

# The imposition of institutional stupidity

## Introduction

There are multiple examples of institutional stupidity all around us; this is indisputable. Most of the older, sane population continually bemoans the fact that the world has gone mad – because it has. These irrational impositions are completely opposed to enlightened science but are applied by leaders claiming to follow the science.

When genuine experts criticise these crazy policies, establishment leaders close them down by censoring their statements, deplatforming their speeches and debates, issuing smear campaigns, or even firing them from their jobs. This shows that there is a concerted plan, at high levels, to foist irrational policies on society (according to longstanding Cultural Marxist programmes). This is not accidental or the result of political incompetence.

## Why?

This is part of the programme to change the world in the spiritual warfare between Satan and God. The global Elite are the Satanist servants in this warfare, controlling the world as proxies of the Devil. The strategy in this warfare is to reverse every aspect of God in the world, to reverse all the Christian principles in society, and implement the character of Satan in every aspect of culture.

One aspect in this reversal is to degrade the level of intellectual cognisance in society. This is why all institutions (not just education) have been dumbed-down in recent decades.

An important aspect of the rule of God in humans is intellectual development and a capacity for wisdom.

For God has not given us a spirit of fear, but of power and of love and of a sound mind. 2 Tim 1:7

The fear of the LORD is to hate evil; pride and arrogance and the evil way and the perverse mouth I hate. Counsel is mine, and sound wisdom; I am understanding, I have strength. Prov 8:13-14

He stores up sound wisdom for the upright. Prov 2:7

And do not be conformed to this world, but be transformed by the renewing of your mind, that you may prove what *is* that good and acceptable and perfect will of God. Rm 12:2

You have put off the old man with his deeds, and have put on the new *man* who is renewed in knowledge according to the image of Him who created him. Col 3:9-10

Walking by faith does not counteract the importance of intellectual development in the Christian life. Regeneration leads to the enhancement of all critical faculties as well as spiritual intuition. I once knew a completely illiterate man who was soundly converted. He immediately taught himself to read the Bible and vastly improved his intellectual capabilities. This is a part of normal repentance. True Christianity makes a person more, not less, rational. It is vital that believers grow in wisdom.

You will make me to know wisdom. Ps 51:6

The entrance of Your words gives light; It gives understanding to the simple. Ps 119:130

For the LORD gives wisdom; from His mouth *come* knowledge and understanding. Prov 2:6

For *God* gives wisdom and knowledge and joy to a man who *is* good in His sight. Eccles 2:26

Because God teaches his children wisdom and knowledge, how to apply rational common sense and build communities that thrive on logical, wise decisions, the Devil seeks to ruin the intellectual capacity of humans and have a dumbed-down race of slaves that he can rule over.

One of the satanic strategies to develop a totalitarian state utilised by the Elite is Cultural Marxism. I have explained many times that these Marxists have strived for 100 years or more to infiltrate all societal institutions to pervert them from within. This is why all British institutions are now corrupt. But another aspect of Cultural Marxism was to make society stupid and to make it '*stink*'. Thus it corrupted all aspects of culture to uglify and de-intellectualise society to create disenchantment and disorientation. Marxist corruption over decades has downgraded education, dumbed-down social discourse and the media and made stupidity reign.

## Examples

We can see this global policy of dumbing-down populations through the imposition of stupidity, which gradually becomes tolerated and then accepted as the norm by acquiescent people.

