most toxic part of the claimed virus. It was known that it would have a deleterious effect on the body. The spike protein damaged multiple organs, such as causing heart muscle inflammation and swelling (myocarditis).
- The claim that the vaccine contents stayed in the arm muscle were a lie. The spike protein travelled throughout the whole body and remained in the chief organs.
- Various other components of the vaccine are toxic on their own. PEG causes anaphylactic shock in 30% of people (hence the immediate seizures at the vaccination site). Polysorbate 80 causes cancer. Graphene oxide in the blood lacerates the epithelium (inner walls of blood vessels) which is what causes blood clots, which then cause heart attacks and strokes. There are also multiple metallic toxins, which dramatically change the blood.²⁵
- Data compiled after the vaccine roll out shows that the vaccines cease to have any efficacy after five months; indeed they then have negative efficacy (make you more likely to get ill). Commensurate with the roll out there has been a massive spike in excess deaths among the vaccinated that is non-Covid (I will list this later). Countries with the highest level of vaccine take-up (such as Israel) had the most hospitalisations of Covid and later of non-Covid excess deaths. Countries with a low vaccine take-up had far fewer deaths.
- The various vaccine adverse event-reporting systems²⁶ are reporting millions of adverse reactions and thousands of deaths. In the UK over a million and a half adverse events and over 2000 deaths. It is accepted that these are under-reported and must be multiplied by a factor of 100²⁷ or at least 10.²⁸ This means that possibly 200,000 Britons have been killed by the vaccines already. Various researchers²⁹ have estimated that between 5 million and ten million people have been killed by the vaccines worldwide. Others say 20 million and injured over 2 billion.³⁰ Dr David Martin avers that by 2028 700 million people will have died from the vaccines.³¹ Dr Judy Mikovits stated long ago something similar.
- The US VAERS reporting system shows hundreds of thousands of vaccine deaths and millions of injuries. MIT calculated that 86% of reported incidents were genuinely caused by the vaccine. The Israeli safety studies also confirmed the causality of vaccines. Vaccination take up in Israel has dropped from over 90% originally to 2.4% in September 2022. This is despite the now admitted cover-up by the Israeli government of the adverse effects (first exposed by journalist Yaffa Shir-Raz).
- A Thailand study tested blood before and after the vaccine and found nearly 30% of young adults experienced cardiovascular injuries.³²

- The Bhakdi study showed that 93% of deaths after vaccination were caused by the vaccine.³³
- The Rose and McCullough paper shows how the vaccines cause myocarditis.³⁴
- There are over 1,250 papers published in the scientific peer-reviewed literature showing the vaccines cause significant adverse events.³⁵
- Ordinarily, after a few deaths, a vaccine is terminated. In the past this has happened after 25 deaths or 50 deaths (as in the case of the 2009 Swine Flu). The Covid vaccines have killed more people than every vaccine added together over the last 30 years and no one is considering terminating them.
- It is accepted that the vaccines are causing pericarditis and myocarditis in young people. This is not a minor problem, It will result in death within 5 years or possibly much sooner. The massive spike in teenage deaths from myocarditis is unprecedented. Kids do not get this disease naturally. A study³⁶ found that young people had increased risk of myocarditis after the mRNA vaccines.
- All over the world hundreds of athletes and sportsmen have dropped dead on the field. These are vaccinated people. This is unprecedented.
- Insurance companies are reporting a massive spike in deaths worldwide.³⁷
- Funeral directors and embalmers have been reporting vastly increased numbers of bodies. Embalmers are finding strings of clots up to six feet long in bodies.³⁸
- The data shows that the vaccines gradually completely destroy the immune system over a period of months. Many vaccinated people begin to die after 5 months.
- They also create ADE,³⁹ which means that when a person encounters a wild virus the body goes into a cytokine storm that causes severe medical issues and often death.
- It appears that the vaccines have been deliberately made to kill people slowly over a period of months or even years through destroying the immune system. This is why many vaccinated people are effectively getting AIDS at the moment. This means that this winter (which is predicted as being harsh) vaccinated people with compromised immune systems will die from minor diseases such as a cold, or from cancers that would normally be killed by the immune system.
- Some analysts are predicting that the vaccines will kill, eventually, 2 billion people.
- Dr Aseem Malhotra showed that the number needed to be vaccinated to prevent one death from Covid-19 runs into thousands. Also that the trial data (Pfizer and Moderna) suggest a greater risk of suffering a serious adverse event than being hospitalised with Covid. He also states, citing the FDA, that testing positive for antibodies is an unreliable marker for immunity or protection against Covid post-vaccination.⁴⁰

Updates of the vaccine situation September 2022

ONS bulletin of deaths (Deaths registered weekly in England and Wales).

- There have been 24,005 excess deaths since April.
- Mortality rates are highest among the vaccinated in all age groups.
- **The vaccine achieves minus efficacy after five months** (i.e. you are more likely than normal to be sick).
- **Most deaths occur after five months. After this the immune system is destroyed.**
- There have been 25,855 Covid deaths since Jan 2022 up to May, 91% of these were among the triple vaccinated.
- Covid deaths by vaccination status in England, 1 Jan to 31 May: Jan, 693 unvaxed, 3914 vaxed. Feb, 264 unvaxed, 2487 vaxed. Mar, 202 unvaxed, 2658 vaxed.
- **Since Feb over 90% of the Covid deaths are in the vaccinated.**
- Deaths by vaccination status in England, 1 Jan to 31 May: 1447 unvaxed. 13,666 vaxed, 12,442 triple/quadruple vaxed.
- **The vaccinated population is more likely to die than the unvaccinated of any cause other than Covid.** This is evidenced from May onwards (Age standardised mortality rates per 100,00 person-years by vaccination status for non-Covid deaths, 1 May to 30 Aug).
- **The CDC reports that the myocarditis risk is 133 times higher among the fully vaccinated.**⁴¹
- **Dr Aseem Malhotra shows that real-world data proves that the vaccines cause more harm than good and called for their immediate suspension.**⁴²
- Israeli data shows that myocarditis post-vaccination is at a rate of 1 in 6,000. Hong Kong data from male children and teens show a rate of 1 in 2,700. MHRA data shows 1 in 120 people with at least one vaccination suffer an adverse event. American data shows a rate of 1 in 800 (which is massively worse than Covid infection).
- Covid vaccines (not Covid) are causing myocarditis and encephalitis leading to death.⁴³
- **UK Government (ONS) confirms that Covid vaccines increase risk of death in all age groups.**⁴⁴
- **ONS data confirms vaxxed children are 4423% more likely to die than the unvaxed.**⁴⁵
- Florida recommends against mRNA jabs for males aged 18-39 due to an 84% increase in heart death risk.⁴⁶ This was based on a Florida Dept. of Health analysis through a self-controlled case series.
- The CDC confirms that aluminium in vaccines is linked to childhood autism and asthma.⁴⁷

- One in every 500 small children who receive the Pfizer vaccine are hospitalised by it.⁴⁸
- People dying in their sleep is linked to the vaccines.⁴⁹
- In New Zealand, 95% of dead people had received a Covid jab within two weeks of death, often within 24 hours, according to a funeral director (Brenton Faithfull).⁵⁰

It is clear that the vaccines are causing significant excess death,⁵¹ far more than observed during the 2020 pandemic year (which was low compared to the century average).⁵²

The pandemic was NOT a viral pandemic (most Covid cases were the flu; which disappeared in 2020; deaths were comparatively low for the century) but the period of the vaccine rollout is one of massive (not an exaggeration) excess death.

Some data points include (see slides for data sources)

- Age 20-30: 16.9 people were killed by the vaccine per person saved.
- Per 250 million vaccinated there were: 20 million injured; 2 million disabled; 1 million with a life threatening injury; 600,000 killed.
- **The vaccines killed more people than Covid.**
- In the US 7 million people are now permanently disabled by the vaccine.
- In the UK there were 13.7 vaccinated deaths per thousand people from 1 Jan 2021 to 31 May 2022 compared to 5.8 unvaccinated [ONS data.].
- Dr Naomi Wolf independently validated Kirsch's claims using different methods.
- **Multiple papers showed that the vaccines had no benefits and caused morbidity** (e.g. Classen paper, Liberal Part of Canada Report).
- The CDC's own data showed a signal triggered for death – but they ignored it. Freedom of Information requests show that the CDC lied about its VAERS monitoring.
- Local example: a large US neuro practice with 20,000 patients had no adverse event reports in eleven years but had 1,000 reports in 2022.
- **There is a 44 times higher risk of myocarditis in the week following injection.**
- Myocarditis cases by year: 2018: 11; 2019: 1; 2020:1; 2021:559.
- **Menstrual issues are elevated by up to 8,800 times.**
- **Acute cardiac failure elevated by 475 times.**
- There is a five-month delay in death peak after vaccination.
- ICUs are filled with the vaccinated.
- Most Covid deaths are believed to be caused by hospital protocols.
- There are over 2,000 articles in scientific journals showing harm.

⁵¹ Some may shout that correlation does not prove causation. But if there is enough circumstantial evidence collated, it is sufficient to establish the link. Add this to the testimony of thousands of people who developed serious adverse events (including losing limbs) immediately after vaccination and we can say with confidence that the causation is the vaccines. The more data that is gathered, the more this is established. Graphs of data also suggest this. Graphs of deaths and serious events closely correspond to the vaccine roll out.

⁵² See Institute of Actuaries age-standardised excess death graph. 2020 had a lower excess death rate for every year before 2009, going back 100 years. 2022 is exceptionally high.

The failure of institutions

Pfizer

| Pfizer trial data points |
|---|
| There were four cardiac arrests in the vaccinated group but only one in the unvaccinated group. |
| Although the relative risk reduction was claimed at 95%, the real 'absolute' risk reduction was 0.84%. |
| There was no significant reduction in serious illness or mortality from the jab. In the placebo group the risk was 0.04%. [I.e. the risk from the disease was low anyway.] |
| All-cause mortality was 19 deaths in the injected group and 17 deaths in the placebo group. |
| The pediatric trial used the wrong measure. [Antibody levels not reduction in symptomatic infection. The FDA had warned that antibody tests should not be used to evaluate the level of immunity from Covid.] |
| There were accusations of fraudulent practices by whistleblowers. |

The MHRA

This has been a complete shambles and close to malfeasance. It is heavily funded by Bill Gates and Big Pharma and has stated that it is not now a government regulator but a global enabler. Indeed, this is true since it serves as an enabler for pharmaceuticals products with no care about their potential harms.

Its leader, June Raine, stated that the Covid vaccines were safe and effective and had been through a rigorous trial process proving their safety. We now know that this is a lie. Even the Pfizer trial data (which the MHRA would have seen before emergency authorisation) showed categorically that the vaccine was neither safe nor effective.

It hosts the Yellow Card reporting system which demonstrates the vaccine adverse events including thousands of deaths. It also acknowledges that these figures are under-reported, yet has done nothing to investigate vaccine safety or provide any assistance to the vaccine injured. It has continually refused to answer questions posed to it by concerned citizens and professionals.

It is a public disgrace and should be terminated.

SAGE

Chiefly Chris Whitty and Patrick Vallance. These people lied to the public on many issues regarding Covid and the vaccine rollout. They are both in receipt of funds from Bill Gates and vaccine manufacturers. They need to be tried for malfeasance in public office.

The NHS

The NHS has wickedly forbidden staff to speak out about vaccine safety or the terrible effects they are seeing every day in patients badly damaged by the vaccines. Staff have been threatened with suspension or being fired, yet NHS management does not have the power to do this legally. 130,000 NHS staff refused to take the vaccines so many staff members know that they are dangerous.

Any medical professional could have researched the vaccine early on and realised very quickly that they were not safe. Soon after take up it was realised by all that they did not prevent infection or stop transmission⁵³ – so they were not effective either. Despite this,

⁵³ This was even publicly admitted by PM Boris Johnson.

almost all medical professionals administered the toxic drugs and experimental gene treatment. GPs admitted that they did not know what was in the vaccines – yet they administered them. They are legally culpable in the backlash that will eventually follow. It is reasonable that these people are prosecuted in courts and penalised.

Chemtrails: aerosolised vaccines

Various countries are already using stratospheric aerosolised injection programmes to vaccinate populations from the air without anyone's consent. One of the countries to admit this is Spain, but others are accused of it (e.g. Australia); America admits to vaccinating wild animals in rural areas (hard luck if you live there).

Countries are also using chemtrails that people breathe in for other purposes. In 2015 four whistleblowers from Spain's meteorological agency told the European Parliament that chemicals were regularly being sprayed over the country to alter the climate. The chemicals were lead dioxide, silver iodide and diatomite.

A report by the UN's Intergovernmental Panel on Climate Change (August 2021) shows plans for solar radiation management and greenhouse gas removal geoengineering using sulphate aerosols.

Chemtrails can be observed in the sky in every area of Britain every few weeks. No one knows for sure what these chemicals are, but observations show that they include harmful particles.

Our analysis suggests that adverse public health impacts may reasonably be expected from SRM⁵⁴ via deployment of stratospheric aerosols.

University of Michigan study.

Mosquitoes: vaccines by parasites

Genetically modified mosquitoes are being used to transmit vaccines.⁵⁵ This is a project funded by the US National Institutes of Health. A vaccine trial study used GM mosquitoes to vaccinate humans. The study results were published in the Science Translational Medicine Journal. Sanaria, a company funded by Bill Gates, is closely connected to the study. Despite mixed results, the researchers claimed that further trials are needed.

Using a genetically altered parasitic insect to inject humans with a trial drug is science fiction insanity. Where will this end?

Constant attacks on the immune system and induced maladies: death by sickness

Lockdowns

I wrote numerous papers exposing the evils of lockdowns since March 2020. The full extent of the evils is now being made plain by multiple scientific papers and protestations by academics and researchers.

One of the key effects was that the immune systems of everyone in lockdown was compromised. This was caused by: 1) a lack of exposure to sunlight (which creates vitamin D); 2) a lack of exercise; 3) a lack of fresh air; 4) a lack of provocation of the immune system with everyday pathogens keeping it in a fighting state; 5) a lack of social stimulation to generate happiness; 6) constant exposure to indoor toxins and stresses (such as EMF radiation, household chemicals etc.).

PCR tests

Cannot diagnose

PCR tests cannot diagnose any disease, let alone Covid-19. The inventor of them (Kary Mullis) warned practitioners not to use them for diagnosis under any circumstances. They are a tool in research to multiply particles.

The instruction manuals of PCR kits state that they are not intended as a diagnostic test.⁵⁶ Roche's LightMix Modular Assays produced by TIB Molbiol state: '*These assays are not intended for use as an aid in the diagnosis of coronavirus infection*'.

The cycle rate

The process magnifies particles exponentially through cycles. Anything over 28 cycles produces nonsense results usually expressed as a false positive. A dead fragment of an old cold will produce a positive result. Over 28 cycles 100% of results will be false. The NHS typically runs tests at a rate of 45 cycles, making every single result false. Why is this? Why is the NHS still forcing PCR tests on patients with no symptoms?

Proof that the test produces nonsense results is that the following items have tested positive: fruit (e.g. papaya or apple), water from a puddle, animals (goat, dog), Coca-Cola, and even sent back sterile with no contact with anything.

Useless because they pick up dead viral fragments

A paper on the government website⁵⁷ commands medics **not** to keep testing patients within a period of 90 days unless they develop Covid symptoms. This is because '*fragments of inactive virus can be persistently detected by PCR in respiratory tract samples following infection – long after a person has completed their isolation period and is no longer infectious*'. Why are patients still being tested weekly?

Quotes

PCR is not a test of infectiousness. Rather the test detects trace amounts of viral genome sequence, which may be either live transmissible virus or irrelevant RNA fragments from previous infection.

BMJ, 'Operation Moonshot proposals are scientifically unsound', BMJ 2020;370:m3699.

The FDA also admitted that: '*positive results ... do not rule out bacterial infection or co-infection with other viruses. The agent detected may not be the definite cause of disease*'.⁵⁸

Mass testing of asymptomatic individuals is likely to produce large numbers of false positives, either from the inherent limitations of the test or from past infections.

Rational Ground, Jennifer Cabrera, 'New CDC guidelines are aligned with science'.

RT-qPCR testing programmes for SARS-Cov-2 are wholly inadequate, poorly organised and surrounded by confusion and misinformation.

International Journal of Molecular Sciences, Stephen Bustin and Tania Nolan, April 2020.

Looking closely at the facts, the conclusion is that these PCR tests are meaningless as a diagnostic tool to determine an alleged infection by a supposedly new virus called SARS-Cov-2.

Torsten Engelbrecht and Konstantin Demeter, Covid19 PCR tests are scientifically meaningless, Off-Guardian, 27 June 2020.

PCR banned for diagnosis

In many parts of the world PCR tests are now banned. In America the CDC has scrapped them citing the fact that they cannot distinguish Covid from the flu. They have also banned Lateral Flow tests stating that they were useless.

⁵⁶ E.g. as those by Altona Diagnostics and Creative Diagnostics.

Drug delivery mechanism

Scientific analyses of the PCR test swabs reveal alarming results. These have observed the following (there are variations in different manufacturers):

- Ethylene oxide. This is used to sterilise the swab but it causes cancer.
- Quantum dots. These are microscopic concentrations of a drug.
- Hydrogel. This is another mechanism for delivering drugs equivalent to vaccines. Tests have also identified lithium in the hydrogel.⁵⁹ The DARPA hydrogel creates conductive crystals which grow throughout the brain reacting with living structures that are nano antennas. It enables living cells to respond to remote signals.
- Moving filaments. These are variously described as either graphene oxide, special nylon fibres or nano tubes. These detach from the swab and attach to the nasal lining close to the brain. They also migrate to the pineal gland (which has its own electromagnetic field). When detached they self-assemble into antenna to receive signals from a remote source (just as the Covid vaccines do using graphene). However they cause damage to blood vessels and organs. Graphene oxide acts like razors inside blood vessels causing damage to the epithelium, resulting in the blood clots, which kill people.

In short, the swab is a drug delivery system. People that receive repeated tests build up large doses of this drug / nano antennas given without any knowledge and consent of the patient (which is illegal).

PCR deaths

Many people around the world have died as a direct result of the PCR test. Two cases in Australia were taken to court by lawyers.⁶⁰ In one case an old lady suffered brain fog after a test, fell over and broke her hip and died from complications. In many cases the swab has broken the blood/brain barrier resulting in infections damaging the brain. In several cases the swab has fractured the bone protecting the brain and cerebrospinal fluid has poured out from the nose requiring urgent surgery.⁶¹ An Australian boy bled to death after a nasal swab. In Saudi Arabia an 18-month old child died after a test swab broke inside his nasal cavity.

Swabs inserted in an upward orientation into the nasal cavity (greater than 30 degrees) puts a patient at risk of serious injury to the thin and delicate areas of the skull base (attachment of middle turbinate and cribriform plate). How many people administering swabs understand this?

Facemasks

See my many papers on this.

Facemasks are ineffective, unscientific and stupid. Viruses are as small as 20 nanometres across (no bigger than 120 nanometres) while the pores in a cloth facemask are as big as 500 nanometres. Viruses go through them like a bullet through a wire fence.

Facemasks do immense damage to the body and should never be worn for more than 15 minutes. The list of problems caused is long but includes:

- Hypoxia (lack of oxygen); wearing a mask reduces oxygen intake by 20%. This causes dysfunction in cells and especially brain cells.
- Build up of bacteria on the inside and the outside of the mask. Bacteria grow exponentially and are then breathed back into the lungs. This causes respiratory diseases.
- Bacterial pneumonia.⁶²
- Suppression of the immune system.
- Bacterial skin disease.⁶³
- Cognitive dysfunction.
- Increased carbon dioxide intake.

When you consider that there is no benefit whatsoever in protection against viral transmission, you have to consider that the push for wearing them (still operative in the NHS) is malicious. Making people wear facemasks makes them sick.

Quotes

Even the criminally corrupt CDC states, '[A surgical mask] does not provide the wearer with a reliable level of protection from inhaling smaller airborne particles and is not recognised respiratory protection'. While the equally corrupt WHO says, 'If you do not have any respiratory symptoms such as fever, cough or runny nose, you do not need to wear a mask'.⁶⁷ And again, 'The use of a mask alone is insufficient to provide the adequate level of protection'.⁶⁸

The evidence of the benefit of using a face covering to protect others is weak and the effect is likely to be small.

Infra red thermometers

There are various types of these produced by different manufacturers. Judging by design, I believe the one used by the NHS is the Medipro, Non-Contact, forehead, infrared, digital thermometer made by Medisave UK. Some use a laser dot to target properly but they all

read a surface temperature and are notoriously inaccurate.⁶⁹ Doctors have warned that laser thermometers are dangerous and should only be used in industrial settings.

EMF spectrum radiation

They emit harmful infrared EMF radiation and are always pointed directly at the centre of the forehead – one of the most sensitive areas of the body to radiation. How could medics even think about using such a device?

It is claimed⁷⁰ that this radiation causes damage to the pineal gland beneath the forehead within the brain. The pineal gland controls serotonin and regulates mood; but it also helps to control the immune system through melatonin.⁷¹ Melatonin is an antioxidant and assists in regulating blood pressure, body temperature and Cortisol levels. It is critical for health.

Denials

Multiple organisations lined up to claim that these devices were fully safe, but these are the same people that deny there is any problem with cell phones or wi-fi.

All devices that emit non-ionising electromagnetic radiation cause harm to the body to a greater or lesser degree. It depends on the power utilised. [See later, ‘5G and EMF radiation’.] Critics claimed that the thermometers do not use radiation targeted at the skin but receives heat transmitted and reads the level. However, the device itself is using EMF radiation in the infrared spectrum close to the body – which is dangerous.

Symptoms

Patients that have been getting daily temperature checks have reported headaches, sleep disturbances and nightmares. If you are in hospital, demand (as I do) that the nurse takes the temperature on the wrist (it is actually more accurate).

Allopathic medicine

I have explained this many times. In brief: the allopathic medical system, that was developed by Rockefeller in the early 20th century, pushed out traditional medicine replacing it with drugs derived from petroleum products – thus enhancing the Rockefeller fortune. Previously, for example, a certain tree bark⁷² was prescribed and used medicinally to relieve mild or chronic pain and to reduce fever and inflammation; but now a synthetic aspirin pill is prescribed. Synthetic drugs all have significant side effects. Cocktails of drugs cause multiple unknown harms as these synthetic pills interact.

⁶⁹ One baby ended up in hospital unnecessarily because thermometer readings were wrong. Daily Mirror, ‘Mum warns about dangers of infrared thermometers after baby ends up in hospital’, 5 August 2020.

⁷⁰ Until specific studies and autopsies are performed we will never know.

⁷¹ In mammals the pineal gland is devoid of nerve cells, but consists of secretory cells activated by fibres of the autonomic nervous system. The cells contain serotonin, which is converted to the hormone melatonin. The amounts of melatonin in the gland, brain fluids, and plasma fluctuate in a 24-hour rhythm, peaking during darkness, and it is thought that melatonin and serotonin work together to regulate the sleep cycle. Melatonin is of immense importance in keeping the body healthy.

⁷² From the plant genus name *Spiraea*.

This system treats the symptom but not the causes of diseases and is thus helpless at fixing chronic illness. People are sick enough to become a market for Big Pharma but not sick enough to die for some time. To this are added expensive treatments that are useless, such as Chemotherapy which is officially less successful than doing nothing.⁷³

For example, people with chronic back pain are prescribed tramadol and other analgesics, or sometimes serious surgery – when all the patient needs is physical treatment by an osteopath or chiropractor. I have seen patients that have suffered for many years, taking huge amounts of debilitating pills, have their back pain cured in four hours of back manipulation (often due to a spine out of alignment).

The upshot of this is that many patients suffer for years and then die from the allopathic treatment. In some cases, such as vaccines, death comes quickly. Allopathic doctors are the third highest cause of death in America⁷⁴ where 40,000 medical mistakes are made every day.⁷⁵ Many of these deaths are from prescribed drugs. One of the largest killers in recent years was the prescription of opioids.

Summary

There are many government initiatives that are actively damaging the immune system and/or bringing in policies that actively cause medical harm. Why is this not being adequately challenged? Why are they acting against the people?

The destruction of the NHS: death by neglect and lack of medical treatment

I predicted some time ago that the NHS would be destroyed within two years after the lockdown; it is actually in the throes of self-destruction right now. A full analysis of this would require a book but I will try to expose the chief elements here.

During the lockdown and the Covid fantasy doctors, nurses and all medical practitioners (bar a very few) decided to stop centring on patient care and followed the demands of the government and various elite establishments (WHO, WEF, MHRA, Bill Gates, CEPI, GAVI, SAGE etc.) to obey a plan that was detrimental to patients. This included many elements, all of which had no validity in medicine and were harmful. They included: lockdown of the healthy, PCR tests forcing quarantine of the healthy, facemasks, social distancing, PPE, enforced DNR notices,⁷⁶ sending sick patients into care homes where they infected everyone, the Midazolam / morphine / Remdesivir protocol, ventilators in unwise

⁷³ The Journal of Oncology states that it is only effective in 3% of cases. However it also notes that patients naturally get better 4% of the time by doing nothing. Chemo is less efficient than doing nothing. Why would anyone trust a treatment that officially fails 97% of the time?

⁷⁴ A JAMA article by Dr. Barbara Starfield, from Johns Hopkins School of public health, came to the conclusion that doctors (or the conventional medical system) were the third leading cause of death. Gary Null published a report which confirmed this. See: Dr G Null, book: *Death by medicine*, (2011).

⁷⁵ *The New England Journal of Medicine*, November 25, 2010.

⁷⁶ For an example of a death pathway of a man in his fifties see UK Column, Coronavirus, ‘No time to grieve: death by pathway’. An unvaccinated reasonably fit man who tested PCR positive is given a death sentence. This is common.

circumstances, shutting down normal hospital care / scans / treatments / elective surgery, making the NHS a Covid-only service, and so on.

As the truth has begun to come out, many medical staff waking up are racked with guilt over what they have done. This even applies to ambulance staff who ferried sick patients into care home where they killed many people. Some staff are now mentally ill through this guilt. I have seen reports that 50% of doctors are preparing to resign or retire in the coming months.⁷⁷ This is on top of massive staff shortages already [see later]. Large numbers of more mature nurses, who have seen the collapse and cannot face it, have already left. You can find many heartbreaking testimonies on-line of staff that have resigned due to intolerable malpractice in the workplace.⁷⁸

This has already left certain departments in serious trouble. The result is wards with insufficient nurses and doctors and recruiting people who are not qualified to do the job. Many disciplines now have staff who are completely inadequate to the task, in terms of qualifications, experience and temperament. So far this is not the case in ICUs and dialysis wards (where nursing staff are excellent and well trained) but some departments (such as A & E and respiratory wards) are in serious disarray (admittedly with some good staff trying to hold back the raging torrent).