### Miscellaneous stupidity

#### *Climate nonsense*

- Demanding that cows wear facemasks.
- Giving drugs to cows to stop flatulence and save the planet.
- Killing cattle out of fear that bovine flatulence will destroy the planet.
- Demanding that everyone buy electric cars in the next ten years when they routinely explode, kill people, and burn down the immediate environment (which has included entire cargo ships or garages filled with buses). This is apart from the inordinate cost, the lack of sufficient rare-earth minerals to build all the required batteries and the lack of electricity in the national grid to charge them all.
- Trusting national energy policy to Green sustainable alternatives that do not work, are environmentally unfriendly and are inordinately expensive.
- Demanding that even poor people remove their gas boiler and replace it with a hydrogen replacement.
- Alternatively, demanding that people install useless heat pumps that cost a fortune (up to £30k) and are not efficient.
- Making it state policy to eradicate 90% of your national farms.
- Claiming that CO<sub>2</sub> is dangerous and must be eradicated when it is the source of life for the planet. Humans are made from carbon. Plants require CO<sub>2</sub> to exist.
- Claiming that nitrogen is dangerous and must not be used by farmers when it comprises most of the atmosphere.
- Claiming that removing a road's car lane to establish a cycle lane is Green, when it causes long tailbacks and increases pollution massively from idling exhausts.
- Claiming that walrus jumped off cliffs because of climate change when they were being chased by polar bears.
- Using bio-fuels (fuel made from grains) when there is a food crisis.

- Using biomass pellets from pulped ancient Virginian trees while claiming that this is Green.

#### *Covid nonsense*

- Imposing facemask regulations on people in order to stop a virus that goes straight through them.
- Imposing social distancing rules of two metres to stop a virus that can travel miles.
- Police drying lakes at beauty spots black to put off tourists during Covid.
- Coercing acceptance of a vaccine that does not work, makes Covid infection more likely and increases the risk of hospitalisation and death. It is neither safe nor effective.
- Indemnifying vaccine manufacturers from liability for vaccines that injure and kill people when the trials demonstrated the dangers.
- Claiming that natural immunity is ineffective against Covid.

#### *Transgender nonsense*

- Passing laws identifying trifling anti-LGBTQ Tweet comments as hate crimes requiring police arrest and prosecution.
- Making it illegal to use the wrong pronouns for people.
- Claiming that there are scores of valid pronouns (the police college claims 40 or so; others 70 plus).
- Politicians that cannot define what a woman is (e.g. Keir Starmer).
- Teaching children under 10-years old that they can self-identify as a different sex.
- Women that identify as snakes or reptiles.
- Men identifying as babies.
- An American man has identified as a garden fence.
- Another has married a car.
- A man with a black beard in a dress winning the Eurovision Song Contest.
- A man in a dress claiming to be a woman masturbating in a women-only changing room.
- Men pretending to be women violently attacking real women (e.g. Kellie-Jay Keen) speaking out for women's rights.
- 40% of Scottish prisoners identifying as women to get into softer prisons. Under Scottish laws the state must accept this.
- Council documents (e.g. Cornwall Council), united with police forces, promoting a pro-active Trans agenda for children (e.g. affirming that all young children must be able to identify at least five genders).

#### *Sex education nonsense*

- Graphic sexual education (using images) of children in school as young as four.
- Explaining sexual perversions (e.g. anal sex) to children under 10-years old.
- Saying that sexual intimacy between friends is OK in five-year olds.
- Explaining that homosexuality is normal in children.
- Utilising drag queens as young children's sex-educators in schools.
- Drag Queen summer camps for kids in California.
- UK teacher's unions advocating Drag Queen input into schools for infants.

#### *Food nonsense*

- Claiming that eggs are dangerous and cause disease.
- Claiming that eating meat damages the planet.

- Proposing that people become cannibals eating 'human meat' (US firms are already making meat out of corpses).
- Producing fake synthetic eggs (in China).
- Demanding that people stop eating meat and start eating insects or synthetic meat.
- Making flour for human consumption out of pulverised crickets.

#### *Science nonsense*

- Genetically modifying insects with no idea of the consequences.
- Genetically modifying crops with no idea of the consequences (e.g. killing insects).
- Producing computer simulations to advocate climate catastrophe, which go against scientific real-life observations (e.g. Antarctic ice collapse when the ice is expanding).

#### *SMART cities nonsense*

- Forbidding car drivers from travelling from one part of a city to another by the direct route on penalty of a fine.
- Actually stopping cars travelling down certain Oxford streets with concrete barriers and ruffians acting as council enforcement officers (this must be illegal).
- Claiming that 15-minute cities reduce congestion and improve public transport when they worsen congestion. The councils know this.
- Councils planting 'liquid trees' (algae) instead of real trees to promote oxygenation of streets. [Real trees cause a problem for 5G transmission, hence chopping them down in streets.]

#### *Media nonsense*

- Filling the news media with lies and deception and pretending that it is true. For example, virtually everything stated about the Ukraine conflict is a lie.
- All the media in the West speaking the same message down to even using the same stock phrases (e.g. 'Build back better', 'Flatten the curve') according to a script.
- Spouting government propaganda and fearmongering on payment of government funding.
- The government's use of 77<sup>th</sup> Brigade to spread fear in the domestic population when these psychological techniques were designed for foreign enemies.
- The BBC using 'fact-checkers' that deny scientific facts and the opinion of top experts in their field.

#### *Woke nonsense*

- The NHS paying £55k p.a. for diversity managers in the most diverse organisation on Earth.
- The NHS employing 'Life Experience' directors when it can't afford to increase nurses' salaries to a basic living standard.
- The government putting forward a bill making it possible for employees to sue their managers if they are offended by customers (e.g. bar staff in a pub; stewards in a football game; air hostesses on a plane).

#### *Banking nonsense*

- Printing currency to stave off economic and banking crises.
- Printing money to fight inflation when inflation is created by printing money (increasing the currency supply).
- Bailing out corrupt banks. [Using taxpayers' money to support failing banks.]
- Bailing in corrupt banks. [Stealing depositor's money, claiming that they are creditors, to support failing banks.]

### *Ukraine nonsense*

- Western nations sending billions to Ukraine (USA \$100 billion so far) when their own infrastructure is collapsing and millions of their own population are in poverty.
- Not auditing billions sent to Ukraine where much is being stolen by corrupt politicians who have offshore bank accounts in Cyprus and buy property in Miami.
- Not preventing more than a third of the weapons sent to Ukraine being sold on the black market or even to Russia.
- Sending men and weapons into the Russian cauldrons to be immediately obliterated by artillery and missile fire. [Russia avoids close-contact fighting wherever possible to safeguard its troops but encircles Ukraine positions and blasts them with shells and missiles killing thousands of Ukraine troops every day. Bakhmut is but one example. Only after the enemy is worn down is street to street fighting deployed.]
- Sanctioning Russia, which strengthened Russia's GDP through diversifying exports, but critically damaging European economies bringing Germany to near collapse, closing industries.
- Propagating a proxy war between NATO and Russia that could lead to WWII.

The stupidity of these actions is beyond belief.

### **Wind farms**

The policy of trusting energy supply to wind turbines is extremely foolish for these reasons:

- They have to operate in a very narrow wind-speed corridor. If the wind speed doubles the power of the turbines increases eight times and they must be shut down or they collapse. If the wind isn't strong enough they don't function at all.
- They require constant expensive maintenance or they completely break down. Even this has not stopped many turbines collapsing, breaking in half or exploding in flames. This cost is not included in the claimed cost of wind farms.
- To provide the necessary battery back-ups to serve when turbines cannot function has a cost equal to the national GDP. There is not enough lithium and cobalt in the world to provide batteries for every country. Mining for these minerals involves child slave labour in Africa.
- 5.5 million turbines are required to equate to one nuclear power station.
- The cost is prohibitive were it not for government subsidies. The capital investment is not worth it; in the real world no one would have invested in turbines.
- Onshore wind farms kill millions of bats, insects and birds. Offshore wind farms kill and injure cetaceans.<sup>1</sup>

There is no logical case whatsoever for wind farms to provide national energy supply. Why, therefore, is most of the world clamouring for wind farms and closing down alternative traditional power sources? This policy will guarantee a collapse of prosperity due to energy famines; which is stupid.