The ambulance service is already in collapse.⁷⁹ Waiting times are through the roof, even as long as 12 hours in some cases. I have even heard of a patient waiting on the floor for more than a day. Then the ambulances cannot get into A & E and queue in the car park. Many heart attack patients have died in their ambulance after waiting several hours. Several years ago my father waited 12 hours for an ambulance called by the GP and my mother waited 9 hours on the floor (which was televised by the BBC). Both subsequently died in hospital. But things are much worse now. In August the West Midlands ambulance service was terminated for several weeks because it couldn't operate. In some areas today patients are taken to hospital by police vehicles. Other hospitals have warned patients to get someone to drive them in by private vehicle. Third World countries do not act as bad as this.

Worse is the callous attitude that has developed among many medics as a result of the Covid malpractice. There are stories after stories of patients being treated appallingly: left without water for days on end; left without food for a week; left in their own filth for days; rebuffed by doctors when questioning wrong treatment (such as Remdesivir).⁸⁰ You can find videos of concerned family removing patients from hospital with great difficulty due to concern for their life (nurses, doctors and security staff tried to stop them). In all cases I have seen the patient recovered well at home after being at death's door in hospital. One example is the case of funeral director John O' Loomey. It took several family members, friends and a private doctor to get him out. He swiftly recovered with good care at home.

An analysis

In every area the NHS is falling apart very fast; this is now being observed in hard data.

- The NHS is very adequately funded. It is about middle of the level of funding of other European countries but its performance is far lower. There is no reason for it to fail other than bad management.

⁷⁹ See UK Column, Health, Debi Evans, 'The ambulance crisis: How much of it is ambulance-related?'

⁸⁰ See various comment pieces by Dr Vernon Coleman.

- On the recent Civitas analysis of international performance, the NHS was near the bottom (17th out of 19). In almost every department the NHS was at or near the bottom (only the US fared worse).⁸¹ *'In international comparisons of health system performance, the NHS almost always ranks in the bottom third, ... the UK could easily be mistaken for an Eastern European country'*.⁸²
- There are now 7 million people on long waiting lists.⁸³ Some people are being told to expect to wait a further two years before getting vital treatment, such as hip surgery. Thus patients in extreme pain are to expect to live with that pain for years.
- 94% of the people that died from Covid in recent months were vaccinated. Over 90% of the people in hospital are vaccinated. The vast majority of people dying from non-Covid are vaccinated.⁸⁴ Remember that doctors, nurses and the medical establishment coerced people into being vaccinated. The truth about the vaccines is slowly emerging mainstream, which is why the recent booster jab was an utter failure in take up.
- Cancer rates are through the roof. You are at a greater risk of dying from cancer in the UK than in most European countries. On the rate of cancer frequency, Britain comes in at 13th (Wikipedia). *'We have lower survival compared to other countries'* (Cancer Research UK.)
- A poll revealed that more than two in five (44%) of the most senior hospital medics are planning to leave the NHS.⁸⁵ The BMA [British Medical Assoc.] warned of a complete collapse of the NHS. This could only occur if the morale in the NHS was at an all-time low.
- England is already short of 12,000 hospital doctors and more than 50,000 nurses. The NHS has also lost 3,000 dentists.⁸⁶ Some people have not been able to see a dentist in over three years and are pulling teeth with pliers.
- More than 332,000 people have been on waiting lists for more than a year.⁸⁷
- The NHS has fared worse than other countries in dealing with recent crises.⁸⁸
- A nurse's pay is lower than a dustman's.
- Ambulance drivers and crew are paid the minimum wage.

The irony

The insane measures implemented by the UK government during the Covid farce were supposedly to save the NHS. The result was empty wards, sick patients too afraid to go to hospital, scans not done, cancers not recognised, treatments postponed and clinics suspended. Bored, unoccupied and frustrated nurses took to staging dance routines in wards and corridors posted on TikTok. This led directly to an overwhelmed NHS when the lockdowns and fear subsided. The government policies contributed directly to collapsing the NHS as any moron could envisage.

Patients that were very sick already in lockdowns waited until their treatment was either more complicated and time-consuming, or were terminal requiring palliative care but nowhere else to go as care homes closed and 40,000 unvaccinated carers were sacked.⁸⁹ In addition, the vaccines promoted by the government and NHS, the PCR tests and facemasks have all contributed to a higher number of sick people than usual. Most of the people needing treatment in hospital are vaccinated.

Government meddling has killed the NHS.

The great question

Why is the NHS failing?

That the NHS is in freefall is beyond doubt. The question is, why is this so?

It should not be failing.

- It is very adequately funded.
- It has vast experience since it was the first state-funded, free at the point of delivery health care system.
- It was formerly top of the international league tables for high standards.
- It had tens of thousands of dedicated staff that had decades of practical experience.
- It had protocols for health care that ostensibly worked.
- It has a network of local hospitals that are very handsomely provided for in terms of medical equipment.

The answer is political.

The NHS has suffered from decades of bad decisions and bad reforms made by various governments. These include:

- Multiple unnecessary reforms, first one thing then another all causing unnecessary chaos. When David Cameron became Prime Minister he declared that there would be no more needless reforms in the NHS. At that very moment the health secretary was already preparing the biggest top-down NHS reform in decades at a cost of 20 billion.
- Removal of clinicians from hospital management replacing them with non-clinical, callous, greedy, professional managers.
- Massively multiplying the number of expensive incompetent managers.
- Removing beds and closing wards. 10,000 beds were secretly removed immediately before and during the Covid crisis.
- Closing hospitals.
- Centralisation in mega hospitals instead of local community and specialised hospitals.

⁸⁹ However, 130,000 unvaccinated hospital doctors and nurses were not sacked!

- Stopping the normal historic practices of GP surgeries, replacing them with telephone triage, zoom consultations, cancellation of home visitation, allowing GPs to only work three-day weeks at high pay etc.
- Greatly reducing nursing training. Removing nurse-training bursaries. Closing nurses' homes in areas where accommodation is limited and expensive.
- Allowing medical universities to take a majority of foreign students (who pay more) who return home, instead of qualified British medical students.
- Student-loan packages for students who do five years at university building up huge debts.
- Reducing or removing previous protocols that were effective.
- Selling off many aspects of the NHS to private (usually American) companies and hedge-funds. Often these performed worse than the NHS. E.g. the Blood Transfusion Service was sold off over 20 years ago to a US hedge-fund and it is now failing.

Since all these trends were detrimental to good health care, the next question is: was this deliberate or was it incompetence? If it was incompetence, why is it that there were multiple acts of incompetence by many politicians and governments one on top of the other? It is highly unlikely that there were no intelligent, competent people involved during the period of deterioration (say 30 years).

The conclusion forced upon us is that this deterioration was planned. Superior powers want to fragment and privatise the profitable parts of the NHS and want it removed as a do-it-all health care, free at the point of delivery system. Most current hospital services are to be destroyed [see next]

The Great Reset goal: the 'NHS Long Term Plan'

'The plan proposes to shift resources out of hospitals into community services and primary care' (Wikipedia, 'NHS Long Term Plan'). Echoes of Maggie Thatcher's selling off of the mental hospitals replaced by treatment in the community (i.e. no care at all).

The strategy being rolled out by the NHS for the future is truly alarming. It is essentially founded upon an automatic digital system with as little human contact as possible.⁹⁰

GP surgeries are to go, along with many consultant clinics. Patient diagnosis is to be performed partly by algorithms and partly by remote zoom appointments. You will not see a doctor anymore but will first be triaged by a 'phone call to a receptionist and then have a clinic using remote video link (Zoom, Face Time etc.). Of course, it is impossible to properly diagnose a patient this way as the lockdowns proved. Multiple people died, such as from cancer, due to wrong diagnoses time after time. We will never know how many died this way but I have heard very many tragic stories. What happens in power blackouts?

In many cases you won't go to hospital either. New technologies mean that scans can be performed by your mobile 'phone from your home. Health data will also be transmitted by your 'phone. A determination will be made without you being present and pills prescribed without you ever having seen anyone face-to-face.

In some cases patients will be able to see a pharmacist who will be able to prescribe basic medications. This is already in operation now. Thus someone with no medical training is determining your medical condition and giving you pills.

⁹⁰ See UK Column, Debi Evans, 'NHS Long Term Plan and Mental health Implementation Plan: Phoenix or dinosaur?' for a summary of the NHS' history and future.

The plan is that many hospital services will disappear completely. They will always have to deal with emergencies and trauma surgery but most other departments are going to close. The goal is treatment at home for almost everything.

A summary of the plan's objectives⁹¹

- There will be restrictions on who goes into a hospital and for how long.
- Hospitals are to be in the home in the form of virtual wards using remote monitoring.
- Nurses and doctors will be artificial intelligence; treatment will be performed by robots. Human contact is minimal.
- We will all have a digital personality to tailor medicine.
- The system is centralised and digitised.
- The UK NHS is to become the global life sciences superpower.
- The MHRA is a global enabler for Big Pharma.
- Community pharmacists will replace GP surgeries for primary care.
- Appointments will be virtual ('telemedicine').
- There will be personal health budgets by 2024.
- A&E will be replaced by 'Urgent Care Centres' plus in-out recover at home treatment. Overnight facilities will be eradicated for most cases ('same-day emergency care').
- Nursing will abandon traditional training to be replaced by online qualifications and apprenticeships.
- Everyone will be graded on the 'electronic frailty index'. There is an unclear policy on people being refused treatment.
- Monitoring at home will be by 'wearable devices'. This will include location trackers.
- Personal health records will be included in NHS services such as NHSx (NHS Digital).
- Vaccines will be rolled out within 100 days of requirement.
- The Clinical Assessment Service is a team that provides specialist advice and prioritises cases. All members will have access to all your records. The five priorities for treatment are: stroke, heart attack, major trauma, severe asthma and sepsis. Other conditions may not be granted admission.
- GP services will be digital.
- Antibiotics will be reduced and possibly eliminated.
- New technologies will re-programme a patient's immune system with cell therapy.
- People on a reasonable income will be forced into private health care.

The public never voted on this; it was driven from the top-down by unelected bureaucrats and people with great international influence. It is not centred in the care of the patients but the convenience of the state. People should remember that it is their taxes that pay for the NHS and that together they form a bloc that can overthrow governments. They should not tolerate this experiment that will cause mass death (which is the goal).

The energy crisis: death from exposure

This is well understood by now and does not need extensive comment.

- The energy crisis and massive price rises were caused by government policies. These include: de-commissioning coal fired power stations. De-commissioning nuclear power stations. Trusting that renewables would meet the grid demand (impossible).⁹² Failing to store gas and oil and even destroying storage facilities.⁹³ Engaging in stupid, self-harming, sanctions against Russia. Energy advisors to the government are now openly stating that the nation's energy policy for decades has been utterly foolish and must now change.
- Prices next year will rise by 80%.
- Already businesses and domestic users are feeling the pinch. The Brewers and Vintners Assoc. has predicted that if nothing is done every pub in Britain will close by Christmas. One famous celebrity chef pub in Yorkshire revealed that his gas bill had increased from £5,000 per month to over £40,000. This will double by next October!
- Poor people will not be able to afford to heat their home this winter. Millions of people are already in fuel poverty [spending over 10% of net income on fuel]. The Child Action Poverty Group states that by January 2023 over 80% of large families, lone parents and pension couples will be in fuel poverty. Some will be spending 71.7% of net income.⁹⁴ This could easily mean that tens of thousands of people will die from the cold. In 2018-19 over 17,000 deaths were due to cold housing.⁹⁵ This winter will be very much worse.
- In colder parts of Northern Europe people are already burning garbage to heat their homes, which will poison them (they have been forbidden from gathering wood from forests).
- The energy crisis will raise the cost of inflation and food prices even more, month by month.⁹⁶ The cost of food will become prohibitive if nothing is done. Some items have already risen by over 100%.
- Some German economists have predicted that the German economy is likely to collapse before 2023 unless there is a change in energy policy. If Germany collapses, then the EU economy will also collapse. In Germany there is already energy rationing. German smelting companies have shut down; to restart them would cost millions and take months. BASF has suspended industrial production for the first time of unceasing production for 60 years. Italian restaurants are already using candles. France is in an energy crisis of its own as its nuclear power stations are off-line due to corrosion. In

⁹² Depending on the weather, renewables contribute as little as 3-5% of the national grid power.

⁹³ Such as the Rough North Sea reserve which was capable of storing 100 billion cubic feet of gas. This was double the storage facility in operation in the UK. Centrica Storage Ltd closed it in 2017 because the government refused to subsidise necessary maintenance.

⁹⁴ CPAG, 'Fuel poverty: estimates for the UK', 2 August 2022.

⁹⁵ E3G, '17,000 people in the UK died last winter due to cold housing', 15 February 2020.

⁹⁶ The rise in the cost of fuel means that transporting food and food production costs much more. Plus a higher energy cost to supermarket's and distribution centre's infrastructure (lighting, heating, and power). How will supermarkets function during a blackout where everything runs on computer systems, including the checkout? In the 70s during the blackouts we put candles on trolleys and used mechanical tills. This is no longer an option.

Poland, which relies on Russian gas, people are chopping down trees for firewood in preparation for winter.⁹⁷ The situation in the EU is serious. The EU has to admit defeat and terminate sanctions – but it currently refuses to do this.

- The energy crisis and supply chain collapse (e.g. closure of steel factories) means that there are no materials to manufacture Green energy systems (e.g. turbines). This creates a perfect storm.
- The UK government has just announced that there will be power cuts between 4 and 7pm (just when people need power most for evening meals after school / work) in the winter.
- According to the US EIA, the US has just 25 days of diesel reserves left.⁹⁸
- Note that already in 2022 there have been 90,000 demonstrations and protests world wide just regarding energy. Germany is putting the military onto the streets from 1 October. Protests in France were met by militarised police teams who brutally injured innocent demonstrators acting peacefully.

The energy crisis will undoubtedly lead to mass deaths all over the world.

Economic collapse: death from unemployment

I have covered this many times. The slow collapse of the economies of the world is gathering pace as the chickens come home to roost; some nations have already collapsed (e.g. Sri Lanka). The current rage for printing money cannot continue; the laws of economics insist that this will cause hyperinflation in the end. ⁹⁹

When an economy collapses there is mass unemployment. This, in turn, causes an explosion of deaths. Rises in unemployment always raise mortality rates.¹⁰⁰ A 1-% rise in the unemployment rate is associated with 40,000 deaths. Unemployment in men causes a 40% increase in premature death risk or, according to others, 63%.¹⁰¹

There are possible signs that there will be an economic crisis beginning after the end of October. The Vatican has called back all its global financial holdings into the Vatican bank. The pound Sterling has crashed to its lowest ever level. Banks have stopped scores of loan /

⁹⁹ Banks have followed wrong economic systems for greed. Austrian economics (based on true principles) demonstrate the error of this. Banks are really broke. Printing money and pursuing low-interest debt-based systems just creates inflation. Eventually inflation has to be faced. [NB there are three economic systems: Keynesian, Chicago and Austrian.]

mortgage plans. The euro is under threat. Economists are warning of a severe crisis. Inflation is starting to spiral out of control. Bonds around the world are falling. Crypto currencies are collapsing. GDP is stalling. Britain is effectively in stagflation already. China has already effected bank bail-ins.¹⁰² Western banks have changed their terms and conditions and warned of bail-ins. The situation is serious. [Conversely, Russia is thriving.]

An economic collapse will cause many deaths and much suffering. The Great Depression resulted in high mortality but we are facing an economic threat that is much worse. One banker called it, ‘*a perfect storm upon a perfect storm*’.

A summary of the economic problems in Britain.

- High inflation. In reality this is already around 20%. [Goldman Sachs predicted that it would reach 22% in 2023. Deutsche Bank predicts a sterling crisis and a current account deficit of 10%. This is unprecedented outside basket-case emerging markets.¹⁰³]
- Failure of the Bank of England to deal with high inflation. [It needs to raise interest rates to at least 15%.]
- Inflation was chiefly caused by an excessive printing of money (quantitative easing)¹⁰⁴ and lockdown polices (paying £439 billion to stop people working; PPE waste; useless track and trace systems etc.).
- Paying millions for vaccines that have done no good but have caused harm.
- An energy crisis that has no fast solutions and could last years. This could have been remedied if Britain cancelled Russian sanctions and bought cheap gas from Russia. It refused to do this. With the sabotage of the Nordstream pipeline, this option is no longer open. The energy crisis is severe and long-lasting. Fracking will take years to go online and is not necessarily feasible. It is not the answer. Coal and nuclear power stations will fix this problem but will take many years to commission.
- Food supply chain problems. Food prices increase even before inflation.
- Government waste.
- GDP is collapsing.
- Uncertainty about sterling.
- An enormous trade deficit.
- A budget that caused a sell-off in the Gilts market.
- Pension funds facing huge losses.
- Selling off of British bonds.
- There is already a recession (being denied) and soon unemployment will increase (car sales are already down and this is a sign of impending unemployment).
- In recent weeks the Bank of England has had to support government gilts¹⁰⁵ (buying debt by printing money) three times in two weeks to stop pension funds from going bankrupt. This is almost unprecedented and indicates serious problems with the economy. It also made statements that spooked the markets causing a currency and bond crisis. [Note that the Bank of England actions were designed to force a U-turn and bring down the new Truss government (the chancellor has already been fired). The

Inflation: death from poverty

This needs little exposition. I have outlined the causes of this many times. A few points are all that is necessary.

- The prime cause of the current high inflation was the excessive money printing of the Bank of England. The printing of money, especially during the lockdowns where people were paid not to work, is why we are now in inflation. We are also in recession. £439 billion was wasted on lockdown policies.
- This current inflation is the most serious economic event since 1929. It is already in the early stages of stagflation (inflation plus low economic growth) and is heading towards hyperinflation (think Weimar Germany or Zimbabwe).
- The government can primarily fix this with very high interest rates – but the Bank of England is failing to do this. If this continues, inflation will go through the roof and take many years to sort out; unless there is a war (this is what stopped the Great Depression in 1939).
- The big impact will be on food prices. This will lead to shortages and starvation. This, in turn, will lead to riots and unrest.
- The World Bank has already concluded that millions will die of starvation in the near future; mostly in the developing world.

Inflation will contribute to the deaths of poor people, mainly through starvation, lack of heat and malnutrition.

Note: It is likely that there will be a short period of dis-inflation¹⁰⁸ (not deflation)¹⁰⁹ in the coming months but this will be overtaken by a sudden rise in high inflation afterwards as a

¹⁰⁶ Note that Kwasi Karteng’s budget lowered taxes and raised spending. He was immediately sacked after only weeks in the job. The new chancellor, Jeremy Hunt has announced tax rises and a squeeze on spending – which is what the Bank of England wanted.

The food supply crisis: death from starvation

Summary

Again, I have explained this many times. Chief points are:

- Farmers are being paid to stop farming, either to quit, or to cease planting grains and grow wild flowers.
- In America farmers are having contractors plough up the grain harvests.
- Globally, there have been over 120 food processing plants and warehouses burned down. Such co-ordination implies planning. Another major food supply market burned down in Europe this week.
- Transport systems in the US have terminated their contracts to transport food items.
- The cost of fertiliser is through the roof and supplies are hard to find. Some farmers have stopped planting wheat for this reason alone.
- The cost of fuel has skyrocketed so that this is another reason why farmers have stopped planting energy demanding crops.
- National leaders bewitched by Green Net Zero policies are killing herds of cows due to the claimed methane problem. Farmers in the Netherlands are being told to cull 90% of their cattle. Herds of thousands of cattle have been found dead in the US. Jacinda Ardern has just imposed the first ever methane tax on farmers causing mass protests in New Zealand.
- Leaders are demanding that people eat insects instead of meat. Insects are already on the table of Welsh schools. Supermarkets, such as Morrisons, are already selling insect food (which is full of parasites). Synthetic meat grown in a lab is being rolled out.
- Inflation is driving up the prices of food items already. Some items are 100% dearer.
- There are supply chain collapses caused by national lockdowns.
- Global institutions have warned of a worldwide famine by 2024.¹¹⁰
- Sanctions against Russia has led to the termination of Russian exports to Britain, the US and Europe in response. This includes grains but also other supplies essential for food production, such as fertiliser and chemicals. Russia now has a bumper wheat crop and will not starve; in addition it does not have runaway inflation and its currency is booming.
- There have been massive floods and also droughts in various places crippling food exports.

Example

To show how the Elite that control the world hurt the poor in the developing world and aggrandise items for themselves, take the recent restoration of grain supplies exported

¹⁰⁹ A lowering of product prices.

¹¹⁰ United Nations, 'Famine knocking at the door of 43 million worldwide, WFP [World Food Programme] warns, 22 June 2021.

from Ukraine. Where is this grain going? It is being diverted to Western nations. Only 5% is going to the developing world which urgently needs it most.

This was explicitly referred to by Vladimir Putin in his speech celebrating the accession of the sovereign Donbass republics into the Russian federation by self-determination¹¹¹ (well worth reading the text). Note that alone amongst world leaders, Putin made direct reference to the Lord Jesus Christ as a model and affirmed that western policies were satanic.

Chemtrails

See many previous papers for an explanation of geo-engineering. See also Dane Wigginton's website, [geoengineeringwatch](http://geoengineeringwatch.com). American congressional documents prove that this programme has been underway since 1945. It was manifestly exhibited in Operation Popeye in the Vietnam War.

The geo-engineering programme of stratospheric aerosolised injection of substances from aircraft is doing immense harm to the soil of the planet. While the purpose may be other issues (control and dumbing-down of humans, vaccinating humans, weather modification etc.) the literal fall-out is poisoning the soil. This takes the form of multiple elements and molecules, including aluminium oxide and barium, As this continues (you can see the grid-cross patterns of linear clouds every few weeks in Britain) the soil will reach such toxic levels that plants will not be able to grow. This will mean the end of food.

Ecologists measuring the constituents of soil and water samples are already expressing alarm at powerful toxins being found even in high mountain soil and water sources. The psychopathic Elite are literally poisoning the Earth's crust.

[Aside: the Elite's plan to kill all livestock, apart from causing famine, will ruin the soil. Cow pats and other animal dung is full of good bacteria and chemicals that fertilise the soil they graze naturally. No animals – dead soil.]

Summary

Experts are predicting that millions will die from starvation due to these crises, especially in the Third World.

Although famines are already beginning in the Third World, due to local conditions and a lack of exports from Europe and USA, the main famine in the West will develop in 2023. There will be shortages of some food and high prices of food this winter, but the real problems will hit next year lasting possibly into 2024. This is when current policies will result in low food produce, notably grains, dairy and meat.

However, inflation now (which will get much worse over time) is already resulting in lower income people neglecting healthy food and purchasing processed rubbish, which is cheaper.

The mainstream media did not have reporters on the ground (which was being shelled by Ukraine). However, over 130 independent and professional reporters oversaw all the polling stations and reported that it was a professional, free and fair plebiscite. Several of these have now been put on a Ukraine 'kill list' (such as Vanessa Beeley) and they have been castigated falsely by the EU, UK and the US. Ukraine also threatened to kill every citizen that voted. Note that the Donbass is majority Russian and the area has been part of Russia for 1,000 years.

Marxist Communism by stealth on nations which historically rejected its revolutionary attempts. A collectivist, centralised state will control all these items.

Food toxicity: death from poisons

Having explained this several times I will summarise.

Most food in the supermarket shelves is toxic – full stop. All processed food is toxic, but items that are considered to be healthy are often toxic as well. Most salmon is toxic being full of heavy metals from ocean pollution. Farmed salmon is full of antibiotics, growth enhancers and infection caused by parasites (buy wild Alaskan salmon). All large fish, such as tuna, are toxic because they are top predators of smaller fish that have ingested oceanic pollution, so the poison is concentrated.

Many products labelled as healthy are far from it. Those that have reduced fat have the taste boosted by High Fructose Corn Syrup and additives. Those that have reduced sugar have the sweetness replaced by aspartame and similar nerve poisons. Other foods are filled with additives and preservatives like MSG, which is very unhealthy.

The only food on supermarket shelves that is relatively safe is organic food. In America even this is untrustworthy as the law enables food producers to label GMO foods as organic.

Many GMO products are highly dangerous because they contain high levels of Glyphosate,¹¹³ which causes cancer. The body cannot eliminate this poison. Over 90% of Americans have tested positive for Glyphosate, even newborn babies. It is present in mother's milk. Some staples are almost all GMO; including soy, American corn and oats. If you eat porridge, unless you purchase organic oats, you are consuming Glyphosate.

Food processing and storage practices produce many toxic items such as trans fats, nitrates and Acrylamide. All seed oils are toxic, including rape, sunflower and canola (an American type of rape). Something like crisps are highly toxic because they contain small amounts of real vegetable but large amounts of chemicals, which are then heated to high temperatures and combined with trans fats forming Acrylamide, which is toxic.

Example: A fiend recently developed hypertension and her doctor typically just gave her blood-pressure reducing drugs which made her ill (headaches, nausea etc.). I asked her what had changed since the problems began. She explained that she had started eating a packet of crisps every dialysis day (three times a week). I told her that this is what likely caused the spike and she should stop eating them.

Processed table salt is highly dangerous because it contains aluminium as a flowing agent and also silica, which cuts the walls of blood vessels. Good quality sea salt (Celtic or Himalayan) is good for you.

Bottled oils are bad for you; including olive oil. This is because the contact with air causes it to go rancid. The oxidation increases when you heat the oil up in cooking and this causes inflammation in the body. Inflammation is one of the key causes of disease. It is safer to cook with butter, rendered animal fats or coconut oil.

¹¹³ GMO staples are engineered to withstand high doses of herbicides and pesticides, such as Glyphosate. Some are genetically engineered with Glyphosate.

All soda drinks (fizzy drinks) are bad for you. Most fruit juices are also bad, being made from concentrate and not real fruit. For example, most orange juices look orange because carrots are added for colour. No oranges are present.

Polyunsaturated fat oxidises more easily than other fats, especially in excessive light and heat which turns it into harmful compounds, such as in the process of making a spread. So the claimed benefits of modern spreads is a lie as was the demonisation of butter. Butter is good for you; processed spreads are bad for you. Vegetable oils are already prone to oxidation before any processing.

Hydrogenated fat is formed when an unsaturated oil is bombarded with high pressure hydrogen. This is how vegetable oil is turned into solid margarine. The economic advantage is that these have a longer shelf life and they are cheap to produce. Hydrogenated fats are found in foods and especially in processed food, such as biscuits, peanut butter, crackers etc. Hydrogenated fat also contains trans-fatty acids. Thus one should avoid all food that is hydrogenated or partially hydrogenated as well as deep-fried food.

We could continue. What is necessary is eating good quality, organic, local food in season and avoiding processed foods and items that have travelled long distances across the world to give you out of season products. Have a balanced diet of varied, good quality, food items that are cooked simply including raw food where possible.