### **Transgenderism**

On the claimed basis of promoting tolerance and kindness towards a sensitive minority, the establishment has promoted Transgenderism as a special status that gets legal protection and special privileges. This leads to the nonsense that biological males are given legal status as a woman. This further leads to biological Transgender males being allowed female privileges: to enter female-only changing rooms and toilets; to enter female sports

---

<sup>1</sup> Whales, dolphins, porpoises. The maiming of cetaceans results from the noise and vibrations underwater caused by the mechanism which damages the highly sensitive sonar and hearing of cetaceans.

events; to be imprisoned in female jails and so on. This then has already led to Transgender males raping female prisoners, abusing ladies in changing rooms, spying on female children in changing rooms, winning female sports trophies etc.

The entire Transgender narrative is stupid. Individuals cannot change their DNA or remove a Y-chromosome. No amount of topical changes (surgery) or drugs (hormones) can transform the DNA. Biological sex is permanent. People with gender-dysphoria require psychological help. [Many people have dysphoria, not just Transgenders.]

To institute laws based on the claim that a man can be a woman is stupid.

Furthermore, this promotion of supposed tolerance has created massive hatred and violent outbursts. Transgender activists everywhere have expressed extreme vehemence against women demonstrating for women's natural rights. In one case, diminutive Feminist Kellie-Jay Keen (Posey Parker) was surrounded by a 1,000-strong violent mob in Auckland, NZ, and hit with wooden placards, had tomato soup and water thrown over her, and her life was only saved by her private security detail which cost her £10,000. One 70-year old lady was punched in the face twice by big men. All this was enacted to protect Transgender people from hearing opposing views on the law.

### **Farming**

All over the world farming is being actively discouraged and impinged on by regulations. The Netherlands is trying to close down 90% of its farms based on the supposed danger to climate created by cow methane and nitrogen fertilisers. Britain is closing down farms by stealth through mountains of regulations and abolishing historic subsidies that it promised to pay. Farmers are being paid to stop farming altogether or to turn arable fields over to wild flowers.

All this is occurring at the same time that food security is at an all time low. Supply chains were damaged by Covid lockdowns. Hundreds of food processing centres have mysteriously burned down. Millions of chickens have been killed on the supposed excuse of Covid or Avian flu (with no evidence). Many herds of cattle have either been culled or have mysteriously died. Inflation (created by government stupidity in over-printing money) is also causing food prices to rocket by over 50% in real terms. Global problems are also halting some exports of food and famines are occurring in many nations.

So, at the time of a global food crisis (partly engineered) governments are trying to stop farmers from farming. There are also laws in the offing attempting to stop individuals growing their own food or rearing their own chickens. The stupidity of this is beyond belief.

### **Water security**

Nothing is more important than water security, but this is becoming hazardous worldwide.

In Britain, sewage is being dumped by the private water companies into rivers and the government is doing nothing to stop it. This not only causes pollution to water supplies but also kills fish, amphibians, insects and some mammals. Nether do these firms do much about the thousands of water pipe leaks that develop every day due to a failure to invest in maintenance (at any one time a fifth of the pipes are leaking). Foreign companies profit from British water supplies but do very little to keep the infrastructure going. In some areas, sewage water is partially filtered and put into the water supply for domestic use.

Fracking, causes massive pollution to underground aquifers but this is being discussed as starting up again.

Chemical pollution to water supplies by illegal dumping of toxic waste continues with little action by the government to stop it. Agricultural bio-sludge is also ending up in rivers.

Domestic pollution ends up in rivers such as by birth-control pills, chemicals and drugs being washed down the sink.

Finally, councils have already introduced fluoridation in some areas but the government is proposing doing this nationwide. Fluoride is a highly toxic chemical that causes nerve damage and even bone disease.

Not caring about water security is highly stupid.

### **Killing trees**

The government (following globalist plans) is committed to bringing in 5G telecommunications. To implement this it illegally (without any health risk assessment) erected thousands of 5G masts during the lockdown periods. They were especially erected in schools and hospitals. This is claimed to be for faster digital services but in reality it is to effect the *Internet of Things* and the *Internet of Bodies* necessary for social control as part of the WEF's *Fourth Industrial Revolution*.