People that eat processed food all the time and do not choose wisely will certainly develop medical problems. Many of the modern illnesses, including cancer, arise from the toxic food that people eat. It is impossible to know the number of people that die from eating toxic food but the number is high. For example, if you eat crisps every day your chances of developing cancer are huge.

Before the onset of modern life and eating processed food people did not develop cancer. Cancer was virtually unknown in the 1800s; it was a very rare disease. Now one in two people will get cancer. Many deaths from poor health derive from eating bad food.

Water scarcity and contamination

One problem is that when the energy crisis results in long periods of blackouts there will be no running water, which is pumped from reservoirs and aquifers using electricity. This has not yet been sufficiently considered. However, there is another problem.

Due to a combination of scarcity and pollution, there is a global shortage of water. This is combined with the fact that the water infrastructure, even in the US and UK, is in dire need of updating, repair and replacement. Since the UK water supply is in the hands of foreign investment companies, there has been a lack of infrastructure investment in favour of dividends to shareholders. Billions are frittered away while millions of gallons leak every day.

Then there is the problem of contamination. Watercourses are being poisoned by agricultural bio-sludge, fracking, fertilisers, herbicides, pesticides, chemical pollutants, micro-plastics and other toxins.

In America, E.coli contamination was found in Baltimore. Toxic arsenic levels were discovered in New York and Jackson (Mississippi). 180,000 people were recently left without water. Michigan, not long ago, had a serious problem with lead contamination. Britain also has had a series of contamination effects because the purification system is so poor. Contamination issues include: arsenic, fluoride, drugs, pesticides, polyfluoroalkyl substances (PFAS), cryptosporidium, sewage waste, and micro-plastics.

NASA has mapped groundwater storage aquifers and 21 have already exceeded their sustainability tipping points. Areas used to having water security are going to lose their water.

Britain has no water grid system, despite calls for this in the 1950s. Some areas that derive their water from areas of high rainfall in Wales (such as Birmingham and Manchester from places such as the Elan Valley reservoir) have more water than they need but other areas, such as the South, are close to the edge and rely on consistent rainfall.

In the future water scarcity is going to lead to deaths.

Introduction

The planet and all life-forms operate with a constant electrical frequency, 7.83Hz (the Schumann Resonance). Birds and sea creatures use this to navigate the Earth. Thus human beings are electrical creatures. The human brain operates at frequencies between 0-100Hz while the heart functions at 2Hz; so the body’s electrical system operates at very low levels of power and is delicate. Nerve impulses are waves of electrical signals while every person has his own electrical and magnetic fields.

Our brains are so sensitive that brain wave changes have been observed from radio and microwave transmissions as low as one billionth of a microwatt. A human brain generates magnetic fields of about 0.0000001G (a fridge magnet has a magnetic field of c.50G). Human cells operate between 20-25 millivolts (slightly higher if the cell is being repaired).¹¹⁴

In short, our body is electro-magnetic and very sensitive to outside more powerful electromagnetic forces.

There is a physical effect from non-ionising radiation of all sorts;¹¹⁵ it is a silent and hidden danger. This comprises electromagnetic frequency (EMF) radiation to microwaves and beyond. All electromagnetic radiation (EMR) causes bodily changes depending on how intense the frequency (cycles measured in Hertz)¹¹⁶ is, how close to the body the source is and for how long the exposure is.

Sources include: baby alarms, radios, televisions, computers, mobile phones (cell phones), wi-fi appliances, Blue-tooth, police radios and so forth. There are several generations of cell phones, each becoming a bigger source of radiation. Most current British mobiles work on a fourth generation network (4G) but the more powerful (and more dangerous) 5G is slowly becoming operational.

Firstenberg¹¹⁷ alleges that every major innovation using EMF radiation is met with a corresponding biological deterioration, including insect death, tree death, mass human sickness and human death. Such events include: the initial development of radio communications, the initiation of radar, the establishment of television broadcasting, mobile ‘phones and so on.

¹¹⁴ Thanks to Capt. JG Flynn.

¹¹⁵ Ionising radiation is even more harmful, including X-rays.

¹¹⁶ One Hertz is one cycle per second.

5G

Background

- Microwaves (EMF radiation) at certain frequencies are dangerous to all life forms.
- 5G uses microwave technology at dangerous frequencies.
- 5G is in the non-ionising electromagnetic spectrum, typically between 30 to over 60 GHz:

| Non-Ionising | | | Ionising | |
|--|---|--|--|-------------------------|
| Non-thermal radiation | | | Thermal radiation | |
| 50Hz-1MHz | 1MHz-1GHz | 1GHz-30GHz | 30GHz-3PHz | 300PHz-30EHZ |
| EMF sources ELF, VLF, LF, MF, ¹¹⁸ Radios, televisions | RF spectrum (radio) HF, VHF, ¹¹⁹ Radios, telecom masts, cell phones | Microwaves Microwave ovens, satellite dishes, cell phone masts, 5G cell phones | Infra-red to Ultraviolet The sun, 5G cell phones | X-ray, gamma ray |

| Non-thermal radiation | |
|--|--|
| All is dangerous for human health | |
| 50-60Hz electricity | Radio / microwave radiation |
| Flowing current emits electric and magnetic fields. | Wireless radio devices which produce pulsed, non-thermal Electromagnetic radiation. |
| Examples: overhead power lines, electrical substations, Smart Meters, household electricity, electrical appliances, electric vehicles. | Examples: cell phones, cordless phones, cell phone masts, Smart Meters, AM and FM radio, TV broadcast towers, CB radio, radar, microwave ovens, computers, baby monitors, Wi-Fi, motion detectors, TETRA networks etc. |

- Non-ionising radiation is very powerful; it is used in lasers to cut through steel.
- 400,000 5G masts have been erected all over Britain during the lockdowns without any debate or Parliamentary discussion. No one was consented on this. They are in almost every school and hospital. In a small shopping area in Shoreham by Sea you can find four 5G masts close together.

Health hazards

- The dangers of EMF radiation have long been known by governments. The first health effects caused by microwaves were identified in August 1932 showing symptoms/signs of severe fatigue, insomnia, headaches, and depressed immune system.¹²⁰
- Microwaves cause sterility in young girls by damaging the zygote.¹²¹
- Where 5G has been tested in Britain (such as Gateshead) it caused medical issues that included: Covid symptoms, headaches, migraines, tinnitus, nausea, nosebleeds, menstrual problems, dizziness, fainting, and sleeplessness. In Belgium one test killed every flying bird in the area. During the Cold War military scientists were familiar with

¹¹⁸ ELF: Extremely Low Frequency (3-30 Hz); SLF: Super low frequency (30-300 Hz); ULF: Ultra low frequency (300-3,000 Hz); VLF: Very Low Frequency (3-30 KHz); LF: Low Frequency (30-300 KHz); MF: Medium frequency (300-3,000 KH).

¹¹⁹ HF: High frequency (3-30 MH); VHF: Very High frequency (30-300 MHz).

¹²¹ The fusion of a male gamete (sex cell) with a female gamete forms a zygote, which subsequently develops into a new organism.

dead birds surrounding communication bases, which were cooked by microwaves. [Microwaves are preferred for communication due to their better penetration properties than radio waves and ability to carry more data]

- At lower power levels 5G frequencies vibrate the water in the body's cells causing them to heat up. This causes inflammation and disease. This is why the area around all 5G masts is dead; grass, leaves, tree bark, insects; all die. This can also be seen around Smart meters. Many people with Smart meters have developed associated illnesses.
- 60Ghz frequencies have an impact on oxygen in all living cells.¹²²
- 60GHz transmissions stop oxygen from binding to haemoglobin properly.¹²³ A severe lack of oxygen in the blood will cause a person to suddenly collapse.
- The UN and other Telecom regulators suggest that a maximum of six minutes exposure to EMF radiation, such as from mobile 'phones, is safe. This is written in the small print on mobile 'phone instructions. Virtually no one knows this or considers it. Young people spend hours on the 'phone every day. Yet the six minutes only regards heat; it does not respect other dangers such as radiation causing toxicity that crosses the blood-brain barrier causing gliomas.¹²⁴
- Mobile 'phones used at low battery capacity (two bars or below) have vastly increased radiation properties, up to 10,000 times more radiation.¹²⁵
- Microwaves can cause cataracts and raise the risk of cancer, research suggests.¹²⁶

A scientific examination by Dr Robert Young of blood samples from patients subjected to eight hours of workplace EMF showed the following:

- Cellular disorganisation of blood and clotting dysfunction.
- Negative changes in blood.
- Health challenges in the chest cavity.

Militarisation

- 5G is 1,000 times more powerful than 4G and was originally developed by the military as an energy weapon. It has the power to kill.
- Microwave technology has been tested by the military since the late 1950s and is used as weapon technology. 5G is potentially a microwave weapon. The military used microwave weapons in the past for crowd control and dissipating protests, such as on the Greenham Common women protests or in the Northern Ireland troubles. At high power levels, microwaves can kill people from a distance by heating them from the inside out (just like a microwave cooker). There have been cases where this has been tested. One example is a man dying in the Middle East where smoke erupted from all his orifices and he burned up from the inside. (I have seen the video of this.)

Recognition of danger

- Various countries have already banned mobile 'phones and Ipads from the classroom.¹²⁷

- Insurance companies do not insure for electromagnetic fields. Electromagnetic fields are considered as pollutants.
- Cell phone wireless companies have warned shareholders about future financial risks from electromagnetic radiation.¹²⁸

Eugenic issues

- Research has shown that the largest clusters of the most powerful 5G masts are occurring in areas of high Muslim population, high Black population and high level of very poor people. This is entirely in accordance with the published eugenicist beliefs of the Elite cabal.¹²⁹

Health problems identified in scientific papers

Regarding RF and EMF, only AM radio is safe to humans. All other wireless devices emit pulsed, non-thermal RF/EMF which is well-known to be more hazardous than non-pulsed EMF radiation.

Barrie Trower quotes a published scientific report that concludes that 5G will kill 2 billion people in the next few years.¹³⁰ Trower did his own analysis of the data and found that this figure was low; more than 2 billion will die according to this expert.¹³¹

Clare Edwards, a former UN employee, has brought up the dangers of 5G and Wi-Fi technology with the UN Secretary General at a broadcasted meeting. She gives an excellent summary of the problems caused to UN staff members by Wi-Fi being installed in offices. Many were made sick.

There are thousands of scientific papers concluding that microwaves, and 5G in particular, will cause medical harm and even death; Trower alone has 2,000 papers in his possession. Some of these scientists conclude that billions will die. Meanwhile, Telecom industries are working on 6G development. Researchers affirm that there have been over 12,500 published papers on the effects of EMF radiation since the 1930s.

The connection between 5G and Covid

In 2020 multiple people alleged that severe Covid symptoms were closely correlated to areas where 5G was rolled out. These included Wuhan, Belgium, Lombardy and New York; all Covid hotspots. 5G masts were also erected on most NHS hospitals, which were also centres of nosocomial Covid infection.

These people were widely denigrated and ridiculed but subsequent scientific papers began to emerge proving that 5G caused Covid symptoms (hypoxia, headaches, multi-organ hypercoagulation, fever, fatigue, and death).

Autopsies of claimed Covid corpses have discovered what was officially termed radiation poisoning.

Parallel etiologies¹³² can be drawn between SARS-Cov-2 infection and radiation injuries. ... Both conditions initiate a cytokine storm, with similar pro-inflammatory molecules increased.¹³³

¹³⁰ Capt. JG Flynn, books, Hidden Dangers. Hidden Dangers (5G).

¹³¹ Interview with Claire Edwards.

¹³² Eng. 'aetiology', the cause, set of causes, or manner of causation of a disease or condition.

¹³³ Radiation Research, Carmen I Rios et. al., 'Commonalties between Covid-19 and radiation injury', 1 January 2021.

Even the NIH¹³⁴ in America has formally admitted that there is a connection between 5G and Covid.¹³⁵

The virus that caused the Covid-19 pandemic, surfaced in Wuhan, China shortly after the implementation of city-wide (fifth generation [5G of wireless communications radiation [WCR]) and rapidly spread globally, initially demonstrating a statistical correlation to international communities with recently established 5G networks.

There is now no doubt that 5G causes Covid-like symptoms, but few are suggesting that the Covid crisis was just 5G phenomena. The point is that if the world panicked because of Covid, then why is it ignoring the effects of 5G, which are the same?

We should add that there are those who suggest that all Covid symptoms are caused by 5G and the ‘pandemic’ was a distraction to avoid the conclusion that 5G is extremely dangerous to humans. The virus (in this scenario) is actually exosomes being expressed by cells removing toxins caused by radiation.¹³⁶

Smart Meters

These were installed before the advent of 5G transmissions; however, they still have the power to do harm via EMF radiation. Again, plants in the vicinity of a Smart meter all die and grass goes yellow. People sleeping near the meter develop: insomnia, headaches, heart palpitations, breathing difficulties, nosebleeds, tinnitus and worse.

Facts

- Each Smart meter contains two transmitters.
- LAN transmitters emit pulsed non-thermal microwave radiation in all directions within a 3km radius. I.e. it affects everyone in a house.

- ZigBee transmitters control the various other Smart appliances in the home. Each of these has its own microwave radio circuit which emits pulsed non-thermal EMF radiation periodically.
- Switched mode power supplies convert 220v AC to low voltage DC which constantly causes spikes of EMF.
- When one considers the number of pulsed radiation emitters in a given community, which includes a ZigBee collector meter, the amount of radiation is staggering. A group of 500 homes in a 'meshed-grid community' will have 8,503 microwave radio circuits.
- The resultant radiation effects cause the significant harms noted in thousands of published papers.
- Two frequencies used by Smart meters (0.95GHz and 2.45GHz) were lethal to rats, killing them within minutes.
- A Smart meter's LAN frequency is more dangerous than a microwave oven.
- Whole-body radiation from a Smart meter equates to 45-450 times the radiation from a cell phone (depending on the distance away).¹³⁷ A Smart meter's peak power is 2.5 watts, which is ten times more powerful than a cell phone.

Devices

It is noteworthy that Bill Gates and Steve Jobs stopped their children using computers for more than four hours. They knew there was a problem. Even exposure to a mobile 'phone for two minutes causes brain damage to kids under five that takes 12 hours to repair. Imagine what hours every day does?

Studies have shown that repeated use of a mobile 'phone held close to the head causes gliomas (cancers) in the brain. One American woman kept her cellphone in her shirt pocket. She developed breast cancer and the tumour assumed the oblong shape of the 'phone.¹³⁸

People forced to work in front of a computer for hours everyday find that they develop headaches and nerve issues. This is due to the constant barrage of EMF radiation.

EMF radiation is dangerous.

Radar

I.e. 'radio detection and ranging'. This is a device for remotely determining the direction, range, or presence of objects using centimetric radio waves. It is used in air-traffic control, for navigation by ships, aircraft, and missiles. It provides a means of detecting objects over quite long distances or when visibility is poor.

The principle of radar was first discovered in 1904 by the Austrian Karl Hülsmeyer. In 1935 R. M. Page in the USA constructed a radar device that was used to determine the positions of aircraft. A comprehensive radar system, then called radio direction finding (RDF), was developed independently in the UK from 1935 by Watson-Watt and others. The invention in 1939 of the magnetron, a thermionic valve capable of producing pulsed radio waves of very high (microwave) frequencies, made radar a practical proposition, and it played a decisive role in World War II. From 1945 radar became commercially available. Radar measures the distance of an object from a radar transmitter by timing the interval between the transmission of a pulse of radio waves and the reception of the echo of the pulse from the object. The distance can be calculated from the time interval because the speed of the radio waves (the speed of light) is known. [Oxford World Encyclopaedia.]

Military observers and analysts found that scores of dead birds were found near the base of radar transmitters. They had literally been cooked. It was then understood that radar was dangerous to life forms.

In conjunction with the utilisation of radar, which is powerful pulses of radio waves, there was a host of medical issues appearing that appear to be associated; however, these were classified as a flu epidemic as a distraction. Many people claim that radar is the cause of much human suffering and death, especially in those close to transmitters.

See earlier section.

Satellites

There are now thousands of man-made satellites orbiting the Earth. Hundreds have recently gone up, such as Elon Musk's Starlink satellites.

Most of these are designed to irradiate the whole Earth with 5G, higher microwave frequencies using high-powered, phased-array antennas.

None of these have been tested for human or life-form safety by independent scientists with no agendas.

Cell phone towers / masts

This includes all radio frequency uses: police tetra masts, cell phone masts, 5G masts, television masts, amateur radio masts and so on.

Some people are living proof that masts affect humans. My mother was electro-sensitive, resulting from trigeminal neuralgia, and she suffered intense pain when walking past a local Tetra mast. As a result she always walked the long way round to avoid the local police telecom tower.

As long ago as 1956 it was known that television masts caused cancer. In Australia, when TV masts were introduced in 1956, researchers documented an increase of cancer in people who lived near the towers.¹³⁹ In the 70s studies from Germany, Austria, Israel and USA showed that proximity to a mast increased the risk of cancer.¹⁴⁰ In 1988 it was confirmed that San Francisco's Sutro Tower caused cancer. In 1995 President Bill Clinton forbade the erection of transmitter towers in schools. Perversely, the next year he signed legislation stopping states blocking them. Today almost every UK school has a 5G mast.

Even pre-5G telecomm masts caused serious medical issues to those nearby. Masts on top of tower blocks in London have caused cancer clusters in the upper floors. In one case this was proved in court and the mast had to be removed. Another example is that people living in five of the seven homes surrounding Forest House, Carnarvon Road, South Woodford, which has 16 masts on its roof, have contracted cancer. This has not stopped developers putting masts up in every school, hospital and public areas, sometimes camouflaged as other things.

A five-storey apartment building with 110 residents in Staple Hill, Bristol had seven cases of cancer, three of which resulted in death. Five of the victims lived on the top floor. In 2007, after a five-year legal battle, Orange removed its tower but Vodaphone refused.¹⁴¹

In 2007 in Spain a judge approved resident's requests for the removal of a tower on a block at Calle Ingeniero de la Torre Acosta, Malaga, after 30 cases of cancer developed.

Seven people in the Royal Melbourne Institute of Technology, Melbourne, Australia, developed brain tumours two floors underneath transmitting antennas. Around the world there are clusters of cancer in people living near cell phone towers.

2007 studies have shown high rates of cancer, brain haemorrhages and hypertension within 400 yards of a tower. One study in Warwickshire showed a cluster of 31 cancers on a single street. Another showed that a quarter of the 30 staff at a school near a mast developed tumours since 2000.

An Austrian study authored by Dr Gerd Oberfield showed a 23-fold increase in breast cancer and a 121-fold increase in brain tumours for those who lived within 200 meters of a cell tower for five years.

In 2008 three people died of brain tumours at San Diego State University; they worked underneath a cell tower. 43 cases of cancer appeared among 350 residents in Spain in 2009 who lived close to a relay antenna

A Tetra mast was erected in a UK village 210 feet (75m) from a school. One morning in 2004 it was switched on. Immediately 11 children in various classrooms developed nosebleeds and nausea; one child collapsed and was hospitalised.¹⁴²

In 2006 Greece prohibited cell phone towers within 500 meters of schools.¹⁴³ In 2007 Taiwan removed 1,700 cell towers over concerns about cancers. Also in 2007 Israel banned new cell phone towers from residences and balconies; existing towers must now seek regular approval.

All radio masts are dangerous. Multiple studies have proved that they cause many physical harms. These include:

- Genetic mutations.
- Memory loss.
- ADD.
- Insomnia.
- Brain disorders.
- Hormonal imbalances.
- Infertility.
- Dementia.
- Cardiac issues.

The Freiburger Appeal, signed by over 3,000 doctors, warned that radiation from cell phones and towers were causing serious health impacts including heart attacks and strokes.

A ten-year study concluded that the risk of cancer was elevated three times for those living in the 400-meter proximity of a tower.¹⁴⁴

The towers harm and kill birds. Studies have documented nest abandonment, plumage deterioration, locomotion problems, and death.¹⁴⁵ Observers have watched birds fall dead out of the sky or push their heads under water during testing of 5G masts. They were cooked from the inside.

The International Conference on Cell Tower Siting produced a report 'The Salzburg Resolution on Mobile Telecommunications Base Stations' preventing any mast from emanating any more than 1mW/m² which is 10,000 times more strict than the current US standards.

Energy weapons

Governments have been working on and testing microwave energy weapons for decades. In 1993 during the Waco incident¹⁴⁶ (which killed 73 men, women and children attacked by tanks and troops) the compound was also bombarded by 20 GHz microwave transmissions to inflict nerve damage. This included attacking children and babies! The establishment is not benevolent and cares nothing about you!

Some notable historic events:

- 1901: Marconi erected two radio stations on the Isle of Wight. By 1904 two more are added. Bees started dying off. By 1906 90% of the honeybees had vanished. Replacement swarms die within a week, apparently of some kind of extreme fatigue. In the coming years similar bee die-offs occurred wherever radio stations were erected.
- 1917: With the entry of the US into the war, there was a vast increase in radio communications. Again there was a great bee die-off.
- 1932: The effects of non-ionising electromagnetic radiation (EMR, including microwaves) is understood by the British military and is actively researched.
- 1939 onwards: the establishment of radar stations caused the death of flocks of birds in the vicinity.
- 1976: US Ambassador Walt Stoessel tells his Moscow staff that Soviet microwaves cause behavioural problems as well as leukaemia, cancer and cataracts.
- 1980: Scientists at Los Alamos National Labs claim that weapons exist that can operate on the power of the human mind and can kill.
- 1990: HAARP project begins.
- 1991: NATO is testing EMR non-lethal weapons systems.
- 1981-1990: American military uses EMR on the female protestors against the deployment of US cruise missiles at Greenham Common (the site of a US airbase near Newbury).
- 1992: Los Angeles riots occur simultaneously with mind control projects and frequency wave manipulations, using cell phone frequencies and transmissions from nearby ship aerials.
- 1993: 20 GHz microwave transmissions used to injure the occupants at the Waco religious compound.

¹⁴⁶ This was the US federal attack, a 51-day armed siege that included military assault vehicles, on a religious family community (the Branch Davidians) outside Waco, central Texas that was led by David Koresh. 72 men, women and children of the Branch Davidian religious sect were killed.

This technology is able to do the following:

- Disorientate people.
- Cause various medical symptoms including: nausea, headaches, dizziness, heart attacks, strokes, and general incapacity.
- At high power levels it can kill people by burning them up from the inside out.
- Induce earthquakes.
- Induce landslides.
- Create sinkholes.
- Create snow avalanches.
- Cause volcanoes to erupt.
- Control weather systems, such as direct and intensify hurricanes.

Delivery systems include:

- Helicopters.
- Aircraft.
- Satellites.
- Land-based vehicles.
- Land and sea-based arrays.

Now this all sounds like science fiction but multiple people have explained the facts about this: whistleblowers, researchers, scientists, and high-level clearance people opting out of the system.

There are some papers on this; for example:

- EJGE (Electronic Journal of Geotechnical Engineering), Faculty of engineering, Dept of Geotechnical Engineering, University of Ottawa, ON Canada, 'Super weapons (energy weapons) for inducing earthquakes, landslides, sinkhole, snow avalanche and erupting volcanoes', Vol. 23.03 (2018), pp. 649-660, Bund, 18.. Note:

Military and intelligence services use different type of energy weapons. Application of these energy weapons falls in wide range including, synthetic telepathy, modifying military personnel mode and behaviour in their or enemy troops. The behaviour change could be inducing fear and anxiety in enemy troops ... and can be used for triggering earthquakes, erupting volcanoes, triggering landslide, and sinkhole or snow avalanches. ... and finally collapse concrete building.

HAARP is used for weather modification like creating storms and hurricanes. Hurricane Katrina and severe storms in Florida and Texas were due to weather manipulation.

It seems that, for example, the manipulation of avalanches and earthquakes is due to affecting the resonance frequency of minerals like quartz and calcite by electromagnetic frequencies. Another factor is altering the Earth's magnetosphere. There are multiple claims, given with hard evidence, that the Elite have manipulated a number of 'natural disasters', such as the 2010 Haiti earthquake which caused 300,000 casualties. Dane Wigginton has given evidence that the recent hurricane 'Ian' was caused by geo-engineering (weather modification).¹⁴⁷ Dr Michio Kaku explained that the US is firing trillion watt lasers into the sky.¹⁴⁸ The CIA have admitted that various nations are using

weather modification as a weapon.¹⁴⁹ America used weather modification as far back as the Vietnam War in Operation Popeye.

In the US a key factor is the HAARP¹⁵⁰ facility in Alaska. This is a high-power, high-frequency transmitter originally utilised for investigation of the ionosphere. Also note the HAARP sea-based X-Band radar (SBX) system. There are allegations that this is being used in geo-engineering. DARPA¹⁵¹ is the covering government agency for controlling and developing such technology.

Basic facts on cell phones summarised

- When introduced, cell phones were never safety tested for humans.
- Cell phones are a clear and present danger to human health.
- The danger is greater to young children (with developing faculties) than adults. A child's head absorbs five times the radiation that an adult would absorb.
- Latency for cancer development from a cell phone can be up to 30 years.
- Brain cancers increased 50% in the ten years up to 2009.
- Using a cell phone inside a car increases the radiation exposure.
- Experts have declared that EMF radiation exposure needs to be decreased up to six million times.¹⁵²
- Telecomm manufacturers warn, in the terms & conditions, that cell phones must be kept away from the body (typically about an inch, 25mm). The (US) FCC stated that the safe distance should be 20cm (nearly 8 inches).
- Using a cell phone for 30 minutes a day increases your risk of brain tumours by 40%.¹⁵³
- The major insurance companies refuse to insure mobile phone manufacturers against lawsuits regarding health risks.
- Electromagnetic radiation from cell phones is similar to that of X-rays.
- Multiple studies have found that repeated cell phone use causes cancer.¹⁵⁴
- In 2012 the Italian Supreme Court ruled that there was a causal link between cell phone use and cancer.
- There are nine types of cancer linked to cell phone use.
- Studies by Dr Lennart Hardell found that RF-EMF emissions from wireless phones are Class 1 human carcinogens.
- Men who used a cell phone for less than 4 hours a day had a 40% reduced sperm count.
- In 2012 Russia warned pregnant women not to use cell phones.
- The level of EMF radiation from cell phones to affect the blood brain barrier is 1,000 times lower than the permitted level in cell phones.

- In 2012 it was stated that using a cell phone for as little as 2 minutes a day increases the risk of Alzheimer's, Multiple Sclerosis and Parkinson's.¹⁵⁵
- Since mobile phones entered common use in the UK around 1999 brain tumours have increased 50% and are increasing 1-2% every year in children. Between 1995-2015 GBM [glioblastoma multiforme] brain tumours doubled.¹⁵⁶
- Multiple countries have banned cell phones in schools.
- *Cover-up*: 75% of papers investigating EMF radiation effects by the wireless industry or the military show no genotoxicity. 80% of independent studies showed harmful effects. 61% of medical journals surveyed published fake studies for money.¹⁵⁷ [Cf. the tobacco scandal.]