The problem with 5G is that it requires far more antennae than 4G and the signal cannot pass through dense leaves on trees. Therefore, councils around the country are chopping down trees on streets in the thousands. Two years ago Sheffield cut down 5,000 city trees to enable 5G. This is a city that needs the beauty of trees more than many others but leafy suburbs had their trees removed on the stupid claim that they were dangerous (what, all of them at the same time!).

Suburbs of London, like leafy Holland Park, stand to lose most of their trees from existing council plans. This policy is going to uglify whole swathes of the country, supposedly for the need to upload a movie in one minute on a cellphone instead of five minutes.

Everyone appreciates trees in towns. They change dull streets into areas of beauty and life. They provide a home for millions of birds and insects. But they are also the lungs of a town, providing oxygen and clearing up carbon dioxide and monoxide. Curiously, the Green lobby is completely ignoring this crisis.

Chopping down city trees is stupid.

## **Transhumanism and dehumanisation**

The Elite have openly advocated the development of Transhumanism, as I have explained many times. In general, people are to be replaced by AI, robotics and advanced digital technology (e.g. SMART cars with no human driver, drones etc.). However, many vital functions will still require humans to keep things going. I doubt any robot will be able to repair sewer collapses.

The small population of necessary human slaves will be bio-engineered so that they are surveilled 24-hours and controlled by digital impulses. Scientists have already boasted that with the right implanted chips they can control human emotions and thinking. The Covid vaccines are the beginning of implanted digital nano-technology and each booster implants further updates. The CEO of Moderna affirmed two years ago that computer operating systems were being introduced into people by the vaccines.

Associated with Transhumanism is dehumanisation. As people become cyborgs they cease to be fully human. As part of the social compliance engineering that is going on today, people are already being dehumanised voluntarily through fear and peer pressure. This is the reason behind the whole Transgenderism agenda. It dehumanises people. It turns them from being rational, critically thinking people into accepting irrational, stupid things as axiomatic; such as that men can be women. The Woke agenda is also dehumanising, in a myriad ways. The Climate Change catastrophe agenda is the same; it makes people believe utter lies and stupidity (such as that beneficial CO<sub>2</sub> is dangerous or that humans can control global weather).

A key part of this dehumanising programme is making people accept stupid things as true. This gradually changes the intellect of gullible people so that they are no longer mentally human; they believe utterly stupid things. This not only enables more compliance to Elite programmes but also helps prepare the way for the digital dehumanisation and Transhumanism that will come later.

Getting people to accept stupid policies and agendas is part of a plan to dehumanise everyone.

The dehumanisation programme is an attack on the crown of God's creation – mankind. Man was made in the image of God, though this was ruined in the Fall. Satan seeks to dehumanise what God created in his image as a direct affront to God. This is the perversion of man's soul. This is then furthered by Transhumanism, which is the corruption of man's physiology by digital interface systems based on graphene nano-tubes.

The satanic attack ruins man by perverting his soul through dehumanisation and corrupting his body through Transhumanism technology.

## Conclusion

Everywhere you look there is stupidity at high levels. It affects all institutions and particularly the government and councils. The idea that this global phenomenon is merely incompetence or accident is naïve. It is the outworking of plans long in the making and implementation going back 100 years.

One faction that sought to destroy Western society by infiltrating all the cultural institutions and crashing the national infrastructure are the Cultural Marxists that emanated from the Frankfurt School. The Fabians also sought to implement Marxism by stealth. On top of this were the plans of the Rockefellers going back to 1901 and the strategies of the various Elite NGOs. Today such plans for social upheaval and cultural revolution are laid out in the UN's *Agenda 2030* and the WEF's *Great Reset* working in partnership.

In short, what we observe as stupidity in domestic policy is the direct results of Marxist plans for social engineering and revolution developed over the last 100 years since at least Antonio Gramsci [1891–1937]. This establishment stupidity is a weapon targeted at you.