The fight back

Under government direction, local councils have erected 5G tower masts all over the country hoping that people would not understand what was happening. But people are learning and are fighting back.

The Brighton and Hove case forms a precedent. Brighton and Hove Council erected 5G towers with no risk assessment for medical harms to local people. This means that they are illegal. In Brighton this was proved and some masts have been removed after local people complained.

If this were repeated all over the country all the masts would have to be removed. No doubt the government would enact some kind of martial law to try to prevent this, but this would also expose the malicious intent of government policies.

Lithium batteries: death from fire

The batteries in electric vehicles (which the world is being forced to adopt within ten years) can be lethal. Recently a cargo ship full of high-end cars caught fire and sank because the battery in an electric car exploded.

Then there is the EMF radiation that drivers are subjected to constantly which cause illness and cancer. When the EV is being charged the level of EMF radiation is astronomical. People who have checked a charging vehicle with an EMF meter found that it screamed and went off the scale. This level of EMF is certain to cause cancer.

EVs also have a tendency to burst into flame. In June 2022 a Tesla car burst into flames in Sacramento. It had been in a crash three weeks earlier. There was no external ignition source.¹⁵⁸

In September a lithium battery in a scooter killed an 8-year old girl in New York. In 2021 lithium battery fires killed three people and injured 57 in the US. In 2022 they killed 5 people and injured 73.

Also in September a Tesla battery facility in Moss Landing in Monterey County caught fire and emitted so much toxic smoke that the fire brigade issued a shelter-in-place order, telling people to stay inside and shut their Windows.

In September there were floods in America and in one case the water caused multiple electric car batteries to burst into flames. Firefighters could not control the flames because the battery charge continued to ignite the fire.

In 2013 it was battery fires that grounded the first Boeing 787 Dreamliners.

When a fire starts in an EV, the battery keeps igniting the fire making it hard to extinguish.

The above statistically makes EV batteries more dangerous than nuclear power stations. What will happen when there are only electric cars on the road (as planned by the UK government's Net Zero policy by 2030)?

Multiple illegal pre-emptive conflicts, coups and strikes: death from Western political interventions

When was the Western alliance last threatened by a foreign military power? Certainly not in 70 years. Even then the West was not threatened by Germany into WWII; Britain and France chose to attack Germany after the annexation of Poland (which Germany believed was justifiable after attacks on its borders and on German citizens). You could argue that Pearl Harbour was an attack on America but this was deliberately provoked by very harsh economic sanctions (war by a non-military method) and a refusal to negotiate. Japan believed it had no choice; it was deliberately provoked into war.

There has been no direct military provocation of the West, certainly since December 1941. Why then has the West, chiefly the US and NATO, engaged in continual acts of warfare against very many nations? We could list the following actual wars: Korea, Vietnam,

¹⁵⁸ Thanks to Michael Shellenberger, Substack post.

Cambodia, Laos, Iraq, Afghanistan, Grenada and the Gulf War. In Vietnam and Cambodia 100,000 civilians were killed. To this we could add military strikes on the following countries: Pakistan, Yemen, Somalia, Lebanon (via Israel), Libya, Yugoslavia, Syria (via Wahabi insurgents), Iran (via Israel) and Russia (via Ukraine). America also resourced and supported Chairman Mao's accession (and reneged on promised support of Chiang Kai-shek [the Chinese president, Jiang Jie Shi]) who went on to kill perhaps 50 million people.

All the US presidents, going back to at least Bill Clinton, have been dropping bombs and conducting air strikes on foreign nations completely illegally. Yet no one ever complains. Even anti-war President Trump dropped a bomb every six minutes. There was not a time when Barak Obama (Nobel Peace Prize recipient) didn't drop bombs every single day of his presidential terms. Obama's drones occasionally killed three generations of innocent civilians at once at wedding parties. When did he say sorry?

[In reality the Deep State needs constant war to continue its profits and sustain the US economy.]

All these conflicts have killed millions of innocent civilians. It is safe to say that America and NATO have been the biggest military killers in the last several decades.¹⁵⁹ In Iraq alone about a million and a half civilians were killed. Something like 200,000 Syrian civilians have been killed by NATO-backed rebels and insurgents in Syria. In Ukraine the conflict that has been extended by NATO in aggression against Russia has resulted in more than 300,000 unnecessary Ukrainian casualties.¹⁶⁰

The munitions used in these conflicts also raise concerns they include:

- Conventional bombs.
- Various types of missiles (e.g. Tomahawk, cruise missiles etc.). These could be launched by vehicles on land, from the sea or from the air. In densely populated areas they kill large numbers of civilians.
- Missiles deployed by Predator drones. Again with much 'collateral damage'.
- Rockets.
- Napalm. Liquid fire that destroys whole villages and all life in the surrounding area.
- Agent Orange. A defoliant that destroys plant life and kills people but also leads to appalling injuries and slow death, and causing deformities in newborn children.
- Cluster bombs. Indiscriminate killing munitions.
- Depleted Uranium shells. Supposedly to go through concrete walls and military steel. The use of these causes horrific radiation effects, especially in the fetuses of pregnant women causing horrible deformities.
- Mines (often left behind to kill children after the conflict).

To this we must add the numerous coups and fomented rebellions that killed millions. America has indulged in over a hundred foreign interventions of this sort as I have explained before. These state changes killed tens of thousands of people in the process (e.g. Indonesia, Central and South America). US meddling in Indonesia resulted in Suharto (the US placement in Indonesia) killing half a million civilians. Resourcing Iraq to wage war against Iran also resulted in many deaths, including though chemical weapons (gas) supplied by the West.

¹⁵⁹ There have been massacres, such as by the executions of Pol Pot or dictators in Africa, but these are not military operations and the scale of NATO deaths outweighs them.

¹⁶⁰ Putin sought for peace terms from March onwards but these were terminated by pressure from the West, such as by Boris Johnson. In Istanbul peace was nearly achieved but pressure from NATO stopped it.

All in all, the West has been killing innocent civilians in military excursions of various kinds that are completely illegal and unconscionable. It is responsible for the deaths of millions of people. Not only is this death ignored by everyone, America is lauded as Britain's special partner.¹⁶¹

World War 3: death from warfare

Analysis by Scott Ritter

The world is in a highly dangerous and potentiality terminal position right now. It is no exaggeration to say that NATO nations could face war with Russia and China (and possibly Iran). This is not just obvious to a sane commentator, it is the position of an expert like Scott Ritter.¹⁶² He is a former marine, a former UN weapons inspector, a geo-political commentator, a military analyst and sometime advisor to the US government, His commentary on the Ukraine conflict has been accurate from the beginning, often at odds with mainstream opinion. He says that the recent Putin speech mobilising 300,000 reservists is a game-changer.

He explains that NATO has constantly threatened Russia, has expanded to its borders, has armed Ukraine with weapons that have targeted Russian territory, and has issued a rhetoric to kill every Russian. Despite years of Russia trying to negotiate, and offering multiple opportunities for peace talks on Ukraine, NATO has continued the threats. Now Russia is taking the gloves off.

Russia had only committed 150,000 troops to Ukraine with only 60,000 of these being frontline battle soldiers. Despite being vastly outnumbered, Russia has occupied and held over 20% of the Ukraine, an area that comprises two thirds of its GDP. Pundits in the West claiming that Russia is losing are laughably deluded.¹⁶³ The recent offensive by Ukraine was a complete failure. It was allowed to gain ground as Russian troops withdrew to defensive positions who then pummelled Ukraine with artillery, which led to losing thousands of troops and resources (gaining some rural ground but losing so many trained troops and tanks is a disaster, as affirmed by Sun Tzu¹⁶⁴).

¹⁶¹ In comparison Russia is castigated as an evil, brutal, killing regime today when it has not instigated foreign conflicts like NATO. [Understand that modern 'Orthodox Christian' Russia is nothing like the pre-1990 secular Marxist USSR.]

¹⁶² See Redacted, Clayton Morris interview with Scott Ritter, 22 September 2022.

¹⁶³ Col Douglas Macgregor, 'Can Russia lose. Absolutely not!'

NATO's goal in Ukraine

Primarily is to bleed Russia out; to so weaken it militarily that it a) becomes an easier target to destroy; b) demoralise the citizens so that they overthrow Putin; c) eradicate an economic and global threat from a nation not submitted to Elite globalist systems.

Part of this operation is a plan to create a federal state involving Ukraine, Poland, and the Baltic nations potentially named 'Anti-Russia'. It wants an anti-Russian buffer zone between Europe and Russia, from which NATO operations could be centred openly.

Eventually the plan is to Balkanise the whole of Russia into easily dominated fragmented states, and then plunder Russian resources,¹⁶⁵ as the Elite did under Yeltsin and Gorbachev. The rise of Putin terminated this looting, which is why NATO hates him so much.¹⁶⁶

NATO's activity in conducting this proxy war

- Using US AWACS¹⁶⁷ to give Ukraine forces high-level reconnaissance intelligence flying over the Black Sea.
- Using Elon Musk's satellite systems to enable communication.
- Giving professional Western military intelligence.
- Sending vast sums of money.
- Sending vast amounts of arms, tanks, missiles and other munitions (to the point of weakening its own defences).
- Enabling the use of nuclear, biological and chemical weapons (see later).
- Sending in former NATO troops acting as mercenaries fighting for Ukraine.
- Sending NATO Special Forces, such as the SAS, to perform high-level military and terrorist attacks (such as the Crimean bridge terrorist explosion).
- Issuing propaganda to kill every Russian.
- Dominating Western media to be anti-Russian and pro an evil, undemocratic, criminal, corrupt Ukrainian government.

Russia stepping up the offensive

With shelling of the nuclear power plant, assassination of Darya Dugina, constant shelling of civilians in the Donetsk (including targeting emergency response vehicles after an initial strike), the terrorist bombing of the Kerch bridge, and strikes on Russian homeland, Putin is now ramping up the response. Heretofore, Russia has held back in military strength because it considers Ukrainians to be brothers so it sought to minimise civilian casualties (unlike Ukraine, which concentrated on such). This contrasts with NATO wars where it Blitzkrieged civilian areas to pieces, killed tens of thousands indiscriminately, and used massive warplane formations.¹⁶⁸ Russia had only used Sukhoi fighter/bombers sparingly so far. Putin has also held back hawkish generals and is a moderate compared to some of Russia's foremost political leaders (e.g. Medvedev). After the NATO inspired terrorist attack¹⁶⁹ on the Crimean bridge, shock and awe tactics targeting critical infrastructure (not

¹⁶⁵ Notice former cases: Iraq – filled with US military bases as a cover for stealing Iraqi oil and Syria, US military bases in the north where they steal Syrian oil and smuggle it out. [This week unidentified UAVs (drones) fired missiles into one US army base. The US response was to bomb farmer's fields in the area.]

¹⁶⁶ Also because he is Christianising Russia (the West is dominated by Satanists) and is efficient in controlling the economy (backed by gold), partnering with China and India, establishing new economic links (e.g. BRICS), developing energy pipelines selling oil/gas cheaper than the US etc.

¹⁶⁷ Airborne Warning and Control System.

¹⁶⁸ Iraq is the prime example. The Iraq War and aftermath killed over a million civilians.

¹⁶⁹ Carried out by SAS / Ukrainian special forces but planned and resourced by MI6. This was obvious but is now supported by a leaked presentation reported by Kit Klarenberg of the GrayZone, 'Exposed: before

civilians) ensued. 30%-65% (sources differ) of Ukraine (over 1,000 towns and cities) is now without power. The mobilised troops will begin a major offensive with air and artillery support within weeks. A far greater Russian military offensive than seen so far is about to be unleashed.

The Donbass is now Russian territory

The Donbass referendums were critical. These have now ceded the DPR and LPR, Kherson and Zaporozhye to Russia, so the Donbass became Russian territory; further shelling and airstrikes become an attack against Russian soil. Russia can then declare war against NATO and this could escalate into nuclear war; especially after Zelensky's insane speech demanding that NATO initiate first-strike, pre-emptive nuclear attacks on Russia.¹⁷⁰ Russia condemned this, affirming that Zelensky was trying to start WWII.¹⁷¹ Russia denied any intention of using first-strike nuclear weapons. However, if nuclear warheads were used by the West, subsequent Russian tactical nuclear strikes against NATO nations supplying the Ukraine with troops and munitions would be strategically logical. This could literally mean a nuclear missile hitting Britain, Germany or the US. The current threat of nuclear war is far greater than the Cuban missile crisis (after I wrote this President Biden stated the same). This is so insane that mutually assured destruction suggests that it is unlikely. But all-out war between the West and Russia is not.

Despite this NATO has just¹⁷² launched missiles into Russian borderland areas. Ukraine terrorists launched attacks into Belarus. Ukraine also struck civilian areas in Donetsk again with HIMAR missiles. Putin was forced to issue a warning against NATO sending troops to directly attack Russia (NATO already sends troops disguised as mercenaries to give plausible deniability). In response Russia struck Kiev with large Iranian¹⁷³ kamikaze drones. Ukraine no longer has much viable missile defence systems and troops shoot at drones with AK47s. Drones are also more difficult to shoot down due to their small size. In desperation (since the US and UK have no decent anti-missile systems left to offer) Zelensky pleaded with Israel for anti-aircraft / missile systems (i.e. US made), which will not help.

Nuclear false flags used by Ukraine / NATO

Then there is the possibility of a false flag. There are claims that there is already a nuclear device in Mykolaiv in Ukraine ready to be unleashed followed by the claim that Russia did it – in order to start WWII.¹⁷⁴ Russian television has voiced such concerns. NATO

Ukraine blew up Kerch bridge, British spies plotted it', 19 October 2022.. The project manager was Chris Donnelly, senior British Army intelligence officer and NATO advisor. The roadmap was produced by Hugh Ward, military veteran.

¹⁷⁰ The later claim, after widespread alarm and derision, that Zelensky miss-spoke is ridiculous. Zelensky (now hiding in a bunker in the west of Ukraine) is now desperate. He is calling up children and old-aged pensioners to the army. Military personnel and resources have been decimated. The recent offensives were a disaster – gaining ground (deliberately allowed) for the loss of battalions of men and equipment. Ukraine is now desperate for tanks, which cannot be supplied by the west any longer. All that Europe could come up with was 28 refurbished museum pieces from WWII. The US and UK military are stripped to the bone and cannot re-supply Ukraine without further compromising national security. This is why terrorist actions are Zelensky's last hope. Yet Russia has not even got into second gear yet. After that there is only tactical nuclear weapons to threaten Russia.

¹⁷¹ Russian Foreign Ministry spokesman Maria Zakharova. Putin's spokesman Dimiry Peskov also warned the US and UK over Zelensky's nuclear demands.

¹⁷² In the days before 17 October.

¹⁷³ Peskov says they are not Iranian but on the ground witnesses of fragments say they are. It is currently politically expedient for Russia to deny the Iranian source. Other sources state that the bulk of drones are Chinese.

¹⁷⁴ Bitchute.com/video/KvGPf8ojQWQu

officially announced that a Russian nuclear strike would undoubtedly cause a ‘physical response’ from Ukraine’s allies.¹⁷⁵

Then there were credible reports that dirty nuclear devices had already been discovered in Ukraine (supplied by NATO) and destroyed.¹⁷⁶ A tactical nuke was intercepted by Russian forces in late February. It was situated in a large aircraft named Mria¹⁷⁷ (lit. ‘dream’) at Gastormel airport. The bomb was ready to fire an attack on Rostov-on Don to precipitate the Ukraine advance on the Donbass This was one reason why the Russians started the conflict in February before this could take place.¹⁷⁸

The nuclear power station at Energodar, Zaporozhia, was also involved in the production of dirty bomb material and development. These would have been used as a false flag to give cover for NATO to use nuclear weapons against Russia because the West cannot successfully wage a normal war against Russia.

Then there were reports that Russian soldiers had been injured by nuclear material with radiation sickness at Gorlovka (50k from Donetsk). Bentley claims that Ukraine is already firing limited nuclear weapons and using biological weapons against Russian troops.

Because Russia is winning this conflict, even though it is holding back from full onslaught (minimum troops, use of old tanks,¹⁷⁹ minimal air strikes etc.) it has no need to use nuclear weapons. Only the West and Ukraine need to use nuclear devices.

Russian warnings about nuclear strikes

Russia keeps warning that global destruction will follow nuclear strikes.

Kyiv is well aware that such a step (joining NATO) would mean a guaranteed escalation to a world war III.

Russian officials have never voiced a threat to use any weapons of mass destruction. Meanwhile in Europe some politicians openly call for such actions, even a number of politicians in the EU do not conceal and do not rule out the possibility of using weapons of mass destruction against Russia.

A nuclear conflict will affect absolutely the whole world - not just Russia and the collective West.

Alexander Venediktov, Deputy Secretary of Russia’s Security Council.

The Belarus president also issued warnings.

Russia is being pushed towards a third world war. We should be very reserved and steer clear of it because nuclear war is the end of everything.

President Alexander Lukashenko.

NATO is now militarily weak

NATO has no capacity to wage open war against Russia and its arms capacity has been severely weakened by years of supplying Syrian rebels and Ukraine.¹⁸⁰ Supply chain problems mean that manufacturing new munitions are restricted and could take months.

¹⁷⁸ Telegram, Russell Bentley, ‘Letter from a soldier’ (a Russian Spetsnaz officer [elite forces]).

¹⁷⁹ T-62, T-70, T-80. The T-90 ‘Breakthrough’ has only recently been observed in the Donbass. Losing old tanks actually serves a purpose since they are hard to dispose of. Russia is defeating Ukraine with old equipment. The top-level stuff is being held in reserve.

¹⁸⁰ The Telegraph, Howard Mustoe, ‘Britain runs low on ammo as Ukraine bombards Kremlin forces – arms industry yet to ramp up production despite Ukraine need for weapons’, 24 September 2022.

European and US arms supplies are dwindling.¹⁸¹ Britain's armed forces have been severely cut back and money wasted on diversity projects. Its new carrier (that has no warplanes) couldn't even get past the Isle of Wight before it broke down. The US is similarly depleted and its troops decimated by vaccine refusal discharges. If it wanted to, Russia could steamroller over the Ukraine and march to Berlin. This is another reason why the West may use nuclear weapons because it could not successfully wage a normal war against a superior force. The US only attacks militarily weaker nations like Iraq, Afghanistan, Syria, Libya, Grenada etc. But there is another issue.

China's involvement

Chinese resources have been observed in Ukraine; you can find photos of them. Trucks and other vehicles carrying the Chinese flag have been seen delivering resources to Russian held areas. This means that China is now committed in actuality, as well as rhetoric, to allying with Russia in this conflict. China also has drone swarm systems where one truck can emit drones that can sink an aircraft carrier. It is also possible that the micro-cruise missiles¹⁸² Russia is now using were made in China. If a NATO missile destroyed Chinese contractors and equipment, this could mean war with China. In any event, Liz Truss has already threatened war with both Russia and China in an act of supreme stupidity.

Some commentators have said that China may already be co-operating with Russia to jointly attack the West in a two-front war.¹⁸³ Biden foolishly declared economic war against China (which holds much of America's debt) by ruining its semiconductor industry overnight. Biden demanded all US citizens in China in the semiconductor industry to leave immediately or lose citizenship. He also threatened sanction against nations supplying China with semiconductors. So the heads and main executives of China's semiconductor industries all left. This left China in an invidious position with no microchips.¹⁸⁴ One of the main world suppliers of microchips is Taiwan. What do you think China is going to do next? The US is deliberately provoking war with China.

Belarus involvement

Added to this is the news that Belarus is gearing up in order to help the new Russian offensive. Ten thousand military advisors from Russia have already set up a headquarters in Belarus to prepare for military action. 70,000 Belarussian troops are ready to fight. Russia is sending tanks, personnel and Mig-31 warplanes to Belarus. This seems set to open up a new front against Ukraine. Belarussian Sukhoi Su-25s (multi-task fighters) are also being equipped to carry nuclear weapons.¹⁸⁵ Russia is transferring Iskander-M missile systems to Belarus for these planes.

Alliance with Turkey

To this must be added the recent concord between Putin and Erdogan cementing an alliance based upon the supply of Russian gas through the Turkstream pipeline. This means that Turkey is now allying with the east rather than the west (having had stormy relations with the US). Saudi Arabia also recently ignored Biden and allied with Russian interests in restricting oil/gas supplies to keep profits high. It is rumoured to be close to joining BRICS.

¹⁸¹ Natural News, 'US military degrading rapidly under Biden, Dem-controlled Congress ... now rated weak even as global threats are rising', 20 October 2022.

¹⁸⁴ Remember the economic blockage against Japan forcing them into WWII?

¹⁸⁵ WarNews24/7.

So now we have the following alliances: Russia, Belarus, China, Turkey, Syria and Iran in opposition to USA, UK, the EU and Ukraine. This is virtually the East versus the West. These are dangerous times. China, Egypt, India, Uzbekistan, Turkmenistan, Kazakhstan Tajikstan and Serbia have ordered all their citizens to evacuate Ukraine. Something big is coming down the wire.

To make matters worse, NATO is holding nuclear war-games in Europe from 17 October to 30 October involving US B-52 nuclear capable bombers. I am sure that the bombs will be blanks :).

The autumn offensive

Putin is no longer holding back. Threats and actions against its territory will meet with a severe response from this point. Most likely this will be continued drone / missile / artillery strikes until a ground offensive in mid-November when the ground is harder (rain has currently made the ground soft). The 300,000 mobilisation is already complete two weeks early.¹⁸⁶ Russian leaders and the Russian people fully support this escalation; they want the war won and finished. Putin's ratings are still very high. This will mean much greater use of warplanes and greater numbers of battle hardened troops (most are elite forces from Syria) on the frontline. This is no longer a skirmish but full war. Britain gets involved at its peril. NATO must now back off and give up. It cannot win against Russia unleashed. If it does not there could be a conflagration in Europe worse than WWII. Remember that Russia has ICBMs¹⁸⁷ that, singly, can destroy all of Britain in one strike. Only a fool provokes a bear.

The upshot of all this is that the threat of a world war based in Eastern Europe is now very real and this could lead to huge numbers of fatalities.

If China takes back control of its rogue state Taiwan¹⁸⁸ and America intervenes (as it stated it would) this would add a second front in WWII in the South China Sea (also involving US military bases in Australia), which America would also lose against superior Chinese forces (their drones alone can obliterate the US fleet without any battles). If America lost this conflict, a Chinese attack on western USA is not inconceivable and some military analysts are suggesting such. Thus the whole world could be at war.

Conclusion

If you add all these various means of killing people together you can envisage a decrease in the global population by at least 4 billion – which is what the global Elite desire. In fact some members of this Elite have called the current period ‘*The Great Cull*’.¹⁸⁹ This means that more than one in two people will be dead in the next months or a few years.

The Elite have openly mentioned the Great Reset and the need ‘*build back better*’. What this means (a new type of Socialist society run by technocracy) is that the existing capitalist democratic society has to be destroyed.

The historical mission of our world revolution is to rearrange a new culture of humanity to replace the previous social system. This conversion and reorganisation of global society requires two essential steps: firstly, the destruction of the old established order, secondly, design and imposition of the new order. The first stage requires elimination of all frontier borders, nationhood and culture, public policy, ethical barriers, and social definitions only then can the destroyed old systems be replaced by the imposed system elements of our new order. The first task of our world revolution is destruction.

Nahum Goldman, founder of the World Jewish Congress, *The Spirit of Militarism*, 1915.

This is what is actively going on now; all aspects of society are being dismantled and the Christian roots of society obliterated. Small and medium-sized businesses are collapsing; nation states are being mongrelised by multiculturalism; governments are adopting totalitarian measures, free speech and free movement are being suppressed and culture is being destroyed or perverted. If you cannot see that culture is being wrecked before your eyes then you are asleep. Everyone is saying that the world has gone mad. What they refer to is the eradication of aspects of society that they relied on or were nostalgic about.

Since the UN plan¹⁹⁰ is Smart mega cities where all the plebs will be crowded together in tiny flats and rural areas forbidden to urban dwellers, the effects of social destruction are being seen most sharply in rural villages and towns. Life here is being ruined unless you are rich. This is why the young generations of teenagers are leaving rural areas in droves and moving to large cities where they may get a job. In rural areas we have seen the eradication of pubs, churches, social centres, Post Offices and bus routes – all making life impossible for those without money and cars. Even Broadband is unreliable in these areas but they don’t get deliveries either being too distant from centres of distribution. This is to force people out for the Great Reset.

As well as reshaping society, the Elite plan is the elimination of 7 billion people. This has been going on slowly for years but is now going into hyperdrive in ‘*the great cull*’. The genius of the Elite is to do this while convincing the mass of the people that nothing is happening. Only those who are discerning and awake can see this operation; the mass of the population is deluded. Those that lack wisdom to see the truth will become victims of one or another Elite strategy. Some people I advised to not take the Covid vaccine because

¹⁸⁹ Interview with Catherine Austin Fitts averring to a conversation she had; she does not mention the name of the Elite person involved.

¹⁹⁰ Agenda 2030.

it could kill them, did so under peer pressure and are now dead. They could not believe that the establishment (medical/governmental) was not benevolent. You have to understand that the plan of the Elite is to hurt and kill you. If you are a Right-wing, traditional, Christian, small-state, common-sense policies citizen, those in power hate you. If you are a Woke, liberal, progressive Guardian-reading Leftist, understand that the Elite hates you too, even though you are currently a useful pawn in their game.

The establishment is not benign; it is corrupt and evil. Every aspect of people in power (government, heads of corporations, bankers, financiers etc.) is growing in wickedness. Deaths caused by lockdowns, facemasks and Covid vaccines are but the start. Their other plans will result in even more deaths. 5G alone has the capacity to kill 2 billion people in the next few years, mostly from brain damage (the largest cause of death). Experts are saying that the vaccines will eventually kill 2 billion as well; the figure is already in the millions.

You must understand what is going on and prepare to save your family.

- Stock up on food and survival rations.
- Make preparations for water storage.
- If possible, get a power generator (solar or diesel).
- If possible, get a wood burner.
- Keep a good supply of cash. Remove at least some of your money from the banks, which are considering bail-ins right now.
- Invest in hard gold and silver (not certificates).
- Gather necessary infrastructure items: wind-up lamps and torches, batteries, camping gas cookers, candles, blankets, water filters, rechargeable battery packs for computers and devices, warm clothes, hot water bottles, etc.

Above all be discerning and grow in wisdom. Grow in the truth of God and pursue knowledge. Sadly, most churchgoers are lacking in truth and wisdom.
